**Health, Hope, and Healing for All** Eugene A. Woods, 2023-11-14

One of America's top healthcare leaders offers a prescription to fix an ailing and inequitable healthcare system In *Health, Hope, and Healing for All*, Eugene A. Woods, CEO of Advocate Health, one of the largest non-profit health systems in the nation, provides a riveting behind-the-scenes look at healthcare in the United States. By sharing his insights from three decades in healthcare administration, as well as his personal journey, readers gain a deeper understanding of the challenges facing healthcare systems and the impact on all of us. Woods sheds light on the inequities our communities face, especially in the context of the COVID-19 pandemic, and presents actionable prescriptions to create a more equitable, just and accessible healthcare system. He tackles tough questions around the affordability of healthcare, rising drug prices, alarming clinical shortages and more. As a Black healthcare CEO, Woods shares his personal experiences with injustice and charts a path towards meaningful change. His optimistic outlook and passion for transformation and innovation inspire readers to believe in the power of unity and resilience in the face of adversity. *Health, Hope, and Healing for All* is a must-read for those working in healthcare, policymakers, and individuals seeking hope and answers in an uncertain healthcare landscape. Supported by Woods' expertise and credibility, the book presents real solutions to the current crisis and highlights the urgent need to ensure accessible, affordable and compassionate healthcare for every American.

*Healing All People* Jane O'Boyle, 2009-03-01 This is the story of two centuries-old hospitals, Roper and St. Francis. They were neighbors that supported one another, where generations of doctors treated patients from the Civil War era through the civil rights era.

Then the 1980s and 1990s changed the landscape in healthcare. National healthcare conglomerates came courting in Charleston, and the two hospitals that once supported each other became rivals in a swirl of lawsuits and distrust. Jane O'Boyle interviewed scores of doctors and hospital staff to unravel a tale that is a touchstone of twentieth century Lowcountry history. Filled with colorful personalities and anecdotes, as well as black-and-white photographs, *Healing All People* is the heartwarming and entertaining story of community members who went beyond the call to save a cherished tradition. Charleston doctors and staff at Roper and St. Francis revered their mission to serve the community over profits. In order to preserve this mission, a handful of these medical professionals and sisters sought out the solution that would permit them to resolve old conflicts and build the foundation for a state-of-the-art healthcare system. In addition to a fascinating history, this story is an entertaining snapshot of Charleston in the days after Hurricane Hugo and before the onslaught of the widespread development of the 1990s.

Consumers, Corporations, and Public Health John A.

Quelch, 2016-01-06 The public health footprint associated with corporate behavior has come under increased scrutiny in the last decade, with an increased expectation that private profit not come at the expense of consumer welfare. *Consumers, Corporations, and Public Health* assembles 17 case studies at the intersection of business and public health to illustrate how each side can inform and benefit the other. Through contemporary examples from a variety of industries and geographies, this collection provides students with an appreciation for the importance of consumer empowerment and consumer behavior in shaping both health and corporate outcomes.

The Patient and Health Care System: Perspectives on High-Quality Care Pranavi V. Sreeramoju,Stephen G. Weber,Alexis A. Snyder,Lynne M. Kirk,William G. Reed,Beverly A. Hardy-Decuir,2020-07-19 This book focuses on the interface between the patient and the healthcare system as the entryway to high-quality care and improved outcomes. Unlike other texts, this book puts the patient back in the center of care while integrating the various practices and challenges. Written by interdisciplinary experts, the book begins by evaluating the entire quality landscape before giving voice to all parties involved, including physicians, nurses, administrators, patients, and families. The text then focuses on how to develop a structure that meets needs of all of these groups, effectively addressing common threats to positive outcomes and patient satisfaction. The text tackles the most common challenges clinicians face in a hospital setting, including infection prevention, medication error and stewardship that may jeopardize recovery, complex care, and employee-patient engagement. The Patient and Healthcare System: Perspectives on High-Quality Care is an excellent resource for physicians across broad specialties, nurses, hospital administrators, social workers, patient caregivers and all healthcare professionals concerned with infection prevention, quality and safety of care delivery, and patient satisfaction.

**Organizational Change to Improve Health Literacy** Roundtable on Health Literacy,Board on Population Health and Public Health Practice,Institute of Medicine,2013-10-29 Organizational Change to Improve Health Literacy is the summary of a workshop convened in

April 2013 by the Institute of Medicine Board on Population Health and Public Health Practice Roundtable on Health Literacy. As a follow up to the 2012 discussion paper Ten Attributes of a Health Literate Health Care Organization, participants met to examine what is known about implementation of the attributes of a health literate health care organization and to create a network of health literacy implementers who can share information about health literacy innovations and problem solving. This report discusses implementation approaches and shares tools that could be used in implementing specific literacy strategies. Although health literacy is commonly defined as an individual trait, there is a growing appreciation that health literacy does not depend on the skills of individuals alone. Health literacy is the product of the interaction between individuals' capacities and the health literacy-related demands and complexities of the health care system. System changes are needed to better align health care demands with the public's skills and abilities. Organizational Change to Improve Health Literacy focuses on changes that could be made to achieve this goal.

**Person-Focused Health Care Management** Donald L. Zimmerman, PhD, Denise G. Osborn-Harrison, 2016-12-15 Moves beyond traditional definitions of patient-centered care to improve the experience of a real person as patient How might the entire system for producing, delivering, and paying for health care be changed so that real people fare better than they currently do? This text applies person-focused principles to health management decision-making aimed at improving the personal experience of care within health care institutions to improve outcomes and cost savings. Written and edited by distinguished educators and researchers with decades of health care policy experience, the text examines how health care managers can

initiate and direct the process of system transformation by understanding and using a greater person-focus in their decision-making. It encompasses the key domains of management competencies defined by the AUPHA, CAHME, and NCHL. The text brings together experts across a variety of health care management disciplines to examine how managerial decisions affect the personal experience of patient care. It is based on observations that many of the current problems facing health care managers are caused by lack of attention to what happens when real people are transformed into patients and treated routinely by the US health care system. Moving beyond traditional definitions of patient-centered care, the book explores how our entire system for producing, delivering, and paying for care can be changed so that the internal experience of people receiving care is a positive one. The book helps to develop specific rules for improving the experience of care through better managerial decision-making. Case studies with discussion questions facilitate creative problem solving based on sound decision-making. Also included are extensive links to online content along with an Instructor's Manual, PowerPoint slides and more. Key Features:

- Describes how the person-focused model leads to better outcomes
- Discusses the impact of management decisions on the personal experience of clinical care
- Addresses the personal and clinical problems created through our current system's standard health care delivery and financing
- Applies basic principles of management decision-making to key operational issues to improve the personal experience of care
- Fulfills key learning competencies defined by AUPHA, CAHME, and NCHL

*Health Literacy* National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Population Health and Public Health Practice, Roundtable on Health Literacy, 2015-08-06 In 2004, the Institute of Medicine released *Health Literacy: A Prescription to End Confusion*, a report on the then-underappreciated challenge of enabling patients to comprehend their condition and treatment, to make the best decisions for their care, and to take the right medications at the right time in the intended dose. That report documented the problems, origins, and consequences of the fact that tens of millions of U.S. adults are unable to read complex texts, including many health-related materials, and it proposed possible solutions to those problems. To commemorate the anniversary of the release of the 2004 health literacy report, the Institute of Medicine's Roundtable on Health Literacy convened a 1-day public workshop to assess the progress made in the field of health literacy over the past decade, the current state of the field, and the future of health literacy

at the local, national, and international levels. Health Literacy: Past, Present, and Future summarizes the presentation and discussion of the workshop.

Strategic Management of Health Care Organizations Linda E. Swayne, W. Jack Duncan, Peter M. Ginter, 2012-07-10 The 6th edition of this established text is streamlined to a more manageable format, with the Appendices moved to the web-site and a significant shortening of the main text. There is a greater focus on the global analysis of industry and competition; and analysis of the internal environment. In consultation with feedback from their adopters, the authors have concentrated on the fundamentals of strategy analysis and the underlying sources of profit. This reflects waning interest among senior executives in the pursuit of short-term shareholder value. As ever students are provided with the guidance they need to strategic planning, analysis of the health services environment (internal and external) and lessons on implementation; with additional discussion of organizational capability, deeper treatment of sustainability and corporate social responsibility and more coverage of the sources of organizational inertia and competency traps. This edition is rich in new examples from real-world health care organizations. Chapters are brought to life by the 'Introductory Incidents', 'Learning Objectives', 'Perspectives', 'Strategy Capsules', useful chapter summaries; and questions for class discussion. All cases and examples have been updated or replaced. In this edition the teaching materials and web supplements have been greatly enhanced, with power-point slides, to give lecturers a unique resource.

### **Public Health Leadership and Management** Stuart A.

Capper, Peter M. Ginter, Linda E. Swayne, 2001-09-21 The six chapters and fifteen cases contained in this book challenge students to ask the appropriate questions and stimulate their thinking about public health leadership and management. The situations presented by each case are vivid and provide not only a basis for practicing professional public health judgements but also provide a lasting impression that aids in retention of the lessons learned.

Big Med David Dranove, Lawton Robert Burns, 2022-11-18 There is little debate that health care in the United States is in need of reform. But where should those improvements begin? With insurers?

Drug makers? The doctors themselves? In *Big Med*, David Dranove and Lawton Robert Burns argue that we're overlooking the most ubiquitous cause of our costly and underperforming system: megaproviders, the expansive health care organizations that have become the face of American medicine. Your local hospital is likely part of one. Your doctors, too. And the megaproviders are bad news for your health and your wallet. Drawing on decades of combined expertise in health care consolidation, Dranove and Burns trace *Big Med's* emergence in the 1990s, followed by its swift rise amid false promises of scale economies and organizational collaboration. In the decades since, megaproviders have gobbled up market share and turned independent physicians into salaried employees of big bureaucracies, while delivering on none of their early promises. For patients this means higher costs and lesser care. Meanwhile, physicians report increasingly low morale, making it all but impossible for most systems to implement meaningful reforms. In *Big Med*, Dranove and Burns combine their respective skills in economics and management to provide a nuanced explanation of how the provision of health care has been corrupted and submerged under consolidation. They offer practical recommendations for improving competition policies that would reform megaproviders to actually achieve the efficiencies and quality improvements they have long promised. This is an essential read for understanding the current state of the health care system in America—and the steps urgently needed to create an environment of better care for all of us.

### Cultivating a Digital Culture for Effective Patient Engagement

Lorren Pettit, 2020-01-30 Cultivating a Digital Culture for Effective Patient Engagement offers a strategic framework for healthcare provider websites in order to support patient engagement and connected health initiatives. Referred to as the Health Empowerment Web Strategy Index (HEWSi), the proposed framework is complemented by a detailed check list of health empowerment items organizations should incorporate into their website design. A healthcare provider's website should be an effective resource for empowering the health of patients no matter where patients are in their digital culture evolution. The challenge for many organizations is that patient engagement/connected health initiatives are frequently developed and managed separately from the organization's digital marketing efforts. This book recognizes this disconnect and advocates for a reimaging of healthcare provider websites based on the four domains of the HEWSi strategic framework: (1) orienting; (2) enlightening; (3) aligning; and (4) personalizing. As a framework and toolkit, HEWSi helps breakdown patient engagement silos within healthcare organizations by allowing varied functional teams (marketing; web developers; patient experience staff; clinical leaders; HIM/HIS personnel; etc.) to congregate around a shared pathway for conversing, strategizing, planning, and developing an effective patient

empowerment website.
