Traveling Different Dawn M. Barclay,2022-08-15 The award-winning travel bible for parents of children with autism spectrum disorder and/or mood and distraction disorders, offering helpful tips to soothe any child's travel anxieties. Traveling with children is always challenging, but for parents of children with autism spectrum disorder and/or mood and attention and distraction disorders it can be especially intimidating. How should parents of children experiencing meltdowns deal with clueless and judgmental onlookers? What are the best methods to alleviate motion sickness when your child might already be on a cocktail of drugs? *Traveling Different: Vacation Strategies for Parents of the Anxious, the Inflexible, and the Neurodiverse* answers these and many other questions parents may have when traveling with their children. Dawn M. Barclay

presents travel strategies and anecdotes from Certified Autism Travel Professionals™, parents of special needs children, associations and advocates, and mental health professionals, broken down by mode of transportation and type of venue. The heart of the book outlines suggested itineraries for spectrum families as well as venues—such as museums—that cater to the unique special interests that are characteristic of individuals with autism. Less common accommodations such as dude ranches and houseboats are also included, as are vacations involving sports that might not immediately be associated with ASD, such as diving, skiing, and golf. The book culminates with a resource guide of travel agents who specialize in special needs travel—as well as where to find other experts—and lists of organizations that advocate for special needs families. Noted mental health professionals offer advice throughout the book and organizations that support the needs of this community are profiled and included in the resources. Travel brings the world together and now, thanks to a growing focus on the needs of those with special needs, it is more accessible than ever before. This work is an essential part of that effort, a resource designed to make the cultural, educational, and bonding benefits of vacations available to all.

Safety Essentials for Business and Leisure Travel David Birkett, Kay Danes, 2021-04-26 At this moment in time, when the world is only just beginning to recover from the global impact of the COVID-19 pandemic, the research in this book makes for essential reading. It will serve to help re-establish confidence and reduce anxiety in business and leisure travellers who are planning to embark on new travel experiences in a world impacted by longer-lasting armed conflicts, increased global violence, and higher frequencies of natural disasters. This book blends in-depth

academic research around global risk mitigation with unique perspectives on business and leisure travel safety, narrated by authors who have extensive knowledge of security and risk mitigation systems. Each page contains easy-to-follow advice for domestic and international travel, but differs from other books, in that it addresses the 'hard' issues of travel safety (such as theoretical research around risk mitigation), in lieu of setting the focus solely on the 'soft' issues (like itinerary planning) which tend to be the focus of many travel publications today. Moreover, unique to this book is an extreme travel section adapted to business and leisure travellers, which makes for compelling reading and deals with kidnapping, risk mitigation and contingency planning. It incorporates the real-life experiences of one of the authors, who survived torture and abduction, and whose experiences now inform pre-deployment training for Australian Defence Force personnel for operations in armed conflict. This book blends the female and male voice into a narrative that combines the perspectives of professional security experts with common sense travel advice. The research that has gone into this book is essential reading for anyone who intends to embark on business or leisure travel, either in their own country or overseas, or who is interested in studying travel from an academic viewpoint.

Intelligent Systems and Applications Yaxin Bi,Rahul Bhatia,Supriya Kapoor,2019-08-23 The book presents a remarkable collection of chapters covering a wide range of topics in the areas of intelligent systems and artificial intelligence, and their real-world applications. It gathers the proceedings of the Intelligent Systems Conference 2019, which attracted a total of 546 submissions from pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer-review process, after which 190 were selected for inclusion in these proceedings. As intelligent systems continue to replace and sometimes outperform human intelligence in decision-making processes, they have made it possible to tackle a host of problems more effectively. This book collects both theory and application based chapters on

virtually all aspects of artificial intelligence; presenting state-of-the-art intelligent methods and techniques for solving real-world problems, along with a vision for future research, it represents a unique and valuable asset.

Travel Connections Jennie Germann Molz, 2012-08-06

Living in a world that is increasingly 'on the move' means that many of us now rely on mobile devices, social media, and networking technologies to coordinate togetherness with our social networks even when we are apart. Nowhere is this phenomenon more evident than in the emerging practices of 'interactive travel'. Today's travellers are more

likely than ever to pack a laptop or a mobile phone and to use these devices to stay in touch with friends and family members – as well as to connect with strangers and other travellers – while they are on the road. New practices such as location-aware navigating, travel blogging, flashpacking and Couchsurfing now shape the way travellers engage with each other, with their social networks, and with the world around them. *Travel Connections* prompts a rethinking of the key paradigms in tourism studies in the digital age. Interactive travel calls into question longstanding tourism concepts such as landscape, the tourist gaze, hospitality, authenticity and escape. The book proposes a range of new concepts to describe the way tourists inhabit the world and engage with their social networks in the twenty-first century: smart tourism, the mediated gaze, mobile conviviality, re-enchantment and embrace. Based on intensive fieldwork with interactive travellers, *Travel Connections* offers a detailed account of this emerging phenomenon and uncovers the new forms of mediated and face-to-face togetherness that become possible in a mobile world. This book will be of interest to students and scholars of sociology, tourism and hospitality, new media, cosmopolitanism studies, mobility studies and cultural studies.

Handbook of Technology Application in Tourism in Asia Azizul Hassan, 2022-07-09 It is an undisputed reality that the tourism industry in Asia is getting exposed to more innovative technologies than ever before. This proposed book provides the latest research in the application of innovative technology to the tourism industry, covering the perspectives, innovativeness, theories, issues, complexities, opportunities and challenges. This book, a blend of comprehensive and extensive effort by the contributors and editors, is designed to cover the application and practice of technology in tourism, including the relevant niches. This book focuses on the importance of technology in tourism. This also highlights, in a comprehensive manner, specific technologies that are impacting the tourism industry in Asia, as well as the constraints the industry is facing. The contents of this book deal with distinct topics, such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps, mobility, accessibility and so on. A good number of research studies have conducted outlining the contributions and importance of technologies in tourism, in

general. However, the tourism industry of Asia so far has attracted very few researchers. Some contributions have been made but not sufficient. Considering the ongoing trend of technology application in the tourism industry in Asia, very few research attempts have been made aiming to explore diverse aspects. Tourism is expanding enormously across the world. which actually creates more demands for effective technologies. This book will be a reading companion, especially for tourism students in higher academic institutions. This book will also be read by the relevant policy planners and industry professionals. Apart from them, this book will be appreciated by expatriate researchers and researchers having keen interest in the Asian tourism industry.

Tourists and Tourism Sharon Bohn Gmelch,Adam Kaul,2018-01-29 Like earlier editions, the Third Edition of **Tourists and Tourism** is organized for use in the classroom. While several classic and popular articles from the second edition have been retained, three-quarters are new and cover important areas in tourism studies such as dark tourism, medical tourism, nonvisual sensory experiences of tourism, and tourism as performance. Several address issues that directly relate to the student experience, including study abroad, service learning, social media, and the ethics of travel. Articles vary in length and style; some provide deeper context, while others are designed to spark debate in the classroom. Finally, an introduction to the use of film in teaching about tourism and a link to an important film resource are provided.

Effective Leadership in Adventure Programming

Simon Priest, Michael Gass, 2018-10-30 Some books address outdoor leadership; others focus on adventure programming. None delve into the specifics of both topics like *Effective Leadership in Adventure Programming*, Third Edition, does. The first edition of this book helped define the body of knowledge for an emerging profession. Two editions later, this groundbreaking text—now in full color—provides adventure leaders with the tools and evidence they need to show that their outdoor programs are effective and have a lasting impact on their participants. Internationally renowned authors Simon Priest and Michael Gass have significantly updated the content, based on the latest research, issues, and trends in the field of adventure education and leadership. They have reorganized chapters to conform to their new model of building core competencies. In addition, this third edition includes the following features:

- Material on technology, social justice, cultural adaptation, sustainability, and facilitation techniques
- An online instructor guide that offers activities, discussion questions, and assessments compiled from a group of acclaimed instructors
- A digital field handbook that offers quick reference to key models, concepts, and checklists covered in the text
- An expanded version of global perspectives, valuable for long-standing programs as well as those just beginning to enter the field

Effective Leadership in Adventure Programming details both the art and science of adventure leadership, helping a new generation of outdoor leaders develop their skills. The text extends the focus on evidence-based models, theories, and best practices, showing that science and research are as important to the profession as the natural beauty of the

environment. The book describes the core competencies of outdoor leadership, providing a framework that helps leaders connect with participants in meaningful ways, based on mutual goals. The focus on the science side is invaluable to new leaders and less-experienced leaders, and it is a great refresher for leaders with more experience. This new edition offers a more detailed look at diversity and cultural competencies, preparing leaders to effectively manage diverse populations of participants. In addition, the content is in line with the updated accreditation standards from the Association for Experiential Education. The opening chapters of *Effective Leadership in Adventure Programming* supply a solid foundation in the research, philosophy, ethics, and history of outdoor leadership. Numerous chapters explore the skills leaders need, with topics that include technical activity, safety and risk management, environment, organization, instruction, and facilitation. The authors also examine leadership styles and conditional leadership issues, communication, sound judgment, decision making, problem solving, and the trends and issues in adventure programming. *Effective Leadership in Adventure Programming* will help readers understand the four adventure program areas—recreation, education, development, and therapy—and how they influence the delivery of outdoor leadership. The book is a valuable resource for the training and education of future outdoor leaders. It will help readers know why they should work in the profession and understand how they can make a difference by being an effective outdoor leader.
