Geocomputation, Sustainability and Environmental Planning Beniamino Murgante,Giuseppe Borruso,Alessandra Lapucci,2011-03-30 The experience developed by Ian McHarg represents the first attempt to base environmental planning on more objective methods. In particular, he supposed that the real world can be considered as a layer cake and each layer represents a sectoral analysis. This metaphor represents the fundamental of overlay mapping. At the beginning, these principles have been applied only by hand, just considering the degree of darkness, produced by layer transparency, as a negative impact. In the following years, this craftmade approach, has been adopted for data organization in Geographical Information Systems producing analyses with a high level of quality and rigour. Nowadays, great part of studies in environmental planning field have been developed using GIS. The next step relative to the simple use of geographic information in supporting environmental planning is the adoption of spatial simulation models, which can predict the evolution of phenomena. As the use of spatial information has definitely improved the quality of data sets on which basing decision-making process, the use of Geostatistics, spatial simulation and, more generally, geocomputation methods allows the possibility of basing the decision-making process on predicted future scenarios. It is very strange that a discipline such as planning which programs the territory for the future years in great part of cases is not based on simulation models. Sectoral analyses, often based on surveys, are not enough to highlight dynamics of an area. Better knowing urban and environmental changes occurred in the past, it is possible to provide better simulations to predict possible tendencies. The aim of this book is to provide an overview of the main methods and techniques adopted in the field of environmental geocomputation in order to produce a more sustainable development.

Planning and Evaluation of Irrigation Projects Raveendra Kumar Rai,Vijay P. Singh,Alka Upadhyay,2017-04-06 Planning and Evaluation of Irrigation Projects: Methods and Implementation presents the considerations, options and factors necessary for effective implementation of irrigation strategies, going further to provide methods for evaluating the efficiency of systems-in-place for remedial correction as needed. As the first book to take this lifecycle approach to agricultural irrigation, it includes real-world examples not only on natural resource availability concerns, but also on financial impacts and measurements. With 21 chapters divided into two sections, this book is a valuable resource for agricultural and hydrology engineers, conservation scientists and anyone seeking to implement and maintain irrigation systems. Uses real-world examples to present practical insights Incorporates both planning and evaluation for full-scope understanding and application Illustrates both potential benefits and limitations of irrigation solutions Provides potential means to increase crop productivity that can result in improved farm income

Residential Planning and Design Jeannie Ireland,2015-07-09 This comprehensive text introduces the reader to the entire process of planning residential interiors. Extensive full-color photos and diagrams augment the text to explain what an interior designer should know to work with other professionals, such as architects, electricians, and plumbers, to meet clients' housing needs. The focus on contemporary American housing trends is enriched with references to interiors from the past and from other countries.

Project and Program Management Mitchell L. Springer,2013 On the people side, it sheds new light on how to mold different personality types into a team, how to motivate the team's members, and how to produce extraordinary results. After exploring the concept of?competencies? and showing how people must be at the heart of any organizational decision, Springer focuses on the essential qualities of leadership, the dynamics of teams, and the relationship between a team and the individuals that compose the team. He shows how an inclusive approach is essential to effective decision making. Using these insights, he then details the essential parts of the program management approach, describing the best way to define, organize, and schedule the work to be done, identifying risks and controlling costs during the whole process. This is a uniquely insightful and practical text that will be invaluable reading for all professionals involved in the dynamic field of project and program management.

Planning Cities in Africa Genet Alem Gebregiorgis,Stefan Greiving,Ally Hassan Namangaya,Wilbard Jackson Kombe,2022-08-18 This open access book provides insights into challenges, threats and opportunities of urban development in Africa. It discusses how and why African cities need localised urban planning concepts and theories to deal with challenges and threats of rapid urbanisation and climate change. The book delivers an in-depth view of the nature and gaps of the framework on which current planning practice and education in Africa are based. With that, it discusses the potentials of African cities to mobilise local knowledge, resources and capacity building for sustained and resilient urban growth. This work is addressed to educationists and practitioners in the field of urban development management, climate change adaptation and urban resilience. Specifically, such audiences include researchers, spatial planners, graduate students and member of civil societies working on urban development management.
