Standing on the Shoulders of Giants Wardiman Djojonegoro,2019-10-28 ÒIÕm happy to have been a part of history, however small my role was.Ó The words of Wardiman Djojonegoro reveal Indonesian history the way only a man who worked alongside Ali Sadikin, B. J. Habibie and Soeharto can. The modest 85-year-old, a former education minister and current foundation chairman at the Habibie Center, recalls the younger days of a Òbig villageÓ Jakarta and says it was the countryÕs third president who taught him the keys to national development. This is what Peter Zack, a reporter for the Jakarta Globe, wrote on 18 April 2009. In the present English translation of his 2014 memoir, *Standing on the Shoulders of Giants: Reminiscences of Working with Three Great Indonesians*, 1966Ð1998, Wardiman invites us to take a walk down memory lane and in so doing he tells us something about his life and career, as well as sharing his thoughts on a lifetime of public service under three great Indonesians. He also tells us about his secrets of how to age gracefully and his thoughts on the future of Indonesian education. The bookÕs core theme can be summed up in his reply to a high school student who asked him about the key to his lifetime success: ÒWherever you are placed, do your best!Ó

Bayu Satya to Save The Sea (English) Alberthiene Endah,2021-03-23 OSCT Indonesia is a company established in 2011 by Bayu Satya based on his concern about oil spill disasters in the seas. Before that, this entrepreneur from Palembang, South Sumatra, had been involved for decades in the world of manufacturing oil spill response equipment with the brand Slickbar Indonesia. The idea for establishing OSCT Indonesia was motivated by the reality that many companies are not able to buy, store, and operate oil spill response equipment in their operational headquarters. Even though, the risk of oil spill disasters is always lurking when not expected. An oil spill disaster in the seas creates a chain of terrible impacts that are so destructive. The environment is damaged, marine life is exposed to poisonous chemicals, and human health is also threatened because the fish have been contaminated with dangerous poisons. OSCT Indonesia in the period of almost a decade since it was established has undertaken a series of brilliant achievements in saving the seas from fierce oil spills. Their reputation in Indonesia and abroad can make everyone proud. This book is an interesting record which is brief yet complete about how this concern was born in Bayu Satya, how he began the struggle to build this industry in Indonesia, how he then has played many roles in the international scene, as well as all the twists and turns of this field.

ALEX FERGUSON My Autobiography Alex Ferguson,2013-10-24 Sir Alex Ferguson's compelling story is always honest and revealing he reflects on his managerial career that embraced unprecedented European success for Aberdeen and 26 triumphant seasons with Manchester United. Sir Alex Ferguson's best-selling autobiography has now been updated to offer reflections on events at Manchester United since his retirement as well as his teachings at the Harvard Business School, a night at the Oscars and a boat tour round the Hebrides, where he passed unrecognised. The extra material adds fresh insights and detail on his final years as United's manager. Both the psychology of management and the detail of football strategy at the top level can be complex matters but no-one has explained them in a more interesting and accessible way for the general reader than Sir Alex does here. MY AUTOBIOGRAPHY is revealing, endlessly entertaining and above all inspirational.

Protein-lipid Interactions Anthony Watts,1993 Protein-lipid interactions as a field of study is now a mature area, and this volume of New Comprehensive Biochemistry has been published with two objectives in mind. Firstly, to look to the future, and try to envisage how the subject may develop in the near to medium future. Secondly, to present contrasting or complementary views on the same system. For example, the acetylcholine receptor is discussed from a predominantly structural aspect by Barrantes, and from the kinetic standpoint by Rankin, et al. The volume not only gives an update on specific aspects of the field, but also shows the way in which the phenomenon of protein-lipid interactions is now seemingly infiltrating many areas of biomembrane research, from recombinant DNA studies, protein insertion and assembly and reconstitution considerations to structural studies of membrane proteins.
