The Murderbot Diaries Martha Wells, 2023-09-19 This ebundle includes: *All Systems Red*, *Artificial Condition*, *Rogue Protocol*, *Exit Strategy*, *Network Effect*, and *Fugitive Telemetry*. The *Murderbot Diaries*, by bestselling author Martha Wells, is an action-packed, cerebral science fiction series about a self-hacking robot searching for the meaning of life.

All Systems Red: In a corporate-dominated spacefaring future, planetary missions must be approved and supplied by the Company. On a distant planet, a team of scientists are conducting surface tests, shadowed by their Company-supplied ‘droid — a self-aware SecUnit that has hacked its own governor module, and refers to itself as “Murderbot.” Scornful of humans, all it really wants is to be left alone long enough to figure out who it is. But when a neighboring mission goes dark, it's up to the scientists and their Murderbot to get to the truth.

Artificial Condition: It has a dark past—one in which a number of humans were killed. But it has only vague memories of the massacre that spawned the title “Murderbot”, and it wants to know more. Teaming up with a Research Transport vessel named ART, Murderbot heads to the mining facility where it went rogue. What it discovers will forever change the way it thinks...

Rogue Protocol: The case against the too-big-to-fail GrayCris Corporation is floundering, and more importantly, authorities are beginning to ask more questions about where Dr. Mensah's SecUnit is. And Murderbot would rather those questions went away. For good.

Exit Strategy: Having traveled the width of the galaxy to unearth details of its own murderous transgressions, as well as those of the GrayCris Corporation, Murderbot is heading home to help submit evidence that could prevent GrayCris from destroying more colonists in its never-ending quest for profit. But who's going to believe a

SecUnit gone rogue? And what will become of it when it's caught? Network Effect: When Murderbot's human associates (not friends, never friends) are captured and another not-friend from its past requires urgent assistance, Murderbot must choose between inertia and drastic action. Drastic action it is, then. Fugitive Telemetry: When Murderbot discovers a dead body on Preservation Station, it knows it is going to have to assist station security to determine who the body is (was), how they were killed (that should be relatively straightforward, at least), and why (because apparently that matters to a lot of people—who knew?) Yes, the unthinkable is about to happen: Murderbot must voluntarily speak to humans! Again! LEGO Studies Mark J.P. Wolf, 2014-11-13 Since the Automatic Binding Bricks that LEGO produced in 1949, and the LEGO System of Play that began with the release of Town Plan No. 1 (1955), LEGO bricks have gone on to become a global phenomenon, and the favorite building toy of children, as well as many an AFOL (Adult Fan of LEGO). LEGO has also become a medium into which a wide number of media franchises, including Star Wars, Harry Potter, Pirates of the Caribbean, Batman, Superman, Lord of the Rings, and others, have adapted their characters, vehicles, props, and settings. The LEGO Group itself has become a multimedia empire, including LEGO books, movies, television shows, video games, board games, comic books, theme parks, magazines, and even MMORPGs. **LEGO Studies: Examining the Building Blocks of a Transmedial Phenomenon** is the first collection to examine LEGO as both a medium into which other franchises can be adapted and a transmedial franchise of its own. Although each essay looks at a particular aspect of the LEGO

phenomenon, topics such as adaptation, representation, paratexts, franchises, and interactivity intersect throughout these essays, proposing that the study of LEGO as a medium and a media empire is a rich vein barely touched upon in Media Studies.

Exit Strategy Martha Wells, 2018-10-02 Martha Wells returns to her Hugo, Nebula, Alex, and Locus Award-winning, New York Times and USA Today bestselling series, *The Murderbot Diaries*, in *Exit Strategy*. Murderbot wasn't programmed to care. So, its decision to help the only human who ever showed it respect must be a system glitch, right? Having traveled the width of the galaxy to unearth details of its own murderous transgressions, as well as those of the GrayCris Corporation, Murderbot is heading home to help Dr. Mensah—its former owner (protector? friend?)—submit evidence that could prevent GrayCris from destroying more colonists in its never-ending quest for profit. But who's going to believe a SecUnit gone rogue? And what will become of it when it's caught? Orphan's Journey Robert Buettner,2008-04-01 In the years since the last Slug War, Jason's command style hasn't made him any friends in the Army. Now, in an effort to keep him out of trouble, the Army has sent Jason to the vast, Earth-orbiting resort called New Moon. At the core of this enormous space station is a starship, a relic from the last war. When a test run of the ship goes wrong, Jason, along with a handful of others, will be torn from orbit and thrust into space. Now, stranded on an alien planet, Jason realizes that not only are his friends are looking to him for rescue, but an entire planet sees him as their only hope.

The Designer People Gail Daley, Even with the help of the best private eye on Vensoog, these are difficult cases for a rookie cop. Lucinda was a designer child. Given genius level intelligence in an embryonic Thieves Guild lab, she learned survival in a harsh world. At twelve, she was rescued and adopted into a loving family. As an adult Lucinda chose to fight her former masters by joining the police force. She works hard to earn her place among Vensoog's law enforcement community. On her first assignment, compassion impelled her to protect an alien mother and daughter fleeing off-

planet bounty hunters. To ensure their safety, she must defeat a deadly Soturi warrior in hand-to-hand combat. Then she rescues a 'designer child' who is a younger double for herself from a sex trafficking ring. To solve this case and rescue the other children trapped by those same criminals, she must capture a vicious Thieves Guild assassin.

Intelligent Support for Computer Science Education Barbara Di Eugenio, Davide Fossati, Nick Green, 2021-09-22 Intelligent Support for Computer Science Education presents the authors' research journey into the effectiveness of human tutoring, with the goal of developing educational technology that can be used to improve introductory Computer Science education at the undergraduate level. Nowadays, Computer Science education is central to the concerns of society, as attested by the penetration of information technology in all aspects of our lives; consequently, in the last few years interest in Computer Science at all levels of schooling, especially at the college level, has been flourishing. However, introductory concepts in Computer Science such as data structures and recursion are difficult for novices to grasp. Key Features: Includes a comprehensive and succinct overview of the Computer Science education landscape at all levels of education. Provides in-depth analysis of one-on-one human tutoring dialogues in introductory Computer Science at college level. Describes a scalable, plug-in based Intelligent Tutoring System architecture, portable to different topics and pedagogical strategies. Presents systematic, controlled evaluation of different versions of the system in ecologically valid settings (18 actual classes and their laboratory sessions). Provides a time-series analysis of student behavior when interacting with the system. This book will be of special interest to the Computer Science education community, specifically instructors of introductory courses

at the college level, and Advanced Placement (AP) courses at the high school level. Additionally, all the authors' work is relevant to the Educational Technology community, especially to those working in Intelligent Tutoring Systems, their interfaces, and Educational Data Mining, in particular as applied to human-human pedagogical interactions and to user interaction with educational software.

Internet of Things, Infrastructures and Mobile Applications

Michael E. Auer, Thrasyvoulos Tsiatsos, 2020-09-10 This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training, case studies on mobile learning, and 5G network infrastructure. Today, interactive mobile technologies have become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends, as well as best practices. The book's intended readership

includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.

Space Rogues: The Adventures of Wil Calder John Wilker, 2018-06-03

Fast Forward Lou Anders, 2009-09-18 Science Fiction is the genre that looks at the implications of technology on society, which in this age of exponential technological growth makes it the most relevant branch of literature going. This is only the start, and the close of the 21st century will look absolutely nothing like its inception. It has been said that science fiction is an ongoing dialogue about the future, and the front line of that dialogue is the short story. The field has a long

history of producing famous anthologies to showcase its distinguished short fiction, but it has been several years since there has been a prestigious all-original science fiction anthology series. Fast Forward is offered in the tradition of Damon Knight's prestigious and influential anthology series, Orbit, and Frederik Pohl's landmark Star SF. Fast Forward marks the start of a new hard science fiction anthology series, dedicated to presenting the vanguard of the genre and charting the undiscovered country that is the future. Contributors scheduled for the first volume include: Kage Baker, Paolo Bacigalupi, Tony Ballantyne, Stephen Baxter, Elizabeth Bear, A. M. Dellamonica, Paul Di Filippo, Robyn Hitchcock, Louise Marley, Ken MacLeod, Ian McDonald, John Meaney, Larry Niven and Brenda Cooper, Mike Resnick and Nancy Kress, Justina Robson, Pamela Sargent, Mary A. Turzillo, Robert Charles Wilson, Gene Wolfe, and George Zebrowski.

Detonation Event John Andrew Karr, 2019-02-05 For decades the Space Consortium of America has searched for new ways to harvest resources beyond an increasingly depleted Earth. The ultimate plan is about to be ignited. So is the ultimate threat to humankind . . .

DETONATION EVENT Battle-hardened Captain Ry Devans and his crew of the Mars Orbiting Station-1 are part of a bold plan: resurrect the active molten cores of the Red Planet with synchronized thermonuclear explosions, and terraform the hell out of that iron-oxide rock for future generations. It'll change history. So will the strands of carbon-based Martian cells that have hitched a ride on the ship. Dr. Karen Wagner knows the microbes' resistance to virus is incredible. It's the unknowable that's dicey. Her orders: blow them into space. But orders can be undermined. Two vials have been stolen and sent hurtling toward the biosphere. For Devans and Wagner, ferreting out the saboteurs on board is only the beginning. Because

there are more of them back on Earth—an army of radical eco-terrorists anxious to create a New World Order with a catastrophic gift from Mars. Now, one-hundred-and-forty-million miles away from home, Devans is feeling expendable, betrayed, a little adrift, and a lot wild-eyed. But space madness could be his salvation—and Earth's. He has a plan. And he'll have to be crazy to make it work.

Surviving a shipwreck, Sento resolves to trek south with immigrants on a suicidal one-way journey across the melting ice. She leads the pilgrims across a raging river, weeps beneath a massive natural sculpture draped with blue ice, and defends an endangered fur seal. Meanwhile, in the secretive city, First Citizen Elita Soares watches the growing threat of the pilgrim train. She wants no more climate refugees within the city walls. When Elita learns her half-sister may be among the immigrants, she vows to stop the newcomers at all costs. Will the pilgrims reach the fabled city before Antarctica's harsh climate kills them? And why is Elita afraid of her half-sister? *City of Ice and Dreams* is a dystopian thriller full of action and suspense.
