Epidemiology for Canadian Students, 3rd Ed. Scott Patten,2021-05-24 An introduction to the principles and methods of epidemiology in a Canadian context The third edition of *Epidemiology for Canadian Students* updates the only introductory epidemiology textbook grounded in Canadian research and studies, and it takes into account the COVID-19 pandemic. Through this resource, students will learn core concepts, while also familiarizing themselves with Canadian registries, special-purpose cohorts, provincial health administrators, national statistical agencies and other sources that inform epidemiologic research in Canada. The third edition includes new links to Statistics Canada resources, updated examples with reference to recent Canadian and international literature on topics such as COVID-19, and expanded coverage of causal diagrams. Topics include: - Basic principles and why epidemiological reasoning matters for health professionals - Key parameters in descriptive and analytical epidemiology - Sources of error in epidemiology and ways to

quantify and control error - The concept of bias, which is introduced with basic parameter estimates to make it more accessible to students - Key study designs and their vulnerability to error - How to use critical appraisal and causal judgement to evaluate epidemiological studies

Canadian Energy Efficiency Outlook Pierre

Langlois,Genevieve Gauthier,2020-11-26 Energy Efficiency (EE) has been recognized since the early 1970s as the most relevant mechanism to optimize the way we meet our energy needs. The rationale behind this book is to present where the Canadian EE sector stands today to all Canadian stakeholders and those interested around the world. The Canada Energy Efficiency Outlook aims to outline the different environments that support EE development in our highly diversified provinces and territories, as well as at the national level, and consequently allow the reader to better understand the complexities involved. More globally, this book serves as an important reference for all interested parties on how Canada has variably innovated and developed mechanisms to achieve the goal of making this country more energy efficient.
