**Generation Deluxe** Iris Nowell, 2004-06-28 Iris Nowell identifies a worldwide class of multi-millionaires and billionaires emerging from the early 1990s - Generation Deluxe. Dot-com survivors, self-made entrepreneurs, celebrities, athletes, financiers, real estate moguls, media titans - their wealth starts at \$100 million and ascends to the stratospheric affluence of Bill Gates, at \$46 billion. The super-rich will spend \$50 and \$100 million just to build a house, and similar amounts for private jets, boats, and fleets of vehicles. The small change goes for a \$25,000 wedding cake, a \$1.2 million watch, a \$33,000 night in a Geneva hotel. Iris Nowell's exploration of consumerism reveals that lavish living imposes huge costs on the environment and endangers many forms of life. To clean up the damage, increasing numbers of the new super-rich, along with old-money inheritors, are redirecting their philanthropy to fund environmental protections - and, as never before, are helping to alleviate the global problems of poverty, hunger, illiteracy, and disease.

Legalities of GPS and Cell Phone Surveillance Emily M. Johnson, 2012 As technology continues to advance, what was once thought novel, even a luxury, quickly becomes commonplace, even a necessity. Global Positioning System (GPS) technology is one such example. Generally, GPS is a satellite-based technology that discloses the location of a given object. This technology is used in automobiles and cell phones to provide individual drivers with directional assistance. Just as individuals are finding increasing applications for GPS technology, state and federal governments are as well. State and federal law enforcement use various forms of GPS technology to obtain evidence in criminal investigations. For example, federal prosecutors have used information from cellular phone service providers that allows real-time tracking of the locations of customers' cellular phones. This book discusses the basics of GPS technology, society's reliance on it, and some of the related legal and privacy implications, with a focus on the legislative and judicial responses on both the federal and state levels.

Buddhist monk and private investigator Ten Norbu follows a trail of murder, drugs, and organ trafficking, he finds a familiar foe awaiting him. Keep current with the truth: we're only as weak as our secrets—especially the ones we keep from ourselves. —The Third Rule of Ten As the go-to private detective for a bevy of high-profile clients, our beloved ex-Buddhist monk, ex-LAPD officer Tenzing “Ten” Norbu has finally found his stride. With his beautiful pathologist girlfriend, a healthy bank account, and a steady stream of clients—courtesy of middle-aged movie star Mac Gannon and rising political star Bets McMurtry—Ten’s life is bursting with activity. But it’s not all joy and happiness. The death of his father and a growing abundance of secrets—both personal and professional—leave Ten feeling an unexpected depth of sorrow and confusion. Even with the emotional turmoil, nothing can stop Ten from taking the case when McMurtry’s housekeeper goes missing. The investigation leads him down a dangerous path littered with bodies, untraceable prescription drugs, and human organ trafficking. But nothing is as shocking as the realization that the mastermind behind it all is in fact a criminal who has slipped through Ten’s fingers once before. The Third Rule of Ten will have you on the edge of your seat, as you learn, along with Ten, that there is a fine line between healthy privacy and unhealthy secrecy. Knowing the difference may just determine whether Ten will stop his archenemy or lose himself.
