2020 Development Effectiveness Review Asian

Development Bank, 2021-04-01 This publication outlines the performance of the Asian Development Bank (ADB) in achieving the goals of Strategy 2030, the institution's long-term strategic framework. It is the 14th in the series of annual reports that tracks development progress in Asia and the Pacific, assesses ADB's development effectiveness, and identifies areas where the institution's performance needs to be strengthened.

Darknet J. D. Lasica, 2008-05-02 An indispensable primer for those who want to protect their digital rights from the dark forces of big media. -Kara Swisher, author of aol.com The first general interest book by a blogger edited collaboratively by his readers, *Darknet* reveals how Hollywood's fear of digital piracy is leading to escalating clashes between copyright holders and their customers, who love their TiVo digital video recorders, iPod music players, digital televisions, computers, and other cutting-edge devices. Drawing on unprecedented access to entertainment insiders, technology innovators, and digital provocateurs-including some who play on both sides of the war between digital pirates and entertainment conglomerates-the book shows how entertainment companies are threatening the fundamental freedoms of the digital age.

Hospital-Based Health Technology Assessment Laura Sampietro-Colom, Janet Martin, 2017-01-23 A timely work describing how localized hospital-based health technology assessment (HB-HTA) complements general, 'arms-length' HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is

intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care levels, which creates better bridges for knowledge translation through relevance and timeliness.

Health Care Technology and Its Assessment Henry David Banta, Bryan R. Luce, 1993 Since 1945, a broad array of health care technologies have come into use, including antibiotics, anti-hypertensive drugs, oral diuretics, oral contraceptives, psychopharmaceuticals, corticosteroids, vaccines, open-heart surgery, genetics screening, automated clinical laboratories, renal dialysis, and cardiac pacemakers. Unquestionably, these technologies have brought benefits to millions. However, as costs of health care have risen rapidly, governments have increasingly singled out expensive technology as the culprit. The result has been changes in the methods of paying for health care in most countries to

control cost rises. This has led to a slowing of technological change in some countries and increasing necessities to choose in all countries. This timely work describes how technology assessment critically evaluates the benefits, costs, and social implications of technology. The book presents an international perspective on health care technology's development and diffusion, and explains how health care technology can enlighten difficult choices faced by policy-makers, clinicians, and patients.

The Hanoverian Dimension in British History, 1714-1837

Brendan Simms,Torsten Riotte,2007-02-08 For more than 120 years (1714-1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

Maciunas' Learning Machines Astrit Schmidt-

Burkhardt,2011-06-29 The art of cross-linked thinking consists in facilitating dealing with complexity and admitting new insights. This approach, prevailing in all realms of knowledge, determines also the artistic praxis of Fluxus initiator George Maciunas. This book shows some hundred diagrams and maps related to history from antiquity to postmodernism; they serve to visualize artistic, political, and economic correlations. If it were up to Maciunas, there wouldn't be any real concept of the past without percepts. With his maps, diagrams, and tables, a big part of which is published for the first time, he tries to draw a picture of history in a different way. The result seems fascinating both on a scientific and artistic level. It opens insights into eye-opening correlations between dates and facts as well as makes appear completely novel forms of knowledge transfer.

Urban Regeneration in Europe Chris Couch,Charles

Fraser,Susan Percy,2008-04-15 This book provides a comparative account of the process of urban regeneration and examines the factors influencing these processes, as well as the consequences of their implementation. Through a mixture of theoretical discussion and a series of case studies a thorough examination is made of the extent to which these different European old industrial conurbations are facing similar problems.

Promises to Keep William W. Fisher, III,2004 During the past fifteen years, changes in technology have generated an extraordinary array of new ways in which music and movies can be produced and distributed. Both the creators and the consumers

of entertainment products stand to benefit enormously from the new systems. Sadly, we have failed thus far to avail ourselves of these opportunities. Instead, much energy has been devoted to interpreting or changing legal rules in hopes of defending older business models against the threats posed by the new technologies. These efforts to plug the multiplying holes in the legal dikes are failing and the entertainment industry has fallen into crisis. This provocative book chronicles how we got into this mess and presents three alternative proposals--each involving a combination of legal reforms and new business models--for how we could get out of it.

Sustainable food planning: evolving theory and practice

André Viljoen, Johannes S.C. Wiskerke, 2012-03-30 With over half the world's population now deemed to be urbanised, cities are assuming a larger role in political debates about the security and sustainability of the global food system. Hence, planning for sustainable food production and consumption is becoming an increasingly important issue for planners, policymakers, designers, farmers, suppliers, activists, business and scientists alike. The rapid growth of the food planning movement owes much to the fact that food, because of its unique, multi-functional character, helps to bring people together from all walks of life. In the wider contexts of global climate change, resource depletion, a burgeoning world population, competing food production systems and diet-related public health concerns, new paradigms for urban and regional planning capable of supporting sustainable and equitable food systems are urgently needed. This book addresses this urgent need. By working at a range of scales and with a variety of practical and theoretical models, this book reviews and elaborates definitions of sustainable food systems, and begins to define ways of achieving them. To this end 4 different themes

have been defined as entry-points into the discussion of 'sustainable food planning'. These are (1) urban agriculture, (2) integrating health, environment and society, (3) food in urban design and planning and (4) urban food governance.

Occupational Health Risk Assessment and Management

Steven Sadhra, Krishna Rampal, 1999-05-04 This is the first book to integrate all aspects of workplace risk assessment and management, now the overriding emphasis in occupational health. Topics include: basic concepts and developments; toxic hazards; hazard characteristics and identification; setting standards; requirements of monitoring workplace exposure; contaminants; exposure modeling; risk perception and management; prevention and control; economics; emergency response; health surveillance; auditing; compliance; pesticides, chemicals, carcinogens, biological agents, and radiation; equipment screening; manual handling; stress; and workplace violence.

The Meat Crisis Joyce D'Silva, John Webster, 2017-08-23 Meat and dairy production and consumption are in crisis. Globally, 70 billion farm animals are used for food production every year. It is well accepted that livestock production is a major contributor to greenhouse gas emissions. The Food and Agriculture Organization of the United Nations (FAO) predicts a rough doubling of meat and milk consumption in the first half of the 21st century, with particularly rapid growth occurring in the developing economies of Asia. What will this mean for the health and wellbeing of those animals, of the people who consume ever larger quantities of animal products, and for the health of the planet itself? The new edition of this powerful and challenging book explores the impacts of the global growth in the production and consumption of meat and dairy, including cultural and health factors, and the implications of the likely intensification of farming for both small-scale producers and for animals. Several chapters explore the related environmental issues, from resource use of water, cereals and soya, to the impact of livestock production on global warming

and issues concerning biodiversity, land use and the impacts of different farming systems on the environment. A final group of chapters addresses ethical and policy implications for the future of food and livestock production and consumption. Since the first edition, published in 2010, all chapters have been updated, three original chapters re-written and six new chapters added, with additional coverage of dietary effects of milk and meat, antibiotics in animal production, and the economic, political and ethical dimensions of meat consumption. The overall message is clearly that we must eat less meat to help secure a more sustainable and equitable world.
