

Center For Strategic International

Peter Mattis,Matthew Brazil

CSIS. ,199? The Center for Strategic and International Studies (CSIS) is a public policy research institution dedicated to analysis and policy impact. CSIS is the only institution of its kind that maintains resident experts on all the world's major geographical regions. It also covers key functional areas, such as international finance, U.S. trade and economic policy, national and international security issues, energy, and telecommunications.

Strategic Studies ,1999

The Military Balance 2022 The International Institute for Strategic Studies (IISS),2022-02-14 Published each year since 1959, The Military Balance is an indispensable reference to the capabilities of armed forces across the globe. It is used by academia, the media, armed forces, the private sector and government. It is an open-source assessment of the military forces and equipment inventories of 171 countries, with accompanying defence economics and procurement data. Alongside detailed country data, The Military Balance assesses important defence issues, by region, as well as key global trends, such as in defence technology and equipment modernisation. This analysis is accompanied by full-colour graphics, including maps and illustrations. With extensive explanatory notes and reference information, The Military Balance is as straightforward to use as it is extensive. The 2022 edition is accompanied by a fullcolour wall chart illustrating security dynamics in the Arctic.

Europe's High-End Military Challenges Seth G. Jones,Rachel Ellehuus,Colin Wall,2022-02-02 This CSIS report from CSIS's International Security Program and Europe, Russia, and Eurasia program examines the evolution of European military capabilities over the next decade and the types of missions states will be able (and unable) to perform by 2030.

Global Strategic Developments The Emirates Center for Strategic Studies and Research,2012-06-19 The world today faces numerous challenges, including the ongoing fallout from the financial crisis and varied and diverse examples of violence and conflict across the globe. Combined with the many changes affecting both the regional and global balance of power – such as the apparent decline of the United States, the growing influence of the East, and the evolving role of international organizations – these challenges have led some to question how global power will be distributed in the coming two decades. All nations are exposed to the influences of international policy and ongoing developments in the world order. Understanding these developments, as well as the associated implications for international security and stability, enables national policy makers to identify and capitalize on strategic opportunities. A future strategic vision for the Gulf must encompass a range of issues, including internal, regional and global aspects. The states of the region must develop stronger domestic resilience by binding citizens to the state in a way that reduces its vulnerability to malign transnational forces. Gulf states will wish to further deepen their links to the countries of the East—particularly states such as South Korea, Japan, Australia, China and India, all of whom have different ways that

they can contribute to regional stability. They may also wish to be exporters rather than merely importers of security, contributing to international missions authorized by the UN and other international bodies. States that have this sense of international social responsibility become more vital to the global system as a whole. The GCC states will also wish to revive and increase the flexibility of their regional security apparatus, perhaps to engage Iran, Iraq and Yemen, and gain more control of immediate regional dynamics. Driving regional security in this way will partly insulate the GCC countries from the diplomatic initiatives of others that may not be consistent with GCC interests. Furthermore, the GCC states will seek to build stronger institutional links among themselves, deepening the co-operation and contacts between the civil servants of the member countries so that diplomacy between them is derived from disciplined organizational procedures. Just as each state has to develop its domestic resilience, so through institution-building should the GCC strengthen its corporate resilience. Overall the Gulf states need to develop an increasingly global outlook, even as they deal with internal challenges. They must find more ways to engage productively in the broader security dialogue of the region, with outside actors from Europe, North America and Asia. In the age of globalization, the states of the region need to be very mindful of the place good governance has in ensuring that the rest of international society is able to effectively engage with the Gulf states.

CSIS Commission on Smart Power CSIS Commission on Smart Power, Richard Lee Armitage, Joseph S. Nye, 2007

Elusive Balances Prashanth Parameswaran, 2022-01-13 This book undertakes an in-

depth examination of the dynamics of commitment in U.S.-Southeast Asia strategy. Drawing on cases including the U.S. withdrawal from Vietnam and Washington's pivot to Asia amid China's growing regional role, it constructs an original balance of commitment model to explain continuity and change in U.S.-Southeast Asia policy. Balance of commitment goes beyond balance of power approaches to explain how translating Southeast Asia's importance in U.S. thinking into actual commitments has proven challenging for policymakers as it requires simultaneously calibrating adjustments to power shifts, threat perceptions and resource extraction. The book applies the balance of commitment approach to several practical case studies, based on hundreds of conversations with policymakers and experts in the United States and Southeast Asia, personal experiences across nearly two decades and primary and secondary source material across a half-century. The findings suggest that the challenges of U.S. commitment to the region are rooted not simply in differences between administrations or divergences in outlook between Washington and regional capitals, but tough balancing acts for U.S. policymakers in domestic politics and wider foreign policy. As such, shaping U.S. strategy in Southeast Asia and calibrating and sustaining commitment requires not just appreciating Southeast Asia's significance, but committing to the region in ways that manage structural aspects of U.S. thinking, capabilities and resourcing.

U.S. Strategy in the Asian Century Abraham M. Denmark, 2020-08-18 As the Indo-Pacific emerges as the world's most strategically consequential region and competition with China intensifies, the United States must adapt its approach if it seeks to preserve its power and sustain regional stability and prosperity. Yet as China grows more powerful and

aggressive and the United States appears increasingly unreliable, the Indo-Pacific has become riven with uncertainty. These dynamics threaten to undermine the region's unprecedented peace and prosperity. U.S. Strategy in the Asian Century offers vital perspective on the future of power dynamics in the Indo-Pacific, focusing on the critical roles that American allies and partners can play. Abraham M. Denmark argues that these alliances and partnerships represent indispensable strategic assets for the United States. They will be necessary in any effort by Washington to compete with China, promote prosperity, and preserve a liberal order in the Indo-Pacific. Blending academic rigor and practical policy experience, Denmark analyzes the future of major-power competition in the region, with an eye toward American security interests. He details a pragmatic approach for the United States to harness the power of its allies and partners to ensure long-term regional stability and successfully navigate the complexities of the new era.

The CSIS Strengthening of America Commission CSIS Strengthening of America Commission, Sam Nunn, Pete Domenici, 1992-01-01 Although the United States has the largest economy in the world, it has vulnerabilities. The growth rate of productivity has slowed. The U.S. net national savings rate is at an all-time low. The nation's educational system is performing well below the best international levels. A disenchanted electorate views federal institutions with increasing cynicism and mistrust. The Strengthening of America Commission proposes a specific blueprint for action to get the nation's fiscal house in order that combines budget deficit reduction with the replacement of the current tax code by a progressive consumption-based tax. The commission recommends three principal initiatives to support a human resources investment strategy: a new system of

national standards at the secondary school level; expanded programs of training and apprenticeships for students who enter the work force directly after secondary school and expanded work force training programs; and a comprehensive effort to promote school readiness in young children. The commission also recommends that the government provide an economic environment that helps strengthen the U.S. industrial base. To help break the gridlock in government, the commission recommends structural reforms within the executive and legislative branches. (Appendixes include the following: meeting agendas; staff and working group lists; 128-item bibliography divided into sections concerning capital formation, fiscal policy, human resources, manufacturing and technology, and making Washington work; and separate opinions of commission members.) Chinese Communist Espionage Peter Mattis, Matthew Brazil, 2019-11-15 This is the first book of its kind to employ hundreds of Chinese sources to explain the history and current state of Chinese Communist intelligence operations. It profiles the leaders, top spies, and important operations in the history of China's espionage organs, and links to an extensive online glossary of Chinese language intelligence and security terms. Peter Mattis and Matthew Brazil present an unprecedented look into the murky world of Chinese espionage both past and present, enabling a better understanding of how pervasive and important its influence is, both in China and abroad.

Strategic Survey 1996-1997 International Institute for Strategic Studies, 1997

Strategic Survey 1996-1997 reviews and analyzes the key political, economic, and foreign-policy developments and trends of 1996 and the first quarter of 1997. Articles covering regional security, proliferation, and military conflict form an accessible commentary invaluable for interpreting world-wide strategic events.

The Digital Silk Road Jonathan E. Hillman, 2021-10-19 An expert on China's global infrastructure expansion provides an urgent look at the battle to connect and control tomorrow's networks. From the ocean floor to outer space, China's Digital Silk Road aims to wire the world and rewrite the global order. Taking readers on a journey inside China's surveillance state, rural America, and Africa's megacities, Jonathan Hillman reveals what China's expanding digital footprint looks like on the ground and explores the economic and strategic consequences of a future in which all routers lead to Beijing. If China becomes the world's chief network operator, it could reap a commercial and strategic windfall, including many advantages currently enjoyed by the United States. It could reshape global flows of data, finance, and communications to reflect its interests. It could possess an unrivaled understanding of market movements, the deliberations of foreign competitors, and the lives of countless individuals enmeshed in its networks. However, China's digital dominance is not yet assured. Beijing remains vulnerable in several key dimensions, the United States and its allies have an opportunity to offer better alternatives, and the rest of the world has a voice. But winning the battle for tomorrow's networks will require the United States to innovate and take greater risks in emerging markets. Networks create large winners, and this is a contest America cannot afford to lose.

Analysis of the FY 2022 Defense Budget Todd Harrison, Seamus P. Daniels, 2022-01-24

This CSIS report assesses the Biden administration's FY 2022 defense budget request. It outlines the priorities and potential effects of ongoing strategic reviews, tracks current congressional action on FY 2022 defense appropriations, and identifies key issues for FY 2023.

Strategic Japan Michael J. Green, Zack Cooper, 2014-11-06 Is Japan capable of grand strategy when it comes to foreign policy? Modern Japan faces challenges on every front: from a rising China and constrained economic growth at home, to an ever-present threat posed by an increasingly unstable North Korea, to an evolving and complex relationship with the West that for so long has served as the bedrock of Japanese foreign policy. Prime Minister Shinzo Abe has garnered significant attention for his policies undergirding a path of "proactive pacifism" for Japan, but many questions remain unanswered with regard to what Japan's global role ought to be, what it can be, and what that role's development would mean for the greater stability of the region and the fate of broader geopolitical alliances across the world. While it is clear that both Japan and its allies would be best served by a clear, comprehensive, and forward-thinking Japanese foreign policy blueprint, but actually developing and implementing such a policy is understandably easier said than done. Fortunately, shaping this new strategy is a generation of Japanese foreign policy experts with eyes toward the future of Japanese power and diplomacy. In *Strategic Japan: New Approaches to Foreign Policy and the U.S. Japan Alliance*, five preeminent scholars: Yasuhiro Matsuda, Tetsuo Kotani, Hiroyasu Akutsu, Yoshikazu Kobayashi, and Nobuhiro Aizawa discuss Japan's changing role in the world and the high stakes policy issues

affecting Japan, Asia, and the world today. Taken together, these experts' contributions highlight potential areas for enhanced cooperation between the United States and Japan at a time when the West desperately needs a confident and proactive Japan, and Japan needs sustained American engagement and deterrence in an Asia-Pacific region that will continue to be the site of economic growth and expansion for years to come.

Rethinking Chinese Politics Joseph Fewsmith, 2021-06-17 A comprehensive but accessible examination of how elite Chinese politics work covering the period from Deng Xiaoping to Xi Jinping.

The Long Game Rush Doshi, 2021-06-11 For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential strategies of displacement. Beginning in the 1980s, China focused for two decades on hiding capabilities and biding time. After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of actively accomplishing something. Finally, in the

aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase great changes unseen in century. After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.
