Teaching and Learning English in East Asian Universities Lan Li,David D. Qian,2014-10-02 The 25 chapters contained in this book were all written by scholars working in the field of applied linguistics and English language teaching in various East Asian contexts. East Asia is large and diverse in terms of socio-economic, linguistic, and ethnic parameters. Statistics alone cannot give a clear understanding of what goes on in rural and urban universities and what challenges English language teachers and learners face in those contexts. To understand this wide gamut of issues in English language teaching in East Asia is thus a very large undertaking. The book addresses some of these issues, arranging its 25 chapters into five sections: namely, Assessing Language Performance; Teaching English Writing; Learner Autonomy; Corpus and Discourse Research; and Learning English in East Asian Contexts. Many of the chapters in this volume concern familiar topics such as linking assessment to teaching, learning and curriculum; conducting assessment validation research; examining meta-cognitive strategies; investigating teaching and learning English-for academic purposes; and profiling prevailing word lists for language learners. Other chapters are on novel or lesser known topics such as non-verbal delivery in speaking assessment; the use of visualization as a reading strategy; learner strategies in a Facebook corpus; effects of discourse signaling cues and rate of speech; and an ontogenetic analysis of college English textbooks. Collectively, these chapters showcase English language learning, teaching, and assessing in a range of contexts using a variety of methods and techniques to deal with issues relevant to East Asian teachers, learners and researchers.

Word Frequencies in Written and Spoken English Geoffrey N. Leech,Paul Rayson,Andrew Wilson,2001 Aimed at all language professionals, and those interested in how words are used, this reference work provides key information on how English is spoken and written today.

French Accelerator Language Learning,2020-11-22 My Story! This summer I started learning Dutch. I bought myself a flashcards starter, a picture dictionary and beginner's book. I have to admit that after two weeks of using them I gave them away for free to my friends and I let them suffer from that poor selection of language education. What was the reason for my decision? Well, I was starting from scratch. I knew nothing about the Dutch language. Products I bought, despite being for beginners were teaching me complete nonsenses. Across many flashcards, I immediately have thrown away there were words like hooked nose or city council. What is the use for them for such a beginner like me? I couldn't say a sentence but I was able to name all the body parts and seasons. What's the point? I decided to change that so I have created a list of words I need to memorize to be able to read and understand at least half of the text in my video game magazine. I only needed 50 most frequent words and some knowledge of English to figure out what's going on in the text. It took some time but by learning the right vocabulary I was able to understand half of the text instead of two sets of flashcards 500 words each. It was really a boost. Frequency study? There are many words that you use way more often than others, which makes them more valuable to know. Therefore the simplest way to make a progress in your target language is to learn the right vocabulary. How many words? 250 - enough to go on holidays 1000 - covers 85% of speech 3000 - 98% of the spoken language As you see the key is to learn the right words. What's Inside? I selected the most frequently used words to give you the basics you need to understand the language. There are more than 300 words grouped into categories. Some words are also used in example sentences to help you understand the context.

Research-Driven Pedagogy Nihat Polat,Tammy Gregersen,Peter D. MacIntyre,2019-10-10 Research-Driven Pedagogy: Implications of L2A Theory and Research for the Teaching of Language Skills brings together the essentials of second language acquisition (SLA) theory, research, and second language (L2) pedagogy. Uniquely, the design of this book helps researchers and practitioners make explicit connections between theory, research, and practice; learn about and conduct classroom research to contribute to the relevance and applicability of SLA research; and improve current L2 curriculum and instruction in light of current theory and research. The volume offers critical reviews of the most relevant, current SLA theory and research about receptive, productive, complementary, and nonverbal communication skills, as well as willingness to communicate (WTC). Each chapter is formatted to include five major topics about each language skill: (1) major theories, (2) critical reviews of salient/current research, (3) commonly-used data collection and analysis techniques, (4) summary of specific pedagogical implications of pertinent research and theory, and (5) theory and research-driven scenarios/activities that can be used in teaching. A teacher or a researcher can pick any chapter in this volume to learn about the most important language skills (e.g., reading, writing, nonverbal communication), while having all-in-one place access to almost everything they would need.

Essentials of Educational Psychology Jeanne Ellis Ormrod,2012 Unlike most educational psychology books, which take one theory at a time, explain its assumptions and principles and then identify implications for educational practice, Essentials of Educational Psychology focuses more on the commonalities than the differences among theories, because although researchers from different traditions have approached human cognition and behavior from many different angles, they sometimes arrive at more or less the same conclusions. This book integrates ideas from many theoretical perspectives into a set of principles and concrete strategies that psychology as a whole can offer you. See for Yourself exercises will help you discover more about yourself as a thinker and learner and also help you come to a deeper and more personal understanding of educational psychology's core ideas. Vocabulary and Language Teaching Ronald Carter,Michael Mccarthy,2014-06-06 The material in this book reviews work dating back to the vocabulary control movement in the 1930s and also refers to more recent work on the role of lexis in language learning. Two chapters describe the main foundations of lexical semantics and relevant research and pedagogical studies in vocabulary and lexicography; and a further chapter discusses recent advances in the field of lexis and discourse analysis. There is also a series of specially commissioned articles which investigate the structure and functions of the modern English lexicon in relation to its exploitation for classroom vocabulary teaching.

Orthography, Phonology, Morphology and Meaning R. Frost,Marian Katz,1992-10-20 The area of research on printed word recognition has been one of the most active in the field of experimental psychology for well over a decade. However, notwithstanding the energetic research effort and despite the fact that there are many points of

consensus, major controversies still exist. This volume is particularly concerned with the putative relationship between language and reading. It explores the ways by which orthography, phonology, morphology and meaning are interrelated in the reading process. Included are theoretical discussions as well as reviews of experimental evidence by leading researchers in the area of experimental reading studies. The book takes as its primary issue the question of the degree to which basic processes in reading reflect the structural characteristics of language such as phonology and morphology. It discusses how those characteristics can shape a language's orthography and affect the process of reading from word recognition to comprehension. Contributed by specialists, the broad-ranging mix of articles and papers not only gives a picture of current theory and data but a view of the directions in which this research area is vigorously moving.

<u>Critical CALL - Proceedings of the 2015 EUROCALL Conference, Padova, Italy</u> Francesca Helm,Linda Bradley,Marta Guarda,Sylvie Thouësny,2015-12-02 The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

Vocabulary in a Second Language Paul Bogaards,Batia Laufer-Dvorkin,2004-01-01 The eleven chapters of Vocabulary in a Second Language are written by the world's leading researchers in the field of vocabulary studies in second language acquisition. Each chapter presents experimental research leading to new conclusions about and insights into the selection, the learning and teaching, or the testing of vocabulary knowledge in foreign languages. This book is intended as an up-to-date overview of the important domain of the lexicon for researchers in the field of second language acquisition, teacher trainers and professional teachers of second or foreign languages.

<u>Vocabulary Acquisition</u> Paul Nation,1989

Fundamental Considerations in Language Testing Lyle F. Bachman,1990-06-14 Offers a discussion of the basic concerns which underlie the development and use of language tests. Presenting a synthesis of research on testing, this book is useful for students on teacher education courses. It is also helpful for those professionally involved in designing and administering tests, acting as a complement to 'how to' books.
