After watching, listening, and playing all over the world, Brett Morton distilled a wealth of information—and began to understand why he had been losing so often. Each spin of the wheel is a new and usually random event. Every spin is a fight against the casino's advantages. It was a challenge to debunk the theorists, especially those who had never played. His research and hard work proved he was right—winning consistently is possible. Morton explains the methods to use, rates many of the well-known systems, but above all brings a clear and refreshing vision to this exciting game.

How to Win at Roulette and Other Casino Games

Sidney H. Radner, 2012-09-01

Roulette, Breaking the Bank and Winning Monster

Peter Zhang, 2016-04-21 Roulette game has been around for centuries and yet gamblers have gone broke just over 2.7% house edge. Now you may laugh at me and comment that I am losing 2.7% at every spin cumulatively. Of course you are right in saying that and you may tell me that it is highly negative expected value in the long run. But can you ignore these facts Roulette will produce winning and losing streaks Roulette will allow gamblers to win big by giving them 36 times of whatever they put straight up If a person goes hot and gets 2 times a number correct he stands to win 36×36 times the amount bet consecutively. Giving you returns of 1296 times or if you just bet 25 dollars which anyone can afford to lose in a casino he will have won 32 thousand 400 dollars or \$32,400. Now with such low house edges anyone can go on a hot streak, but everyone loses. And now if I tell you I have a system that will allow you to take shots at the game of Roulette and if you win you compound your profits and cut losses and take profits then certainly the casinos will a lot fun, a lot entertainment and a hell lot more fun, then would you deny it? In this manual and in the coming pages I am going to convey to you the secrets of my winning system of Roulette, every Roulette player must read this book at least one and what have you got to lose? You are just going

to get saved a lot of money and this is an indispensable guide to winning in casinos a cart full of money, all crisp 100 dollar bundles. And who knows you may even break the bank at roulette table. A lot of players go to the casinos and assume they are lucky and going to win and this is the wrong mentality to win at poker, because if you believe you are going to win you are going to compound your losses following bad strategies like Martingale. The Martingale strategy works best for the casino and they prevent losses by limiting the maximum amount of bets that could be placed and of course players like you and me don't have access to infinite resources that will allow us to keep doubling our bets forever. We need to win big and we need to win with a small amount of money. In this manual I am going to give you solid advice that will allow players to reduce the house edge of casinos and who knows if everyone read my book probably the casinos will stop the game of Roulette altogether. Because I have a system that really does beat the casinos. And the rules which I will tell you precisely in later part of the book are as follows 1.Take Profits 2.Try to go on a hot streak 3.Cut losses 4.Go for big wins like betting straight up 5.An intuitive pattern recognition system that makes phrases out of meaningless numbers for identification of wheel bias. (This works on every Roulette Wheel in Vegas, Atlantic City, every casino in the world and all machines open and closed and even automatic Roulette machines which have a ball inside a chamber) This is a short book that will give you the right tools to approach the game of

Roulette and every chapter will convey the topics that I have told you above and you must use all of these tools at once so that you will make big money or be break-even or have very little losses in the game of Roulette. Good Luck and wish you a lot of fun and entertainment in the casinos.

Playboy's Guide to Casino Gambling Edwin Silberstang, 1980

How to Win at Casino Gambling Roger Gros, 2000 An illustrated guide to a variety of casino gambling games.

Roulette Cracker John Hare, Roulette is a fixed odds game. Unlike card games, bingo and some other casino games where there are so many variables, the odds (the probability) of winning on a roulette table are fixed for every bet. If you know how the game works and understand something about the statistical probabilities of the bets, you can reduce the risk of losing and play with the odds in your favour. Surprisingly, even though you may win more often, you will almost certainly put your winnings back and lose in the long run if you just continue what you are doing. This is a statistical fact and is because the European table has an advantage of 2.7%. Despite this however, there are still ways to help counteract the problem particularly if you change the way you bet and introduce a betting ratio into your play. If you get it right, you could at least extend your time on the table, reduce your losses or maybe even return to profit. This book started out as the instruction manual for the Roulette Cracker software; a sophisticated algorithm. It still is the instruction manual but sections have been re

written and now contain information which can be very useful to a roulette player with or even without the software - whether they are playing for fun or for real, in a casino or on line. The software is accessed by logging onto our web site and enrolling for one of the 3, 6, or 12 month membership options, but the book can be purchased separately. In addition to gaining some useful information about roulette without membership, buying the book allows you to learn exactly how the software works and what additional benefits you might get, this will help you make the most of your membership of Roulette Cracker.
