“If you abide in Me, and My words abide in you, you will ask what you desire, and it shall be done for you.” –John 15:7 There is no greater challenge, no greater call, no greater personal instruction than to read God’s Word and let it abide in your life—imprinting it on the pages of your heart and mind. Protein-lipid Interactions Anthony Watts, 1993
Protein-lipid interactions as a field of study is now a mature area, and this volume of New Comprehensive Biochemistry has been published with two objectives in mind. Firstly, to look to the

future, and try to envisage how the subject may develop in the near to medium future. Secondly, to present contrasting or complementary views on the same system. For example, the acetylcholine receptor is discussed from a predominantly structural aspect by Barrantes, and from the kinetic standpoint by Rankin, et al. The volume not only gives an update on specific aspects of the field, but also shows the way in which the phenomenon of protein-lipid interactions is now seemingly infiltrating many areas of biomembrane research, from recombinant DNA studies, protein insertion and assembly and reconstitution considerations to structural studies of membrane proteins.
