New Media in Art History Régine Bonnefoit, Melissa Rérat, Samuel

Schellenberg, 2023-09-18 New media in art history The history of art and new media are inextricably linked - both historically and in the present day. This publication can be described as an interdisciplinary reflection: it examines the confrontation and interaction between art history and new media, highlighting key developments, opportunities, and tensions. In eight studies, eleven researchers present new findings and explore the techniques and methods of new media - from electronic to digital and post-digital media - and the challenges these pose for art history. The book covers a wide range of topics, from the history and historiography of new media to their practical application, use, and reception, as well as creative processes, material conservation, and mediation. With new research findings, this book bridges the gap between art history and media studies With contributions by Keyvane Alinaghi, Sarah Amsler, Katharina Brandl, Fleur Chevalier, Aline Guillermet, Thomas Hänsli, Dominik Lengyel, Catherine Toulouse, Caroline Tron-Carroz, Zsofi Valyi-Nagy, and Nina Zschocke Cooperative project between the Swiss Association of Art Historians (VKKS) and the University of Neuchâtel

Great Plains Weather Kenneth F. Dewey,2019-05-01 The weather of the Great Plains is extreme and highly variable, from floods to droughts, blizzards to tornadoes. In Great Plains Weather Kenneth F. Dewey explains what makes this region's climate unique by presenting a historical climatology of extreme weather events. Beginning with tornadoes--perhaps the most formidable plains weather phenomena--he describes the climatology of these storms and discusses memorable tornadoes of the plains. As one of the storm chasers who travels the Great Plains in the spring and summer tracking severe weather, Dewey also shares some of his experiences on the road. Dewey then goes on to discuss famous blizzards, from the School Children's Storm of 1888 to more recent storms, along with droughts and floods. Precipitation, or the lack thereof, has long determined human activity in the region; exacerbated by the vagaries of climate change, it continues to have a significant economic and cultural impact on the people of the plains. Dewey's absorbing narrative is complemented by images of tornadoes, snowstorms, and flash floods that he amassed in forty years of climatological research.

Rural Rebellion Ross Benes,2021-01-26 After Ross Benes left Nebraska for New York, he witnessed his polite home state become synonymous with “Trump

country." Long dismissed as "flyover" land, the area where he was born and raised suddenly became the subject of TV features and frequent opinion columns. With the rural-urban divide overtaking the national conversation, Benes knew what he had to do: he had to go home. In *Rural Rebellion* Benes explores Nebraska's shifting political landscape to better understand what's plaguing America. He clarifies how Nebraska defies red-state stereotypes while offering readers insights into how a frontier state with a tradition of nonpartisanship succumbed to the hardened right. Extensive interviews with US senators, representatives, governors, state lawmakers, and other power brokers illustrate how local disputes over health-care coverage and education funding became microcosms for our current national crisis. *Rural Rebellion* is also the story of one man coming to terms with both his past and present. Benes writes about the dissonance of moving from the most rural and conservative region of the country to its most liberal and urban centers as they grow further apart at a critical moment in history. He seeks to bridge America's current political divides by contrasting the conservative values he learned growing up in a town of three hundred with those of his liberal acquaintances in New York City, where he now lives. At a time when social and political differences are too often portrayed in stark binary terms, and people in the Trump-supporting heartland are depicted in reductive, one-dimensional ways, Benes tells real-life stories to add depth and nuance to our understanding of rural Americans' attitudes about abortion, immigration, big government, and other contentious issues. His argument and conclusion are simple but powerful: that Americans in disparate places would be less hostile to one another if they just knew each other a little better. Part memoir, journalism, and social science, *Rural Rebellion* is a book for our times.

A Never Event Evelyn Vinduska McKnight, Travis Thorne Bennington, 2010-09-22
CANCER CLINIC CAUSES WORST HEPATITIS OUTBREAK IN US HISTORY In the small farming community of Fremont, Nebraska, townspeople eagerly welcomed an acclaimed doctor as the first full-time oncologist at their new cancer treatment center-but the fanfare soon turned into a nightmare. During chemotherapy treatments, 857 patients who were already waging the fights of their lives against cancer, were inexplicably exposed to the deadly, blood-borne hepatitis C virus. At least ninety-nine of them contracted the lethal illness. The horror was unprecedented-this was the largest healthcare-transmitted outbreak of hepatitis C in American history. A Never Event-a term used to describe a preventable medical tragedy-is a searing story of recklessness, deception and betrayal. It's part mystery, part courtroom drama. Written by a survivor of the tragedy and an attorney who represented many of the victims, A Never Event is a wake-up call to medical and legal communities nationwide. [A] harrowing account... I commend [McKnight's] advocacy and efforts to raise awareness about healthcare-related infections and other potentially life-threatening illnesses.-Hon. Shelley Berkley, congresswoman, Nevada The wake-up call to doctors, nurses and to patients.-Joe Hardy, MD, Nevada State Assembly A 'must-read' for patients. -Charles Stokes, president and CEO, CDC Foundation [McKnight's] story has provided
