Einstein Never Used Flash Cards Kathy Hirsh-Pasek, Roberta Michnick Golinkoff, Diane Eyer, 2004-08-12 Now Available in Paperback! In *Einstein Never Used Flashcards* highly credentialed child psychologists, Kathy Hirsh-Pasek, Ph.D., and Roberta Michnick Golinkoff, Ph.D., with Diane Eyer, Ph.D., offer a compelling indictment of the growing trend toward accelerated learning. It's a message that stressed-out parents are craving to hear: Letting tots learn through play is not only okay—it's better than drilling academics! Drawing on overwhelming scientific evidence from their own studies and the collective research results of child development experts, and addressing the key areas of development—math, reading, verbal communication, science, self-awareness, and social skills—the authors explain the process of learning from a child's point of view. They then offer parents 40 age-appropriate games for creative play. These simple, fun—yet powerful exercises work as well or better than expensive high-tech gadgets to teach a child what his ever-active, playful mind is craving to learn.

Meeting the Teaching and Learning Challenges in 21st Century Higher Education Tina Byrom, 2020-11-11 Universal design has traditionally focused on learning spaces—that is, the physical buildings and areas that support teaching and learning. This book takes a broad interpretation of this concept to include a specific focus on teaching and learning practice in higher education. It draws from the expertise of a range of professionals working in higher education across three countries (the UK, China and Malaysia), thus giving voice to rarely explored debates around teaching and learning, but also drawing from different cultural perspectives. The volume also explores challenges that arise when delivering higher education courses in the 21st century and possible solutions that attempt to address such challenges. As such, it has a practical focus that will appeal to HE practitioners who are keen to enhance their own practice and, as a consequence, student outcomes.

Handbook of Research on Acquiring 21st Century Literacy Skills Through Game-Based Learning Lane, Carol-Ann, 2022-01-07 Emerging technologies are becoming more prevalent in global classrooms. Traditional literacy pedagogies are shifting toward game-based pedagogy, addressing 21st century

learners. Therefore, within this context there remains a need to study strategies to engage learners in meaning-making with some element of virtual design. Technology supports the universal design learning framework because it can increase the access to meaningful engagement in learning and reduce barriers. The Handbook of Research on Acquiring 21st Century Literacy Skills Through Game-Based Learning provides theoretical frameworks and empirical research findings in digital technology and multimodal ways of acquiring literacy skills in the 21st century. This book gains a better understanding of how technology can support learner frameworks and highlights research on discovering new pedagogical boundaries by focusing on ways that the youth learn from digital sources such as video games. Covering topics such as elementary literacy learning, indigenous games, and student-worker training, this book is an essential resource for educators in K-12 and higher education, school administrators, academicians, pre-service teachers, game developers, researchers, and libraries.

Early Childhood Education in the 21st Century Hani Yulindrasari, Vina Adriany, Yeni Rahmawati, Fonny Demeaty Hutagalung, Sarita Gálvez, Ade Gafar Abdullah, 2019-09-24 Providing a selection of papers presented at ICECE 2018, a biennial conference organised by the Early Childhood Education Program, Universitas Pendidikan Indonesia. The conference's general theme was Finding Alternative Approaches, Theories, Frameworks, and Practices of Early Childhood Education in the 21th Century. Distinct from other periods of time, the 21st century is characterised by so much knowledge -easy to access but hard to grasp, borderless and hyper-connected society mediated by the internet, high competitiveness -not only within a country but across countries, high mobility, and widening economic discrepancy as neoliberalism has strengthened its influence on every sector of human life. The children of today will face many things that have not yet been invented or discovered, sometimes beyond expectations. Scholars and teachers of early childhood education need to be aware of these astonishing changes. The way children and childhood are seen cannot stay the same, and so does the way children of this century are educated. The conference opened a discussion about finding alternative approaches, theories, and best practices of early childhood education for a rapidly changing and globalised society.
