Cereal Grain Quality R. Henry,P. Kettlewell,2012-12-06 Cereal uses range from human food and beverages to animal feeds and industrial products. It is human food and beverages which are the predominant uses covered in this book, since the nutritional quality of cereals for animal feed is described in other publications on animal nutrition, and industrial products are a relatively minor use of cereals. Cereals are the main components of human diets and are crucial to human survival. Three species, wheat, rice and maize, account for the bulk of human food. Barley is the major raw material for beer production and ranks fourth in world production. Other species such as sorghum are regionally important. This book covers all the major cereal species: wheat, rice, maize, barley, sorghum, millet, oats, rye and triticale. Specific chapters have been devoted to a description of the major end-uses of each of the species and to definition of the qualities required for each of their end uses. The functional and nutritional quality of cereals determines their suitability for specific purposes and may limit the quality of the end product, influencing greatly the commercial value of grain. An understanding of the factors that determine grain quality is thus important in the maintenance of efficient and sustainable agricultural and food production. The biochemical constituents of the grain that determine quality have been described in chapters on proteins, carbohydrates and other components. An understanding of the relationships between grain composition and quality is important in selecting grain for specific uses.

Engineering Aspects of Cereal and Cereal-Based Products Raquel de Pinho Ferreira Guine,Paula Maria dos Reis Correia,2013-07-15 Cereal food engineering has become increasingly important in the food industry over the years, as it plays a key role in developing new food products and improved manufacturing processes. *Engineering Aspects of Cereal and Cereal-Based Products* focuses on the recent growth in cereal technology and baked foods science, reviewing the latest updates in technological developments in agricultural cultivation and processing for cereal scientists, food engineers, and students. Cereals include a vast number of biochemical entities, very diverse in composition and properties, as well as technological abilities. The text discusses cereal production, which varies according to cultural practices, type of cereal, cultivar, and region. It also addresses transportation, storage, and cereal quality—important at every phase from harvest to production. Chapters cover technological operations such as wet and dry milling and extrusion, and they address particular processing operations that are subject to improvements, including bread and confectionary baking. The text also examines malting, rice processing, breakfast cereals, and pasta. In addition, it explores new trends in cereal-based products and the effects of processing on nutritional and functional properties of cereal products. This book discusses the basic elements of cereal technology, from production to transformation, including the most important processing operations in cereal technology, with emphasis on the engineering aspects.

The Chemistry of Cereal Proteins Radomir Lasztity,2017-07-12 In the past decade, since the first edition was published, the study of cereal protein chemistry has grown and changed. New separation techniques have been introduced while the application of achievements of molecular biology and genetic engineering of proteins has progressed dramatically. This new edition includes these advances and updates the chemistry of cereal

proteins for all specialists working in theory and practice of cereal grain production and processing.

Handbook of Cereal Science and Technology, Revised and Expanded Karel Kulp,2000-03-28 This thoroughly revised second edition addresses the full spectrum of cereal grain science, employing agronomic, chemical, and technological perspectives and providing new and expanded treatment of food enrichment techniques, nutritional standards, and product quality evaluation. Written by over 40 internationally respected authorities, the

Cereal Grains Sergio O. Serna-Saldivar,2012-02-16 Emphasizing the essential principles underlying the preparation of cereal-based products and demonstrating the roles of ingredients, *Cereal Grains: Laboratory Reference and Procedures Manual* is a practical laboratory manual complementing the author's text, *Cereal Grains: Properties, Processing, and Nutritional Attributes*. Organized so that readers progressively learn and apply the theoretical knowledge described in the parent book, the manual covers a range of essential topics, including: Main quality control measurements used to determine physical, morphological, chemical-nutritional, and sensory properties of cereal grains and their products Critical factors affecting grain stability throughout storage and analytical techniques related to insects and pests responsible for grain storage losses Physical and chemical tests to determine the quality of refined products Laboratory wet-milling procedures The most common laboratory methods to assess nixtamal, masa, and tortilla quality and shelf-life Yeast and chemical leavening agents important for bakery and other fermented products Laboratory and pilot plant procedures for the production of different types of yeast- and chemically-leavened bread, crackers, pasta products, breakfast cereals, and snack foods Protocols to bioenzymatically transform starch into modified starches, syrups, and sweeteners Laboratory processes for the production of regular and light beers, distilled spirits, and fuel ethanol By working through the contents of the book, readers acquire hands-on experience in many quality control procedures and experimental product development protocols of cereal-based products. From these foundations, they are certain to develop enhanced research skills for product development, process design, and ingredient functionality.

Developing Sustainable and Health-Promoting Cereals and Pseudocereals Marianna Rakszegi,Maria Papageorgiou,João Miguel Rocha,2023-03-27 *Developing Sustainable and Health Promoting Cereals and Pseudocereals: Conventional and Molecular Breeding* reviews the most recent developments in the fields of cereal and pseudocereal breeding, with particular emphasis on the latest biotechnological techniques likely to lead to breakthrough changes in plant breeding. The book provides comprehensive information on the use of genetic resources or pre-breeding activities to improve health-related properties of cereals and pseudocereals. The text also explores targeted field-management practices and the latest in biotechnological methodologies, and offers a cohesive overview necessary for understanding the potential impacts and benefits of improved production of cereals and pseudocereals with high-nutritional value. Includes coverage of cereals and pseudocereals in a single comprehensive volume Focuses on sustainable

circular economy, including assurance of food safety, quality, and health benefits Examines breeding to attain robust cereal and pseudocereals with higher nutritional value and adapted to specific regions, climate change, and global warming

Cereals and Cereal-Based Foods Megh R. Goyal,Kamaljit Kaur,Jaspreet Kaur,2021-07-30 This book volume sheds light on the health benefits of selected cereal grains, processing technologies of cereals, specific roles of bioactive compounds of cereals in chronic disease prevention, and traditional and latest technologies to improve the functional benefits of cereal-based products. It presents a thorough review of the functional components of some lesser known or forgotten cereals and their role in maintaining good health. With advancements in cereal science and technology, new methods of processing have emerged that help to preserve or even enhance the health-benefitting properties of cereal grains. Further, plant breeding and biotechnology have contributed greatly in improving nutritional quality and functionality of these grains. This book provides comprehensive information on the simple as well as advanced methodologies for enhancing the properties of cereals that benefit human health. Some new approaches such as bio-fortification and extraction of bioactives from cereals are also included in the text.

Lipids in Cereal Technology Gerard Meurant,2012-12-02 Lipids in Cereal Technology provides a comprehensive review of cereal lipids and their role in cereal processing and products. Topics range from acyl lipids and non-saponifiable lipids in cereals, such as barley and maize, to lipid metabolism in germinating cereals, physical state of lipids and their technical effects in baking, the effect of storage on the lipids and breadmaking properties of wheat flour, and lipids in pasta and pasta processing. Organized into 19 chapters, this review brings together the knowledge and experience of an international group of experts. It begins with an overview of the fundamental aspects of cereal grain lipids and enzymes. It then discusses the specific cereals, processing, and cereal products. Moreover, the book explains the composition and distribution of lipids in the grain, the biochemical changes that occur when the grain germinates, and the biochemistry of the enzymes involved in lipid degradation. Some chapters focus on wheat and the significance of lipids in milling, flour storage, baking, and pasta manufacture. Other chapters consider individual cereals such as rice, oats, maize, malt, and barley along with corn oil, wheat germ oil, and other cereal products.

Handbook on Drying, Milling and Production of Cereal Foods NIIR Board of Consultants & Engineers,2017-10-09 Cereals, or grains, are members of the grass family cultivated primarily for their starchy seeds (technically, dry fruits).Cereal grains are grown in greater quantities and provide more food energy worldwide than any other type of crop; they are therefore staple crops. Oats, barley, and some food products made from cereal grains. They are used for both human and animal food and as an industrial raw material. India produces cereals like wheat, rice, barley (jau), buckwheat, oats, corn (maize), rye, jowar (sorghum), pearl millet (bajra), millet (ragi), Sorghum, Triticale, etc. India is the world's second largest producer of Rice, Wheat and other cereals. The huge demand for cereals in the global market is creating an excellent environment for the export of Indian cereal products. India is not only the largest producer of cereal as well as largest exporter of cereal products in the world. India have been offering incredible opportunities as they have an abundant amount of raw materials and a wide availability of cheap labor. The book provides comprehensive coverage of the Drying, Milling and information regarding production method of Cereal Foods .It also covers Plant Layout, Process Flow Sheets and photographs of plant & Machinery with supplier's contact details. Some of the fundamentals of the book are origin of wheat classification of wheat, endeavors to find industrial uses for wheat, criteria of wheat quality, botanical criteria of quality, milling principles, extraction rate and its effect on flour composition, grain structure as affecting grinding, definition of flour extraction stone milling: yields of products, roller milling: flour extraction rates, rice production and utilization, origin of rice, comparison of rice with other cereal grains, composition of rice and cereal, breeding rice varieties with specific, industrial uses for rice and rice by products, caryopsis and composition of rice, gross structure of the rice caryopsis and its milling

fractions etc. This book is essential for those who are interested in cereal areas can find the complete information from manufacture to final uses of Cereal Foods. The present time is an era of information, one should know about what is happening in the world to be able to compete effectively. It will be very informative and useful to consultants, new entrepreneurs, startups, technocrats, research scholars, libraries and existing units.

Cereal Grains for the Food and Beverage Industries Elke K Arendt, Emanuele Zannini, 2013-04-09 Cereals are a staple of the human diet and have a significant effect on health. As a result, they are of major significance to the food industry. Cereal grains for the food and beverage industries provides a comprehensive overview of all of the important cereal and pseudo-cereal species, from their composition to their use in food products. The book reviews the major cereal species, starting with wheat and triticale before covering rye, barley and oats. It goes on to discuss other major species such as rice, maize, sorghum and millet, as well as pseudo-cereals such as buckwheat, quinoa and amaranth. Each chapter reviews grain structure, chemical composition (including carbohydrate and protein content), processing and applications in food and beverage products. Cereal grains for the food and beverage industries is an essential reference for academic researchers interested in the area of cereal grains and products. It is also an invaluable reference for professionals in the food and beverage industry working with cereal products, including ingredient manufacturers, food technologists, nutritionists, as well as policy-makers and health care professionals.
