The Independent Care Homes Sector Stephen O'Kell, 2002 This report examines the problems of nurse recruitment and retention and considers how registered homes have managed to staff homes where they have been unable to recruit first level nurses working alongside local registration and inspection officers. It also considers the role of care managers in assessing the health care needs of clients and how registration and inspection officers around the country negotiate nurse time in care homes. The report identifies the role of care workers within this new skill mix and documents how some homes manage to recruit and retain nursing staff.

Exceptional Talent Mervyn Dinnen, Matt Alder, 2017-05-03 Attracting, hiring, developing and retaining the right people is crucial to an organization's success. The stakes have never been higher: a 2015 study by CAP suggests that the average cost of employee attrition is 20% of a mid-level employee's annual salary and up to 213% of a high-level executive's salary. In a business environment changing so rapidly that jobs which will be essential in 2020 don't even exist yet, *Exceptional Talent* examines how changes in technology, communication, and employee preferences are impacting the talent journey. It gives practical advice for how to build an effective recruitment and talent management strategy to meet the needs of the business today and prepare for the challenges of the future. *Exceptional Talent* covers how to build an authentic employer brand, explores new ways of sourcing candidates and explains how to use print, digital, social and mobile platforms to target the right people in the right way. Highlighting the impact of networks, relationships and referrals on talent acquisition, it also provides tools and techniques to create an efficient recruitment process, strategies for effective onboarding of new employees as well as practical advice and best practice case studies for retaining and engaging employees.

High Velocity Hiring: How to Hire Top Talent in an Instant Scott Wintrip, 2017-04-07 Win the war for talent by building an army of ready-to-deploy candidates An employee leaves and you post the open position. Resumes trickle in. You interview a few candidates. No one fits the bill. The next thing you know, three months have passed and that desk is still empty . . . Nothing drives business success like a staff of talented, productive employees. So why accept a hiring process that fails you time and time again? Well, there's one person who doesn't: Scott Wintrip. And in *High-Velocity Hiring*, he provides the tools and systems for creating a hiring process designed for today's fast-paced, talent-deficient landscape. Using the proven methods Wintrip has applied at some of today's more forward-thinking companies, you'll hire top employees faster—and smarter. *High-Velocity Hiring* replaces the old, worn-out way of hiring with the simple but revolutionary approach of actively cultivating top talent before positions open. The old way is slow and inefficient. Wintrip's way is dynamic and proven-effective. You'll enrich and maintain a flow of high-quality candidates, harness this flow by identifying the most talented people, and channel it into a pool of ready-to-hire prospective employees. More than ever, hiring the best people requires foresight, planning, alertness, and decisive action. With *High-Velocity Hiring*, you have everything you need to seize the high-ground in the war for talent and maintain it for long-term growth and profitability.

Team Genius Rich Karlgaard, Michael S. Malone, 2015-07-07 A groundbreaking book that sheds new light on the vital importance of teams as the fundamental unit of organization and competition in the global economy. Teams—we depend on them for both our professional success and our personal happiness. But isn't it odd how little scrutiny we give them? The teams that make up our lives are created mostly by luck, happenstance, or

circumstance—but rarely by design. In trivial matters—say, a bowling team, the leadership of a neighborhood group, or a holiday party committee—success by serendipity is already risky enough. But when it comes to actions by fast-moving start-ups, major corporations, nonprofit institutions, and governments, leaving things to chance can be downright dangerous. Offering vivid reports of the latest scientific research, compelling case studies, and great storytelling, *Team Genius* shows managers and executives that the planning, design, and management of great teams no longer have to be a black art. It explores solutions to essential questions that could spell the difference between success and obsolescence. Do you know how to reorganize your subpar teams to turn them into top performers? Can you identify which of the top-performing teams in your company are reaching the end of their life span? Do you have the courage to shut them down? Do you know how to create a replacement team that will be just as effective—without losing time or damaging morale? And, most important, are your teams the right size for the job? Throughout, Rich Karlgaard and Michael S. Malone share insights and real-life examples gleaned from their careers as journalists, analysts, investors, and globetrotting entrepreneurs, meeting successful teams and team leaders to reveal some new truths: The right team size is usually one fewer person than what managers think they need. The greatest question facing good teams is not how to succeed, but how to die. Good chemistry often makes for the least effective teams. Cognitive diversity yields the highest performance gains—but only if you understand what it is. How to find the bliss point in team intimacy—and become three times more productive. How to identify destructive team members before they do harm. Why small teams are 40 percent more likely to create a successful breakthrough than a solo genius is. Why groups of 7 (± 2), 150, and 1,500 are magic sizes for teams. Eye-opening, grounded, and essential, *Team Genius* is the next big idea to revolutionize business.

Decoding Talent Eric Sydel, Mike Hudy, Michael Ashley, 2022-03-15 Harness the power of artificial intelligence in hiring The typical hiring process is fraught with complexity, inefficiency, and bias and often shuts out the most talented candidates. *Decoding Talent: How AI and Big Data Can Solve Your Company's People Puzzle* makes the case for using complex advanced technologies to move past these problems toward effortless optimal candidate decisions. AI experts Eric Sydel, Mike Hudy, and Michael Ashley explain why the traditional resume-based process is out of date, why hiring is difficult, the cost of bad people decisions, how bias interferes in hiring practices, and how AI can address these problems. *Decoding Talent* reveals that using AI in hiring doesn't require your human resource professionals to unlearn and relearn their craft; rather, machine learning can complement their skills by consolidating and analyzing data to recommend actions. Imagine a world in which you didn't have to wonder: Who is the best candidate for the job? What is the return on investment of our hiring process? Is our hiring process fair and equitable? Is our human talent deployed optimally across our organization? What can human resources do to better drive business outcomes for our company? Is our candidate experience adding value to our brand? Incorporating scientifically based hiring can make this world a reality, benefiting both your company and the candidates for hire.

Institute of Brilliant Failures Paul Louis Iske, 2020-04-20 'You can learn from your failures.' 'Entrepreneurship is trial and error.' These statements are hard to disagree with, but in reality it is not that simple. More than ever, we wish to be successful and erase all traces of mistakes and failures as soon as possible. This is not only a pity, but potentially dangerous as well, says professor Paul Louis Iske. Only when we dare to face what we do wrong can we make a thorough analysis and avoid unnecessary recurrence and disappointments. Fear of failure impedes creative thinking and innovation. This compelling book shows you how to develop a culture of openness in your organization and how failure paradoxically leads to significant progress. *Institute of Brilliant Failures* teaches you how to recognize recurring failing patterns at an early stage, how to harvest essential learnings and how to embrace uncertainty. Paul Louis Iske is professor of Open Innovation and Business Venturing at the School of Business and Economics, Maastricht University (the Netherlands) and Extraordinary Professor of Knowledge Management at Stellenbosch University (South Africa). He is Chief Failure Officer (CFO) at the Institute of Brilliant Failures, and a sought-after international consultant in the areas of innovation, sustainable business models, creativity and knowledge management.
