**IoT and Cloud Computing Advancements in Vehicular Ad-Hoc Networks** Rao, Ram Shringar,Jain, Vishal,Kaiwartya, Omprakash,Singh, Nanhay,2020-03-20 The optimization of traffic management operations has become a considerable challenge in today's global scope due to the significant increase in the number of vehicles, traffic congestions, and automobile accidents. Fortunately, there has been substantial progress in the application of intelligent computing devices to transportation processes. Vehicular ad-hoc networks (VANETs) are a specific practice that merges the connectivity of wireless technologies with smart vehicles. Despite its relevance, empirical research is lacking on the developments being made in VANETs and how certain intelligent technologies are being applied within transportation systems. IoT and Cloud Computing Advancements in Vehicular Ad-Hoc Networks provides emerging research exploring the theoretical and practical aspects of intelligent transportation systems and analyzing the modern techniques that are being applied to smart vehicles through cloud technology. Featuring coverage on a broad range of topics such as health monitoring, node localization, and fault tolerance, this book is ideally designed for network designers, developers, analysts, IT specialists, computing professionals, researchers, academics, and post-graduate students seeking current research on emerging computing concepts and developments in vehicular ad-hoc networks.

*What Car Would You Drive If ... ?* Larry Collingwood,2010-09-07 This book brings to readers a close look at car brands that millions are familiar with, such as Ford, Chevrolet, and Buick to name a few. It is written to entertain readers as they reminisce or learn about various models and their manufacturers. In the first part of the question, readers are encouraged to finish it with a clue to identify the name of the model of the car, and a hint is added for further assistance. Sometimes, tips are provided to consider in which chapter the question appears-following in alphabetical order. The second part of each question will give readers multiple choices to help determine the maker of the car in question. For the most part, only one choice will be correct. However, there are a couple of instances where more than one maker has used a model name. In those cases, all manufacturers will be given in the choices.
