Laurie Ann Thompson

Rise of the DEO Maria Giudice, Christopher

Ireland, 2013-09-17 The majority of companies, their employees and their leaders navigate a space where competitors appear overnight, customers demand innovations monthly, business plans rarely last a full year and career ladders have been replaced by trampolines. This environment of constant change will only accelerate in the future and traditional business leaders are ill equipped to deal with it. Just as we took our cues from MBAs and the military in casting the ideal CEO of the 20th century, we can look to design - in its broadest form - to model our future leader, the DEO. These leaders possess characteristics, behaviors and mindsets that allow them to excel in unpredictable, fast-moving and value-charged conditions. They are catalysts for transformation and agents of change. A hybrid of strategic business executive and creative problem-solver, the DEO is willing to take on anything as an object of design and looks at ALL problems as design challenges. Readers will learn not only why this form of leadership is essential to the success of modern organizations, but also what characteristics are best suited to this role. Through intimate conversations with leading DEOs, we explore the mindsets, communities, processes and practices common to creative business leaders. The book lays out—graphically and through example—how DEOs run their companies and why this approach makes sense now. We help readers identify these skills in themselves and their colleagues, and we guide them in using these skills to build, revive or reinvent the next generation of great companies and organization.

beautifully illustrated book celebrating forty of the world's sexiest brains--people who have changed the world in big and small ways. This beautifully illustrated book celebrates fifty of the world's sexiest brains--people who have changed the world in big and small ways. What have the world's sexiest people ever really done

for us? We should be crushing big-time on the beautiful brains of the people who actually make a difference. Elon Musk, swoon-worthy inventor who spends his billions developing sustainable energy sources and space exploration. Ruth Bader Ginsburg, (gavel-)bangin' babe of the US Supreme Court who has spent her life fighting for women's rights. There's the other Tyra, Rupaul: our heroic hunti, and the ultimate champion of drag culture. We have yet to even mention our almightiest Queen, the modest mogal who came from nothing, the incomparable Oprah Winfrey. These dreamboats are the real pin-ups, the poster people for brilliance, bravery, and giving a damn.

The Change Maker's Playbook Amy J. Radin, 2020-09-08
2020 Book Excellence Award Winner How any leader can deliver business-changing innovation now. Any leader in any size company, no matter the size or sector, feels the pressure to innovate, find new ideas and business models, and create enduring customer value. There is no one formula or set process to find and execute the ideas that achieve these goals; customers set moving targets, shareholders are unforgiving and demanding, and society expects companies to care about much more than the bottom line. The fast and furious forces of change stimulated by technology, demographics, lifestyles, and economic, environmental, political and regulatory impacts -- or any number of these in combination -- are easy to see. They are easy to talk about. They are easy to intellectualize. The problem? The answers are hard to execute and require nuanced combinations of leadership, skills, strategy and tactics. On top of that, innovation has moved from an abstraction that will matter at some distant date to a front-and-center deliverable that must show evidence of impact in the space of the calendar quarter. In the stories, tools, techniques and advice inside *The Change Maker's Playbook*, leaders will find tangible steps to find and safeguard the plans that will deliver the sustainable business-changing impacts -- new customers, new relationships, new sources of value and growth—

their businesses need. Separated from the pack of academic and consultant innovation theories, Radin's approach stems from her own experience sitting in the innovation hot seat at some of the world's most demanding companies and is bolstered by interviews with 50 corporate executives, founders and startup investors representing media, e-commerce, payments, healthcare, government, professional services, and not-for-profit sectors. The book walks readers through Radin's adaptive, 9-part framework, engaging them in ready-to-apply techniques. Her work shows leaders how to find the big ideas that will meaningfully address customer needs, take the insight from idea through implementation in a way that delivers in the short and long-term for the organization, and lead effectively through the obstacles that tend to derail or diminish innovation. Three phases - Seeking, Seeding and Scaling - organize the framework within an intuitive, logical and useable format, with concrete actions outlined every step of the way. The answer to the dilemma every business faces today is that innovation is exhilarating, rewarding and even fun when it is approached as a unique challenge, but it can also be polarizing, unpredictable, and scary. Success requires that leaders rethink how they lead innovation. Leaders know they must set aside preconceived notions of what works, and look to those who have already walked in their shoes. This is why *The Change Maker's Playbook* was written, and why it will become an ongoing resource for any innovation leader.

The Change Maker Al Checchi, 2011-08-30 Entertaining, fast-paced, instructional, The Change Maker is not only a memoir, but a blueprint for how we can change our own lives, as well as the world around us, by providing personal lessons in the values of strategic thinking and responsible leadership. Through compelling true stories, both humorous and serious, Al Checchi demonstrates that through experience, vision, and courage, one person can make a difference and lead others to move beyond their comfort zones and transform our institutions. Al Checchi, a remarkable change maker, chronicles how his creativity, strategic thinking, and negotiating skills helped transform three major American institutions—Marriott Corporation, Walt Disney, and Northwest Airlines—and led him to challenge the California political establishment as a candidate for governor. Peppered with excerpts from speeches and articles, The Change Maker offers thoughtful perspective on institutional change in America since the 1960s, and scalding commentary on the current state of our public and private institutions, political parties, the emergent political class, and the economic policies and leadership of today's administration. The Change Maker challenges us to confront the status quo and demand accountability and a restoration of the fiduciary standards that are so vital to reclaiming and maintaining America's position of economic and political leadership. Readers will finish the book feeling revitalized, hopeful, and armed with new ideas on how change can, and always will, occur.

Work. Love. Body. Jamila Rizvi, Helen McCabe, 2021-09-15 In 2020, the lives of Australian women changed irrevocably. With insight, intelligence and empathy, Jane Gilmore, Santilla Chingaipe and Emily J. Brooks explore this through the lenses of work, love and body, and ask: Will the Australia of tomorrow be more equal than the one we were born into? Or will women and girls remain left behind? While our country was shrouded in smoke in the early months of 2020, Australian women went about their daily business. They worked, studied, cleaned, did school runs, made meals. And they postponed looking after themselves because life got in the way. Then, in March, Australians were told to lock down. For all the talk of equality, it was primarily women who held the health of our communities in their hands as they took on the essential jobs to care, to nurse and to teach, despite an invisible danger. One year later, women across the country would march on behalf of those who were not safe in workplaces and their own

homes. Never before has change been thrust so abruptly on modern Australian women - 2020 impacted our working lives, relationships and our health and wellbeing. And as a growing number of women agitate for change, it is time to demand what women want. So where do we go from here? One thing is very clear: the future is now, and it is female.

The Change Makers Shaun Carney, 2019-02-05 Good leadership. Why is it so elusive? Are there successful traits that can be transferred from one field to another, or is it a constant application of imagination to the changing challenges? How do you take others with you? Now more than ever we need leaders who can be strong yet humble, bold and assertive when it counts but have the capacity to listen and learn, who can motivate and influence, and who can get the best out of those around them. Twenty-five outstanding Australian leaders—from diverse worlds such as science, the police force, a netball team, a spy agency, emergency medicine, business, politics and unionism—share their insights and lessons on the essence of inspiring leadership.

Creating Social Value Cheryl Kiser, Deborah Leipziger, J. Janelle Shubert, 2017-09-08 There is a new business landscape, where companies are increasingly being judged on their ability to generate _social value_. But there is no off-the-shelf solution for the leaders and change makers in this new domain. Creating social value is a journey, and each company must chart its own path through uncertain and complex terrain. We invite you to discover how the entrepreneurial leaders profiled in this book have become trailblazers, using strategy and innovation to generate profits and social value simultaneously. Creating Social Value provides insights into the motivations and preoccupations of groundbreaking entrepreneurial leaders as they look to activate change not just within their companies, but also in their sectors, value chains and even through co-creating partnerships with their competitors. Such change requires fundamentally new styles of leadership and business design where companies seek to be generative rather than extractive. This book also bears witness to the emergence of new language to describe these innovative concepts. Working with

and sharing ideas with social entrepreneurs and entrepreneurs inside, the authors became aware of the building blocks of a new lexicon with the power to inspire and positively influence the culture of an organization. Many of the leaders included in this book have driven change by harnessing the power of language to reroute their company's direction. For example, The Campbell Soup Company has created _destination goals_ to describe the long-term vision of the company to nourish its customers, employees and neighbours. Roshan has worked on _nation building_, creating physical infrastructure in Afghanistan, a country decimated by war. UPS has worked to understand its impact on the planet, building a _materiality matrix_ of the issues that matter to its stakeholders, while working to create a culture that fosters social innovation and seeks to understand _constructive dissatisfaction_. Ford is redefining its mission, imagining a different future in which it provides _mobility solutions_, rather than only manufacturing cars. Ford is working with Toyota to co-create technologies to combat climate change. This book sets out a manifesto for Social Value Creation, which is defined as a strategy that combines a unique set of corporate assets (including innovation capacities, marketing skills, managerial acumen, employee engagement, scale) in collaboration with the assets of other sectors and firms to co-create breakthrough solutions to complex economic, social and environmental issues that impact the sustainability of both business and society. Social innovation differs from corporate responsibility in two significant ways: it is strategic and it leverages a wide range of corporate assets and core competencies. Creating Social Value has been designed as a manual for change. It will be essential reading for business students, entrepreneurs and all of those wishing to effect positive, generative change in larger organizations.
