Censored 2012 Mickey Huff,Project Censored,2011-10-04 Every year since 1976, Project Censored, our nation's oldest news-monitoring group—a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips, and now under the leadership of Mickey Huff—has produced a Top-25 list of underreported news stories and a book, Censored, dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. Seven Stories Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length, alongside updates from the investigative reporters who broke the stories. Beyond the Top-25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and News Abuse, Censored Déjà Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, Censored is one of the strongest life signs of our current collective desire to get the news we citizens need—despite what Big Media tells us.

Film Censorship in America Jeremy Geltzer,2017-10-26 Since the first films played in nickelodeons, controversial movies have been cut or banned across the United States. Far from Hollywood, regional productions such as Oscar Micheaux's provocative race films and Nell Shipman's wildlife adventures were censored by men like Major M.L.C. Funkhouser, the terror of Chicago's cinemas, and Myrtelle Snell, the Alabama administrator who made the slogan Banned in Birmingham famous. Censorship continues today, with Utah's case against Deadpool (2016) pending in federal court and Robert Rodriguez's Machete Kills (2013) versus the Texas Film Commission. This authoritative state-by-state account covers the history of film censorship and the battle for free speech in America.

Ideology, Censorship and Translation Martin McLaughlin,Javier Muñoz-Basols,2021-04-29 This volume invites us to revisit ideology, censorship and translation by adopting a variety of perspectives. It presents case studies and theoretical analyses from different chronological periods and focuses on a variety of genres, themes and audiences. Focusing on issues that have thus far not been addressed in a sufficiently connected way and from a variety of disciplines, they analyse authentic translation work, procedures and strategies. The book considers the ethical and ideological implications for the translator, re-examines the role of the ideologist or the censor—as a stand-alone individual, as representative of a group, or as part of a larger apparatus—and establishes the translator's scope of action. The chapters presented here contribute new ideas that help to elucidate both the role of the translator throughout history, as well as current practices. Collectively, in demonstrating the role that ideology and censorship play in the act of translation, the authors help to establish a connection between the past and the present across different genres, cultural traditions and audiences. The chapters in this book were originally published as a special issue of Perspectives: Studies in Translation Theory and Practice.

Censorship in Czech and Hungarian Academic Publishing, 1969-89 Libora Oates-Indruchová,2020-05-14 How did writers convey ideas under the politically repressive conditions of state socialism? Did the perennial strategies to outwit the censors foster creativity or did unintentional self-censorship lead to the detriment of thought? Drawing on oral history and primary source material from the Editorial Board of the Czechoslovak Academy of Sciences and state science policy documents, Libora Oates-Indruchová explores to what extent scholarly publishing in state-socialist Czechoslovakia and Hungary was affected by censorship and how writers responded to intellectual un-freedom. Divided into four main parts looking at the institutional context of censorship, the full trajectory of a manuscript from idea to publication, the author and their relationship to the text and language, this book provides a fascinating insight into the ambivalent beneficial and detrimental effects of censorship on scholarly work from the Prague Spring of 1968 to the Velvet Revolution of 1989. Censorship in Czech and Hungarian Academic Publishing, 1969-89 also brings the historical censorship of state-socialism into the present, reflecting on the cultural significance of scholarly publishing in the light of current debates on the neoliberal academia and the future of the humanities.

The Statistical Analysis of Interval-censored Failure Time Data Jianguo Sun, 2007-05-26 This book collects and unifies statistical models and methods that have been proposed for analyzing interval-censored failure time data. It provides the first comprehensive coverage of the topic of interval-censored data and complements the books on right-censored data. The focus of the book is on nonparametric and semiparametric inferences, but it also describes parametric and imputation approaches. This book provides an up-to-date reference for people who are conducting research on the analysis of interval-censored failure time data as well as for those who need to analyze interval-censored data to answer substantive questions.

Negotiating Censorship in Modern Japan Rachael Hutchinson, 2013-08-21 Censorship in Japan has seen many changes over the last 150 years and each successive system of rule has possessed its own censorship laws, regulations, and methods of enforcement. Yet what has remained constant through these many upheavals has been the process of negotiation between censor and artist that can be seen across the cultural media of modern society. By exploring censorship in a number of different Japanese art forms – from popular music and kabuki performance through to fiction, poetry and film – across a range of historical periods, this book provides a striking picture of the pervasiveness and strength of Japanese censorship across a range of media; the similar tactics used by artists of different media to negotiate censorship boundaries; and how censors from different systems and time periods face many of the same problems and questions in their work. The essays in this collection highlight the complexities of the censorship process by investigating the responsibilities and choices of all four groups – artists, censors, audience and ideologues – in a wide range of case studies. The contributors shift the focus away from top-down suppression, towards the more complex negotiations involved in the many stages of an artistic work, all of which involve movement within boundaries, as well as testing of those boundaries, on the part of both artist and censor. Taken together, the essays in this book demonstrate that censorship at every stage involves an act of human judgment, in a context determined by political, economic and ideological factors. This book and its case studies provide a fascinating insight into the dynamics of censorship and how these operate on both people and texts. As such, it will be of great interest to students and scholars interested in Japanese studies, Japanese culture, society and history, and media studies more generally.

Survival Analysis with Interval-Censored Data Kris Bogaerts, Arnost Komarek, Emmanuel Lesaffre, 2017-11-20 Survival Analysis with Interval-Censored Data: A Practical Approach with Examples in R, SAS, and BUGS provides the reader with a practical introduction into the analysis of interval-censored survival times. Although many theoretical developments have appeared in the last fifty years, interval censoring is often ignored in practice. Many are unaware of the impact of inappropriately dealing with interval censoring. In addition, the necessary software is at times difficult to trace. This book fills in the gap between theory and practice. Features: -Provides an overview of frequentist as well as Bayesian methods. -Include a focus on practical aspects and applications. -Extensively illustrates the methods with examples using R, SAS, and BUGS. Full programs are available on a supplementary website. The authors: Kris Bogaerts is project manager at I-BioStat, KU Leuven. He received his PhD in science (statistics) at KU Leuven on the analysis of interval-censored data. He has gained expertise in a great variety of statistical topics with a focus on the design and analysis of clinical trials. Arnošt Komárek is associate professor of statistics at Charles University, Prague. His subject area of expertise covers mainly survival analysis with the emphasis on interval-censored data and classification based on longitudinal data. He is past chair of the Statistical Modelling Society and editor of Statistical Modelling: An International Journal. Emmanuel Lesaffre is professor of biostatistics at I-BioStat, KU Leuven. His research interests include Bayesian methods, longitudinal data analysis, statistical modelling, analysis of dental data, interval-censored data, misclassification issues, and clinical trials. He is the founding chair of the Statistical Modelling Society, past-president of the International Society for Clinical Biostatistics, and fellow of ISI and ASA.
