Cars, Trucks and Planes Activity Book for Kids Ages 2-4 Anna Fox, 2021-12-19 Learning through play is the best kind of learning! In this colorful Activity Book you'll find more than 35 fun activities to help your child learn : - Basic colors - Basic numbers - Basic colors, - Big-small concepts - Exercise perceptiveness - Small motor skills - Logical thinking. - Sequences (left hemisphere puzzles). Tasks have different levels of difficulty and are arranged in the book from the easiest to the most difficult. You will find many

games such as: - Find the pairs, - Find the difference, - Match, - Connect the dots - Find the biggest/smallest - Colour in. The most difficult tasks are at the end and are sequences. The ability to map them is a very important stage in a child's development before learning to speak, write and read. Therefore, it is a good idea to offer this type of games to children from an early age. Sequences are sequences of signs or symbols, ordered according to a specific rule. The repetition of successive elements results from the rule presented. The ability to imitate and continue a sequence is a basic cognitive ability that determines the use of spoken and written language. Because speaking and writing involves, among other things, reproducing sounds or letters in the correct order. Lack of this skill can cause problems with speaking, writing and reading. Remember that sequence exercises are always done from left to right.
