Small Bodies Of The Solar System: A Guided Tour For Non-scientists Hans Rickman,2021-08-18 Amongst the famous planetary inhabitants of our solar system there is an entire ecosystem of smaller, less recognised bodies in the form of comets and 'minor' planets. These native residents, derived from the building blocks of planets, contain valuable information. By studying them in detail, we may learn about the processes that occurred from the Sun's birth to the emergence of the solar system as we know it today.Small Bodies of the Solar System paints a detailed picture of the space missions, laboratory experiments and computer experiments behind our current understanding of the comets, minor planets, meteors and meteorites. With a rich selection of pictures, this book combines personal reflection and poetic imagery with a mathematical and physical overview to introduce the reader to these small wonders of our universe.

Empowering Teachers through Environmental and Sustainability Education Melissa Barnes, Deborah Moore, Sylvia Christine Almeida, 2021-05-23 Empowering Teachers through Environmental and Sustainability Education draws inspiration from an empirical study exploring early career teachers' attempts at enacting Environmental and Sustainability Education (ESE) in their everyday teaching practices. It showcases how a confluence of personal, professional and environmental identities supports implementation of ESE. Additionally, this book discusses key concepts and issues surrounding ESE and the ways in which teachers may claim agency and power to create change in their classroom practices. Drawing from theoretical perspectives, such as Bourdieu's 'thinking tools' habitus and capital, theories of identity, and Foucault's concept of power and knowledge relations, this book explores how teachers negotiate policies, curriculum and institutional norms to further theoretical and practical understanding of ESE. The use of personal narratives offers new insights into teachers' agency in creating localised yet powerful change through small and meaningful actions. The purpose of this book, therefore, is to explore ways in which meaningful change can be made in educational settings through these small agentive and yet empowering steps. This book reveals that teachers can enact agency and navigate the power structures that exist within educational settings in order to make ESE meaningful within their classrooms.

Tales of the Grand Tour Ben Bova, 2007-04-01 New tales of humanity's near-future exploration of the Solar System, from a science fiction master and award-winning author Ben Bova In novels like Mars and Moonbase, and Venus, Jupiter, and Saturn, as well as Privateers, The Precipice, and The Rock Rats, Ben Bova has been telling the stories of the wars and rivalries, the outsize individuals, public crusades, and private passions that will drive us as we expand into the Solar System and make use of its vast resources. And throughout, Bova has shown our cosmic neighborhood as we know it to be, giving us a sense of Venus and Jupiter and the Asteroid Belt and Mars that's as up-to-date as the latest observations. For the last two decades have been a golden age of near-Earth astronomy and observation, and in his novels Bova has made dramatic use of our newest knowledge. But during that time Bova has also written short fiction about some of the same events and characters---Sam Gunn, Martin Humphries, Klaus Fuchs, Dan Randolph, the Asteroid Wars. Now, in Tales of the Grand Tour, those stories are collected in book form for the first time, creating a volume that is a landmark of modern SF. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Sun and the Moon Matthew Goodman, 2010-05 On August 26, 1835, a fledgling newspaper called theSunbrought to New York the first accounts of remarkable lunar discoveries. A series of six articles reported the existence of life on the moon—including unicorns, beavers that walked on their hind legs, and four-foot-tall flying man-bats. In a matter of weeks it was the most broadly circulated newspaper story of the era, and theSun, a working-class upstart, became the most widely read paper in the world. An exhilarating narrative history of a divided city on the cusp of greatness, and tale of a crew of writers, editors, and charlatans who stumbled on a new kind of journalism, The Sun and the Moon tells the surprisingly true story of the penny papers that made America a nation of newspaper readers.

The book focuses on the elusive “sustainable corporation” and is designed for an upper-level course sequenced after the basic Corporations course. Features of this Edition: Unlike many law texts, the book is meant to be absorbed in a sequential swoop as the concepts build on each other. The book, developed over the course of 10 years, has been used by law students, MBA students, graduate sustainability students, even undergraduate students – in both the US and Europe. The book can be used in a concentrated four-week course, an eight-week course, or a typical 14-week course. The book is meant to take professors and students on a journey from point A to point Z. It begins with a fresh look at U.S. corporate law, then moves to consider the US corporation's unsustainable design, next describes the movement toward a focus on the Triple Bottom Line, then turns to proposals to redesign the corporation's legal DNA, and finally offers a fundamental rethinking of the corporation. Professors and students will benefit from: The book's main feature is its sequential design: (1)

basics of US corporate law; (2) the corporation’s unsustainable design; (3) the Triple Bottom Line (ESG) movement; (4) proposals to redesign the corporation; (5) a deep rethinking of the corporation. Each chapter begins with a chapter overview, includes heavily edited readings from a variety of sources, features regular explanatory “break-out boxes, and offers end-of-chapter concluding thoughts (essays, poems, stories, fables, riddles). The book has its own website that includes the following materials for use by students (also available in Casebook Connect): online lectures, recommended videos (TED talks, interviews, documentaries, etc.), suggested YouTube music videos (from Hendrix Star-Spangled Banner to Dolly Parton Working Nine to Five), student research papers.
