The Other End of the Leash Patricia McConnell, Ph.D.,2009-02-19 Learn to communicate with your dog—using their language "Good reading for dog lovers and an immensely useful manual for dog owners."—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how "man's best friend" might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to "get dominance" over your dog can cause problems • Why "rough and tumble primate play" can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than "alpha wanna-bes!" Fascinating, insightful, and compelling, The Other End of the Leash is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Cracking the Curiosity Code Diane Hamilton,2019-01-28 Everyone is born curious. So, what happens? Why do some people become less curious than others? For individuals, leaders, and companies to be successful, they must determine the things that hold curiosity hostage. Think of the most innovative companies and you will notice they employ people who do not accept the status quo, they aren't reluctant to change, they evolve with the times, they look for problems to solve, and focus on asking questions. Drawing on decades research and incorporating interviews from some of the top leaders of our time, Hamilton examines the factors that impact curiosity including fear, assumptions, technology, and environment (FATE). Through her ground-breaking research, she has created the Curiosity Code Index (CCI) assessment to determine how these factors have impacted curiosity and to provide an action plan to transform individuals and organizations to help improve areas impacted by curiosity, including innovation, engagement, creativity, and productivity. "I have no special talents. I am only passionately curious" – Albert Einstein

Liber Amicorum Samir Saleh Nassib G. Ziadé,2019-11-29 Liber Amicorum Samir Saleh Reflections on Dispute Resolution with Particular Emphasis on the Arab World Edited by Nassib G. Ziadé This welcome volume upturns the widespread perception that the Islamic and Arab worlds fail to conform to today's internationalized approach to dispute resolution. With contributions from nineteen eminent authors – judges, arbitrators, academics, practicing lawyers, representatives of international arbitral institutions – this collection of essays and analyses manifests the salutary worldwide influence of Arab law and its intersection with the common law and civil law traditions. Conceived to honor Mr. Samir Saleh, one of the leading scholars and international lawyers in the Arab world, the book offers work in English and French that focuses on the fields of law to which Mr. Saleh has made his most significant contributions, namely, arbitration and mediation in different types of international disputes. Among the issues and topics covered are the following: the position of Islamic and Middle Eastern law on alternative dispute resolution; dichotomy between confidentiality and enforcement; Shari'a applicable to the merits in international commercial arbitration; oil and gas agreements; State submission to arbitration in the Arab world; the role of arbitral institutions in the Middle East and North Africa; and interaction between public and private law concepts and practices. The authors highlight the ongoing challenges and outlook for dispute resolution in the region, discussing case law, evolving legislation, and changes in the practice of international arbitration and mediation in several Arab countries. Mr. Saleh's work in strengthening international law while bridging the legal and cultural divides between the Arab region and the rest of the world will undoubtedly continue to inspire

generations to come. Given recent developments in Arab and Islamic law and the resulting focus on Arab scholarship and jurisprudence, along with Mr. Saleh's unparalleled influence on dispute resolution in the Arab world and beyond, the wide-ranging expertise revealed in this Liber Amicorum is sure to be of great practical value to international law practitioners and law firms, alternative dispute resolution scholars, and arbitral institutions worldwide.

Finding Fernanda Erin Siegal,2012-05-15 A compelling, dramatic narrative of how an American housewife discovered that the Guatemalan child she was about to adopt had been stolen from her birth mother, shedding light on the alarming and growing problem of international adoption fraud. Over the past five years, over 100,000 children were adopted into the United States, 20,000 of whom came from Guatemala. Finding Fernanda, a dramatic true story paired with investigative reporting, tells the side-by-side tales of an American housewife who adopts a two-year-old girl from Guatemala and the birth mother whose two children were stolen from her. Each woman gradually comes to realize her role in what was one of Guatemala's most profitable black-market industries: the buying and selling of children for international adoption. Finding Fernanda is an overdue, unprecedented look at adoption corruption--and a poignant, riveting human story about the power of hope, faith, and determination.

Design Materials and Making for Social Change Rebecca Earley,Rosie Hornbuckle,2023-06-01 Design Materials and Making for Social Change spans the two interconnected worlds of the material and the social, at different scales and in different contexts, and explores the value of the knowledge, skills and methods that emerge when design researchers work directly with materials and hold making central to their practice. Through the social entanglements of addressing material impacts, the contributors to this edited volume examine homelessness, diaspora, migration, the erosion of craft skills and communities, dignity in work and family life, the impacts of colonialism, climate crisis, education, mental health and the shifting complexities in collaborating with and across diverse disciplines and stakeholders. This book celebrates the role of materials and making in design research by demonstrating the diverse and complex interplay between disciplines and the cultures it enables, when in search of alternative futures. Design Materials and Making for Social Change will be of interest to scholars in materials design, textile design, product design, fashion design, maker culture, systemic design, social design, design for sustainability and circular design.

Mermaid Kenzie Charlotte Watson Sherman,2022-01-18 Kenzie turns her fierce love for the ocean into action, resourcefully cleaning up the beach after her mermaid-tail swimsuit tangles in floating plastic bags. When Kenzie slips on her mermaid tail, she becomes Mermaid Kenzie, protector of the deeps. One day as Kenzie snorkels around a shipwreck, she discovers more plastic bags than fish. Grabbing her spear and mermaid net, she begins to clean up the water and the shore--inspiring other kids to help. Beautifully written in African American Vernacular English, this poetic picture book includes back matter with information about how plastic winds up in our oceans and examples of people--some of them kids, like Kenzie--who have worked to protect the sea. Mermaid Kenzie celebrates the ways that all of us, no matter how small, can make a difference.

The Patent-Competition Interface in Developing Countries Thomas K. Cheng,2022-01-15 This book proposes an approach to the patent-competition interface for developing countries. It puts forward a theoretical framework after canvassing relevant policy considerations and examines the many reasons why patent protection is not essential for generating innovation incentives in developing countries. These include the tendency of the patent system to overcompensate innovators, the availability of other appropriation mechanisms for innovators to monetize their innovations, and the lack of appropriate technological capacity in many developing countries to take advantage of the incentives generated by the patent system. It also argues that developing countries with a small population need not pay heed to the impact of their patent system on the incentives of foreign innovators. It then proposes a classification of developing countries into production countries, technology adaptation countries, and proto-innovation countries and argues that dynamic efficiency considerations take on different meanings for developing countries depending on their technological capacities. For the vast majority of developing countries bereft of meaningful innovation capacity, foreign technology transfer is the main vehicle for technological progress. The chief dynamic policy consideration for these countries is hence incentives for technology transfer instead of innovation incentives. There are three main means of voluntary technology transfer: importation of technological goods, foreign direct investment, and technology licensing. Competition law regulation of patent exploitation practices interacts with these three means of technology transfer in different ways and an appropriate approach to the patent-competition interface for these countries needs to take these into account. Distilling all these considerations, the book proposes a development stage-specific approach to the patent-competition interface for developing countries. The approach is then applied to a number of patent exploitation practices, including unilateral refusal to deal, patent tying, excessive pricing for pharmaceuticals, reverse payment settlements, and restrictive licensing practices.
