The International Harvester Company Chaim M. Rosenberg,2019-04-26 Ancient farmers used draft animals for plowing but the heavy work of harvesting fell to the humans, using sickle and scythe. Change came in the mid-19th century when Cyrus Hall McCormick built the mechanical harvester. Though the McCormicks used their wealth to establish art collections and universities, battle disease, and develop birth control, members of the family faced constant scrutiny and scandal. This book recounts their story as well as the history of the International Harvester Company (IHC)--a merger of the McCormick and Deering companies and the world's leader in agricultural machinery in the 1900s.

Asylum Law in the European Union Francesco Cherubini,2014-11-13 This book examines the rules governing the right to asylum in the European Union. Drawing on the 1951 United Nations Convention relating to the Status of Refugees, and the 1967 Protocol, Francesco Cherubini asks how asylum obligations under international refugee law have been incorporated into the European Union. The book draws from international law, EU law and the case law of the European Court of Human Rights, and focuses on the prohibition of refoulement; the main obligation the EU law must confront. Cherubini explores the dual nature of this principle, examining both the obligation to provide a fair procedure that determines the conditions of risk in the country of origin or destination, and the obligation to respond to a possible expulsion. Through this study the book sheds light on EU competence in asylum when regarding the different positions of Member States. The book will be of great use and interest to researchers and students of asylum and immigration law, EU law, and public international law.

Europe and America John Peterson,2002-09-11 The conflict in Bosnia, disputes within the new World Trade Organization and debates about NATO enlargement all illustrate a single point: no relationship is more important in determining the state of international relations than the alliance between Europe and America. Contrary to accepted wisdom, John Peterson argues that the end of the Cold War actually enhances the prospects for partnership between the United States and the European Union. Completely updated, this book offers a clear and penetrating analysis of the problems and opportunities facing the transatlantic alliance.

Red Tractors 1958-2022 Lee Klancher,Kenneth Updike,2022-07 This award-winning history of International Harvester and Case IH tractors includes data and photos of every model built from 1958, as well as in-depth information about how these tractors were designed and constructed. Farmall 100 Years Randy Leffingwell,2022-10-04 In Farmall 100 Years, award-winning tractor author, photographer, and historian Randy Leffingwell offers a richly illustrated and detailed book that captures the full story of the iconic tractors. Farmall tractors are among the most influential and iconic farm machines in history. From the first model in 1923 to their final model year in 1973, International Harvester revolutionized the tractor world by conceiving the Farmall brand, revolutionary all-purpose tractors designed for small- to medium-sized farms. Beautiful, contemporary photos and rare historical images accompany in-depth analyses of milestone tractors. The engaging text examines engineering developments, their historical context, and key figures. Notably, the story is told through the lens of the three dozen most influential Farmalls across the brand's history. From the Farmalls to the legendary and best-selling Letter Series unveiled in the 1930s, the entry-market Cub launched in 1947, the Hundred Series introduced in 1954, and

beyond, Leffingwell provides a unique, unprecedented perspective on a farming giant. By 1947, Farmall had built over 1 million tractors. Amazingly, many are still in use today as collector vehicles as well as working farm tractors. Farmall 100 Years brings the story to life in the ultimate tribute to these enduring machines.
