Total Survey Error in Practice Paul P. Biemer,Edith de Leeuw,Stephanie Eckman,Brad Edwards,Frauke Kreuter,Lars E. Lyberg,N. Clyde Tucker,Brady T. West,2017-02-06 Featuring a timely presentation of total survey error (TSE), this edited volume introduces valuable tools for understanding and improving survey data quality in the context of evolving large-scale data sets This book provides an overview of the TSE framework and current TSE research as related to survey design, data collection, estimation, and analysis. It recognizes that survey data affects many public policy and business decisions and thus focuses on the framework for understanding and improving survey data quality. The book also addresses issues with data quality in official statistics and in social, opinion, and market research as these fields continue to evolve, leading to larger and messier data sets. This perspective challenges survey organizations to find ways to collect and process data more efficiently without sacrificing quality. The volume consists of the most up-to-date research and reporting from over 70 contributors representing the best academics and researchers from a range of fields. The chapters are broken out into five main sections: The Concept of TSE and the TSE Paradigm, Implications for Survey Design, Data Collection and Data Processing Applications, Evaluation and Improvement, and Estimation and Analysis. Each chapter introduces and examines multiple error sources, such as sampling error, measurement error, and nonresponse error, which often offer the greatest risks to data quality, while also encouraging readers not to lose sight of the less commonly studied error sources, such as coverage error, processing error, and specification error. The book also notes the relationships between errors and the ways in which efforts to reduce one type can increase another, resulting in an estimate with larger total error. This book: • Features various error sources, and the complex relationships between them, in 25 high-quality chapters on the most up-to-date research in the field of TSE • Provides comprehensive reviews of the literature on error sources as well as data collection approaches and estimation methods to reduce their effects • Presents examples of recent international events that demonstrate the effects of data error, the importance of survey data quality, and the real-world issues that arise from these errors • Spans the four pillars of the total survey error paradigm (design, data collection, evaluation and analysis) to address key data quality issues in official statistics and survey research Total Survey Error in Practice is a reference for survey researchers and data scientists in research areas that include social science, public opinion, public policy, and business. It can also be used as a textbook or supplementary material for a graduate-level course in survey research methods.

Encyclopedia of Media Violence Matthew S. Eastin,2013-10-01 Via 134 signed entries, this encyclopedia provides students, researchers, and the general public with an accessible, comprehensive, and well-balanced eviddence-based examination of theory, research and debates related to media violence. Entries conclude with Cross-References and Suggestions for Further Readings to guide users to related entries and resources for further research, and a thematic Reader's Guide in the front matter groups related entries by topic to make it easier for users to locate related entries of interest.

Advances in Questionnaire Design, Development, Evaluation and Testing Paul C. Beatty,Debbie Collins,Lyn Kaye,Jose-Luis Padilla,Gordon B. Willis,Amanda

Wilmot,2019-10-24 A new and updated definitive resource for survey questionnaire testing and evaluation Building on the success of the first Questionnaire Development, Evaluation, and Testing (QDET) conference in 2002, this book brings together leading papers from the Second International Conference on Questionnaire Design, Development, Evaluation, and Testing (QDET2) held in 2016. The volume assesses the current state of the art and science of QDET; examines the importance of methodological attention to the questionnaire in the present world of information collection; and ponders how the QDET field can anticipate new trends and directions as information needs and data collection methods continue to evolve. Featuring contributions from international experts in survey methodology, Advances in Questionnaire Design, Development, Evaluation and Testing includes latest insights on question characteristics, usability testing, web probing, and other pretesting approaches, as well as: Recent developments in the design and evaluation of digital and self-administered surveys Strategies for comparing and combining questionnaire evaluation methods Approaches for cross-cultural and cross-national questionnaire development New data sources and methodological innovations during the last 15 years Case studies and practical applications Advances in Questionnaire Design, Development, Evaluation and Testing serves as a forum to prepare researchers to meet the next generation of challenges, making it an excellent resource for researchers and practitioners in government, academia, and the private sector.

Market Research Best Practice ESOMAR,2009-08-27 Market Research Best Practice is a compilation of the best discussion papers, case studies and methodologies from the ESOMAR publishing and event programme over the last decade and more. Market research is adapting to an increasingly competitive, demanding and globalised business world and, as the world's leading market research organisation, ESOMAR is providing the platform to showcase latest advances and best practice. In the pursuit to define and illustrate 'new' market research, this book provides a unique source of ideas and practical examples of what research has to offer business and how research can influence the way results are tracked, insights are generated and ultimately decisions are made. Market Research Best Practice draws on recent successes to explore how research is evolving to meet market needs and how good research practice fits into modern business. More than 50 authors have contributed their work to this collection - all papers were first presented at ESOMAR events and many contributions have been past ESOMAR award winners. To find out more about the ESOMAR Membership, the worldwide code of practice and the range of events and publications, visit www.esomar.org.

Surveys That Work Caroline Jarrett,2021-08-17 Surveys That Work explains a seven—step process for designing, running, and reporting on a survey that

gets accurate results. In a no—nonsense style with plenty of examples about real—world compromises, the book focuses on reducing the errors that make up Total Survey Error—a key concept in survey methodology. If you are conducting a survey, this book is a must—have.

The Sage Handbook of Survey Development and Application Lucy R. Ford,Terri A. Scandura,2023-06-29 The SAGE Handbook of Survey Development and Application provides a practical resource that researchers can go to for cutting-edge tools to ensure they are employing the best survey research techniques. This handbook not only covers the classic and innovational skills and approaches involved at every step of the survey research process, but also centres itself around applied, how-to guidance to aid readers in best practice. Chapters engage with a broad range of topics including sampling issues, approaches to establishment of measurement equivalence, and the use of online labour pools in survey development. With contributions from a global community of leading and emerging scholars across a wide variety of disciplines, this Handbook is focused on being applicable and accessible across the social sciences. Containing over 120 tables and figures, checklists and tutorial guides, The SAGE Handbook of Survey Development and Application will serve as a one stop resource for survey research. This handbook serves as a touchstone for a variety of fields such as Organizational Behavior, Industrial & Organizational Psychology, Management, Psychology, Educational Research, Marketing, Public Policy, and others. PART 1: Conceptual Issues and Operational Definition PART 2: Research Design Considerations PART 3: Item Development PART 4: Scale Improvement Methods PART 5: Data Collection PART 6: Data Management and Analysis PART 7: Research Production and Dissemination PART 8: Applications

Gamification in Education and Business Torsten Reiners,Lincoln C. Wood,2014-11-22 This book is dedicated to applied gamification in the areas of education and business, while also covering pitfalls to avoid and guidelines needed to successfully implement for a project. Using different theoretical backgrounds from various areas including behavioral economics, game theory, and complex adaptive systems, the contributors aim to help readers avoid common problems and difficulties that they could face with poor implementation. The book's contributors are scholars and academics from the many areas where the key theory of gamification typically comes from. Ultimately, the book's goal is to help bring together the theories from these different disciplines to the field of practice in education and business. The book is divided into four parts: Theory, Education, Business, and Use Cases. Part I provides a foundation on the theory of gamification and offers insight into some of the outstanding questions that have yet to be addressed. In Part II, the application and value that gamification can bring within the education sector is examined. The book then changes focus in Part III to spotlight the use of gamification within business environments. The topics also cover educational aspects like improved learning outcomes, motivation, and learning retention at the workplace. Finally Part IV concentrates on the applications and use of gamification through a series of case studies and key elements that are used in real situations to drive real results.

Advances in Engineering Networks Rodolfo de Castro,Gerusa Giménez,2020-09-09 This book highlights some of the latest research advances and cutting-edge analyses of real-world case studies on Industrial

Engineering and Operations Management from diverse international contexts, while also identifying business applications for the latest findings and innovations in operations management and the decision sciences. It gathers a selection of the best papers presented at the XXII International Conference on Industrial Engineering and Industrial Management, which was promoted by ADINGOR (Asociación para el Desarrollo de la Ingeniería de Organización) and held at the Escola Politècnica Superior of the Universitat de Girona, Spain, on July 12th and 13th, 2018.

<u>Advances in New Technologies, Interactive Interfaces, and Communicability</u> Francisco V. Cipolla Ficarra,Carlos de Castro Lozano,Mauricio Pérez Jiménez,Emma Nicol,Andreas Kratky,Miguel Cipolla-Ficarra,2011-04-12 This book constitutes the thoroughly refereed post-conference proceedings of the First International Conference on Advances in New Technologies, Interactive Interfaces, and Communicability, held in Huerta Grande, Argentina, in October 2010. The 16 revised papers presented together with 3 keynote lectures were carefully reviewed and selected from numerous submissions. The topics addressed span the entire spectrum of design, e-commerce, e-learning, e-health, e-tourism, Web 2.0 and Web 3.0. and discuss the latest advances in the areas of accessibility, communicability, computer animation, computer science, database technologies, digital cartography, distance education, GIS, human factors, hypermedia, ICT, quality design, laboratory experience, medical informatics, multimedia, open software, software engineering, telecommunications, telework, tourism online, ubiquitous computing, user-centered design, and virtual reality.

Internet como modo de administración de encuestas Díaz de Rada Igúzquiza, Vidal,Domínguez Álvarez, Juan Antonio,Pasadas del Amo, Sara,2019-10-31 El 86% de los hogares españoles tenía acceso a Internet en 2018 y el 86% había utilizado esta tecnología en los últimos tres meses. Estos datos explican en gran medida la importancia que Internet ha alcanzado en los últimos años como fuente para la obtención de información (big data) y como modo de administración de encuestas en nuestro país. Hoy por hoy, la encuesta web supone el 42% de la facturación de las encuestas realizadas por las empresas del sector de la investigación en España y el 67% de las realizadas en todo el mundo (ANEIMO, 2017). Este desarrollo se ha visto acompañado de un importante esfuerzo de investigación metodológica en las últimas décadas que ha permitido que quien se enfrenta hoy al diseño y ejecución de una encuesta web lo haga conociendo cuáles son las mejores prácticas en este ámbito. Sin embargo, este conocimiento está disponible en su mayor parte en inglés y son muy escasos los textos en castellano que abordan los aspectos metodológicos de las encuestas web en su conjunto. Este volumen pretende revertir esa situación, trasladando al lector hispanohablante los resultados de las investigaciones metodológicas más recientes y acompañándole en la planificación, diseño y trabajo de campo de una encuesta web.

3rd XoveTIC Conference Joaquim de Moura,Alejandro Puente-Castro,Javier Pereira Loureiro,2021-05-27 This volume of Proceedings gathers papers presented at XOVETIC2020 (A Coruña, Spain, 8-9 October 2020), a conference with the main goal of bringing together young researchers working in big data, artificial intelligence, Internet of Things, HPC (High-performance computing), cybersecurity, bioinformatics, natural language processing, 5G, and other areas from the field of ICT (Information Communications Technology); and offering a platform to present the results of their research

to a national audience in Portugal. This third edition aims to serve as the basis of this event, which will be consolidated over time and acquire international projection.

  Technology options for engaging respondents in self-administered questionnaires and remote interviewing Sarah L. Cook,Mandy Sha,Joe Murphy,Charles Q. Lau,2016-03-15 Moving away from in-person interviewing and toward self-administered questionnaires (SAQs) reduces costs but also raises questions about data quality. Without an interviewer present, respondents may lose their engagement with the survey, leading to breakoffs and greater measurement error. One way to potentially reduce these errors is to leverage new technologies to enhance respondent engagement. Another is to use remote interviewers, which is more budget-friendly than in-person interviewers. In this paper, we describe new technology options to keep respondents engaged with SAQs and harness remote interviewing capabilities: mobile data collection, short message service and instant messaging, video interviewing, and virtual worlds. Drawing from literature and professional experience, we discuss the functioning and implications of these recent technologies for respondent engagement and additional indicators, such as respondent burden, accuracy, and retention. This paper serves as a starting point for researchers considering technological options for conducting SAQs or remote interviews to reduce costs while continuing to engage respondents without sacrificing quality.

  Mobile Research Methods Daniele Toninelli,Robert Pinter,Pablo de Pedraza,2015-05-25 Daily activity sees data constantly flowing through cameras, the internet, satellites, radio frequencies, sensors, private appliances, cars, smartphones, tablets and the like. Among all the tools currently used, mobile devices, especially mobile phones, smartphones and tablets, are the most widespread, with their use becoming prevalent in everyday life within both developed and developing countries. Shopping, reading newspapers, participating in forums, projecting and completing surveys, communicating with friends and making new ones, filing tax returns and getting involved in politics are all examples of how ingrained mobile technology is to modern lifestyle. Mobile devices allow a wide range of heterogeneous activities and, as a result, have great potential in terms of the different types of data that can be collected. The use of mobile devices to collect, analyse and apply research data is explored here. This book focuses on the use of mobile devices in various research contexts, aiming to provide a detailed and updated knowledge on what is a comparatively new field of study. This is done considering different aspects: main methodological possibilities and issues; comparison and integration with more traditional survey modes or ways of participating in research; quality of collected data; use in commercial market research; representativeness of studies based only on the mobile-population; analysis of the current spread of mobile devices in several countries, and so on. Thus, the book provides interesting research findings from a wide range of countries and contexts. This book was developed in the framework of WebDataNet's Task Force 19. WebDataNet, was created in 2009 by a group of researchers focusing on the discussion on data collection methods. Supported by the European Union programme for the Coordination of Science and Technology, WebDataNet has become a unique, multidisciplinary network that has brought together leading web-based data collection experts from several institutions, disciplines, and relevant backgrounds from more

than 35 different countries.

<u>The SAGE Handbook of Online Research Methods</u> Nigel G Fielding,Raymond M Lee,Grant Blank,2008-06-24 This handbook is the first to provide comprehensive, up-to-the-minute coverage of contemporary and developing Internet and online social research methods, spanning both quantitative and qualitative research applications. The editors have brought together leading names in the field of online research to give a thoroughly up to date, practical coverage, richly illustrated with examples. The chapters cover both methodological and procedural themes, offering readers a sophisticated treatment of the practice and uses of Internet and online research that is grounded in the principles of research methodology. Beginning with an examination of the significance of the Internet as a research medium, the book goes on to cover research design, data capture, online surveys, virtual ethnography, and the internet as an archival resource, and concludes by looking at potential directions for the future of Internet and online research. The SAGE Handbook of Internet and Online Research Methods will be welcomed by anyone interested in the contemporary practice of computer-mediated research and scholarship. Postgraduates, researchers and methodologists from disciplines across the social sciences will find this an invaluable source of reference.
