Jeffrey Plowman, Perry Rowe

The Battles for Monte Cassino Jeffrey Plowman, Perry Rowe, 2022-09-21 The Battles for Monte Cassino encompassed one of the few truly international conflicts of the Second World War. A strategic town on the road to Rome, the fighting lasted four months and cost the lives of more than 14,000 men from eight nations. Between January and May 1944, forces from Britain, Canada, France, India, New Zealand, Poland and the United States, fought a resolute German army in a series of battles in which the advantage swung back and forth, from one side to the other. From fire-fights in the mountains to tank attacks in the valley; from river crossings to street fighting, the four battles of Cassino encompass a series of individual operations unique in the history of the Second World War.

Monte Cassino Jeffrey Plowman, 2018-11-30 "This book is highly recommended to anyone with an interest in the Italian campaign of the Second World War, and the use of armor in that war."—British Military History The battles fought between the Allied armies and the German Wehrmacht at Monte Cassino in 1944 were key episodes in the protracted Italian campaign, and the eventual Allied victory was a decisive step in the wider war to liberate Europe from German occupation. Much has been written about Cassino, but few books have chosen to tell the story through photographs—to give a visual insight into the fighting and the forces involved, the conditions in which they fought, and the landscape around the Monte Cassino abbey which became a battlefield. That is why Jeffrey Plowman's photographic history is of such value. Using almost 200 wartime images, many of which have not been published before, he gives a graphic impression of the realities of the fighting as it was experienced by the troops on the ground. He focuses on the tanks—the array of armored vehicles deployed by both sides which played a critical role. This aspect of Cassino has rarely been covered in such detail and in such a vivid way. The book will be of special interest to modelers and historians of armored warfare, but it will also appeal to readers who have a more general interest in the Italian campaign. "The amount of information provided for each photograph is exceptional . . . I commend the author for building such a comprehensive portfolio of fascinating images."—Walking the Battlefields

Tank Attack at Monte Cassino Jeffrey Plowman, 2020-04-30 An in-depth account of the daring Allied tank attack launched along Cavendish Road during the third battle at Monte Cassino in Italy in 1944. Early morning, March 19, 1944. Tanks manned by New Zealanders, Indians, and Americans launch a daring attack along a narrow mountain track on German positions north of Monte Cassino. So began one of the most audacious Allied attempts to break through the Gustav Line and advance on Rome—and it almost succeeded. Yet the extraordinary story has seldom been told, and it has never been told before in the vivid detail Jeffrey Plowman brings to this new account. Using operational orders, combat reports, unit diaries, post-battle photos from private and public archives, and the graphic personal accounts of those who took part, he describes the construction of Cavendish Road and the course of the entire operation that followed. The planning for the attack and the men involved are described in a gripping and clear-sighted way, as is the attack itself—its initial rapid success and its ultimate failure. Eighty years later Jeffrey Plowman reveals exactly what happened and shows how and why this bold thrust against the German strongpoints at Monte Cassino, which could have turned the course of the battle, ended in retreat. His book also features a visitor's guide that covers the length of Cavendish Road from the village of Cairà to Massa Albaneta, linking each spot with the events described in the narrative.

Cassino Tony Williams, 2002-01-01

The Battles of Monte Cassino Glyn Harper, 2013-09-01 The Allied forces' actions in and around Monte Cassino in Italy remain some

of the most controversial of the Second World War. Adolf Hitler described them as the battles that came closest to the bitter struggles on the Western Front. The name Cassino has become a touchstone for New Zealanders as a result of the crucial role played there by Kiwi forces, and the controversy surrounding the battles refuses to die down. This reappraisal of the battles brings new information about the events at Cassino to light. The Battles of Monte Cassino is not another campaign narrative but a fresh look at some of the key aspects of the battles - the controversial bombing of the Benedictine monastery, the effectiveness of the commanders involved on both sides, the consequences of the Anzio beachhead, the performance of the Germans - and why four agonising battles were needed to defeat the Germans at Cassino.

Cassino Tony Williams, 2009 The author tells the story of Cassino in the words of the soldiers who fought there. His book is a story of courage and survival, and of comradeship amidst the brutality and chaos. He also addresses the big questions: was the bombing of the monastery really necessary? Were Kiwi lives lost due to tactical errors higher up the chain of command? How should we assess this important chapter in our history sixty years on?

From Salerno To Rome: General Mark W. Clark And The Challenges Of Coalition Warfare Major Glenn L. King, 2015-11-06 On 9 September 1943 the United States Fifth Army landed at Salerno, commencing a lengthy and costly campaign that would transit the Italian Peninsula. Lieutenant General Mark W. Clark commanded this army. His many supporters, including Winston Churchill and General Dwight D. Eisenhower, considered him a brilliant staff officer and trainer. His detractors, including General George S. Patton, considered him overly ambitious and self serving. Clark had been promoted ahead of many senior and experienced officers, some of

whom were now his subordinate commanders within the Fifth Army. His army would come under the jurisdiction of the Fifteenth Army Group, a combined American-British Headquarters commanded by General Harold Alexander, an Englishman. Clark would command a number of foreign troops, including the British X Corps, the New Zealand Corps and the French Expeditionary Corps. Throughout this campaign, Clark would face the complexities of coalition command, tactical in nature but with strategic consequences. This thesis contends that the command arrangements within Fifteenth Army Group, together with biased perceptions, greatly influenced the decision making of General Clark, an accomplished staff officer yet inexperienced army commander.

The Indian Army and the End of the Raj Daniel Marston, 2014-04-24 A unique examination of the role of the Indian army in post-World War II India in the run-up to Partition. Daniel Marston draws upon extensive archival research and interviews with veterans of the events of 1947 to provide fresh insight into the final days of the British Raj.

The New Zealand Expeditionary Force in World War II Wayne Stack, Barry O'Sullivan, 2013-03-20 In 1939 more than 140,000 New Zealanders enlisted to fight overseas during World War II. Of these, 104,000 served in the Second New Zealand Expeditionary Force. Initially thrown into the doomed campaign to halt the German blitzkrieg on Greece and Crete (1941), the division was rebuilt under the leadership of MajGen Sir Bernard Freyberg, and became the elite corps within Montgomery's Eighth Army in the desert. After playing a vital role in the victory at El Alamein (1942) the 'Kiwis' were the vanguard of the pursuit to Tunisia. In 1943-45 the division was heavily engaged in the Italian mountains, especially at Cassino (1944); it ended the war in Trieste. Meanwhile, a smaller NZ force supported US forces against the Japanese in the Solomons and New Guinea (1942-44). Fully illustrated with specially commissioned colour plates, this is the story of the Second New Zealand Expeditionary Force's vital contribution to Allied victory in World War II.
