**Methods in Lignin Chemistry** Stephen Y. Lin,Carlton W. Dence,2012-12-06 An up-to-date compilation of the theoretical background and practical procedures involved in lignin characterization. Whenever possible, the procedures are presented in sufficient detail to enable the reader to perform the analysis solely by following the step-by-step description. The advantages and limitations of individual methods are discussed and, more importantly, illustrated by typical analytical data in comparison to results obtained from other methods. This handbook serves the need of researchers and other professionals in academia, the pulp and paper industry as well as allied industries. It is equally useful for those with no previous experience in lignin or lignocellulosics.

*Body, Capital, and Screens* Christian Bonah,Anja Laukötter,2020 Body, Capital and Screens: Visual Media and the Healthy Self in the 20th Century brings together new research from leading scholars from Europe and North America working at the intersection of film and media studies and social and cultural history of the body. The volume focuses on visual media in the twentieth century in Europe and the U.S. that informed and educated people about life and health as well as practices improving them. Through a series of in-depth case studies, the contributors to this volume investigate the relationships between film/television, private and public actors of the health sector and economic developments. The book explores the performative and interactive power of these visual media on individual health understandings, perceptions and practices. Body, Capital and Screens aims to better understand how bodily health has evolved as a form of capital throughout the century.

*Advances in Lactoferrin Research* Geneviève Spik,Dominique Legrand,Joël Mazurier,Jean-Paul Parraudin,2013-11-11 Following the two meetings on Lactoferrin Structure and Function that were held in Honolulu, Hawaii, in 1993 and 1995, the Third International Conference on Lactoferrin Structure and Function was held in Le Touquet, France, and has successfully reinforced and diversified the previously created bridges between biochemists, clinicians, and companies. In fact, scientists, physicians, and people of industry from different domains have brought a wealth of recent information concerning biochemistry and technical advances in the identification of lactoferrin-derived compounds as well as cell biology, molecular biology, pathology, and medical applications of lactoferrin and lactoferrin-derived compounds. We were so delighted with the rapid growth of knowledge concerning many biological and immunological functions of lactoferrins and the relationships between their structure and function, we wanted to share our pleasure with the readers interested in this field. The present book, which represents a review of some of the most exciting contributions, is intended to reflect the status of our knowledge and transmit our hopes for the future development of in vivo applications of natural and recombinant lactoferrins. We would like to express our gratitude to the sponsors who contributed to the organization of the meeting in such a pleasant place and allowed the participation of several young researchers. We would also like to thank all the participants who have answered with enthusiasm our invitation and to every one of the Laboratoire de Chimie Biologique for the constant and efficient help.

Nation, Language, and the Ethics of Translation Sandra Bermann,Michael Wood,2005-07-25 In recent years, scholarship on translation has moved well beyond the technicalities of converting one language into another and beyond conventional translation theory. With new technologies blurring distinctions between the original and its reproductions, and with globalization redefining national and cultural boundaries, translation is now emerging as a reformulated subject of lively, interdisciplinary debate. Nation, Language, and the Ethics of Translation enters the heart of this debate. It covers an exceptional range of topics, from simultaneous translation to legal theory, from the language of exile to the language of new nations, from the press to the cinema; and cultures and languages from contemporary Bengal to ancient Japan, from translations of Homer to the work of Don DeLillo. All twenty-two essays, by leading voices including Gayatri Spivak and the late Edward Said, are provocative and persuasive. The book's four sections--Translation as Medium and across Media, The Ethics of Translation, Translation and Difference, and Beyond the Nation--together provide a comprehensive view of current thinking on nationality and translation, one that will be widely consulted for years to come. The contributors are Jonathan E. Abel, Emily Apter, Sandra Bermann, Vilashini Cooppan, Stanley Corngold, David Damrosch, Robert Eaglestone, Stathis Gourgouris, Pierre Legrand, Jacques Lezra, Françoise Lionnet, Sylvia Molloy, Yopie Prins, Edward Said, Azade Seyhan, Gayatri Chakravorty Spivak, Henry Staten, Lawrence Venuti, Lynn Visson, Gauri Viswanathan, Samuel Weber, and Michael Wood.

Living Off Your Money Michael H. McClung,2016-09-17 It's common knowledge few people save enough for retirement. What's unfortunate is those who do, rarely invest it well during retirement. To a degree, this squanders what has been diligently saved. There are too many wrong answers and not enough right guidance for retirees, and it's difficult to discern which is which. The art and science to getting it right is explained in this book.

**Dressing Modern Frenchwomen** Mary Lynn Stewart,2020-03-03 At a glance, high fashion and feminism seem unlikely partners. Between the First and Second World Wars, however, these forces combined femininity and modernity to create the new, modern French woman. In this engaging study, Mary Lynn Stewart reveals the fashion industry as an integral part of women's transition into modernity. Analyzing what female columnists in fashion magazines and popular women novelists wrote about the new silhouette, Stewart shows how bourgeois women feminized the more severe, masculine images that elite designers promoted to create a hybrid form of modern that both emancipated women and celebrated their femininity. She delves into the intricacies of marketing the new clothes and the new image to middle-class women and examines the nuts and bolts of a changing industry—including textile production, relationships between suppliers and department stores, and privacy and intellectual property issues surrounding ready-to-wear couture designs. Dressing Modern Frenchwomen draws from thousands of magazine covers, advertisements, fashion columns, and features to uncover and untangle the fascinating relationships among the fashion industry, the development of modern marketing techniques, and the evolution of the modern woman as active, mobile, and liberated.

Cancer Therapeutic Targets John L. Marshall,2017-06-17 In the past decade, we have experienced an explosion of new information about cancer therapeutic targets. Many of the targets have been validated by the discovery and approval of new medicines which have been approved for the treatment of cancer. On the heels of these successes, innumerable new targets and new potential therapeutics are being developed by many different groups including government agencies, pharmaceutical companies, biotechnology companies, academic institutions, and individual investigators. Understanding the expanding universe of cancer therapies is therefore becoming impossible and no single source exists which serves as a reference for the involved parties. Further, the interested parties have vastly different areas of expertise, from focused laboratory based science, to clinical research, to corporate and regulatory oversight. The text would be updated every two years, more often depending on pace of change, interest and sales. While useful online, this reference book would likely be kept in hard copy as well.

**Twelve Years a Slave** Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

*NATO's Secret Armies* Daniele Ganser,2005-06-21 This fascinating new study shows how the CIA and the British secret service, in collaboration with the military alliance NATO and European military secret services, set up a network of clandestine anti-communist armies in Western Europe after World War II. These secret soldiers were trained on remote islands in the Mediterranean and in unorthodox warfare centres in England and in the United States by the Green Berets and SAS Special Forces. The network was armed with explosives, machine guns and high-tech communication equipment hidden in underground bunkers and secret arms caches in forests and mountain meadows. In some countries the secret army linked up with right-wing terrorist who in a secret war engaged in political manipulation, harrassement of left wing parties, massacres, coup d'états and torture. Codenamed 'Gladio' ('the sword'), the Italian secret army was exposed in 1990 by Italian Prime Minister Giulio Andreotti to the Italian Senate, whereupon the press spoke of The best kept, and most damaging, political-military secret since World War II (Observer, 18. November 1990) and observed that The story seems straight from the pages of a political thriller. (The Times, November 19, 1990). Ever since, so-called 'stay-behind' armies of NATO have also been discovered in France, Spain, Portugal, Germany, Belgium, the Netherlands, Luxemburg, Denmark, Norway, Sweden, Finland, Switzerland, Austria, Greece and Turkey. They were internationally coordinated by the Pentagon and NATO and had their last known meeting in the NATO-linked Allied Clandestine Committee (ACC) in Brussels in October 1990.
