**Henry A. Giroux**

*Watching Channel One* Ann De Vaney, 1994-01-01 Channel One, an electronic curriculum that was developed primarily to sell products in the marketplace, is cablecast daily to approximately twelve-thousand public high schools in the United States. About one quarter of our public secondary schools have been wired by Whittle Communications, a private company, for the delivery of this required news program. This translates to a captive audience for advertisements of around eight- to nine-million teens. The political, economic, social, and cognitive impact of Channel One will be vast. How did school board members and administrators arrive at the decision to include Channel One in their districts? What is the form and content of news and advertising on Channel One? Do students pay attention to the news? To the ads? Do students learn from Channel One? These questions, among others, are addressed in this book. By employing various forms of discourse analyses, critical theory, rhetorical analysis, structural and post-structural readings, descriptive case studies, and traditional-effects studies, the authors provide a thorough investigation into Channel One.

**The News About the News** Leonard Downie, Jr., Robert G. Kaiser, 2007-12-18 Freedom of the press is a primary American value. Good journalism builds communities, arms citizens with important information, and serves as a public watchdog for civic, national, and global issues. But what happens when the news turns its back on its public role? Leonard Downie Jr., executive editor of The Washington Post, and Robert G. Kaiser, associate editor and senior correspondent, report on a growing crisis in American journalism. From the corporatization that leads media moguls to slash content for profit, to newsrooms that ignore global crises to report on personal entertainment, these veteran journalists chronicle an erosion of independent, relevant journalism. In the process, they make clear why incorruptible reporting is crucial to American society. Rooted in interviews and first-hand accounts, the authors take us inside the politically charged world of one of America's powerful institutions, the media.

**Food in America [3 volumes]** Andrew F. Smith,2017-02-16 This three-volume work examines

all facets of the modern U.S. food system, including the nation's most important food and agriculture laws, the political forces that shape modern food policy, and the food production trends that are directly impacting the lives of every American family. Americans are constantly besieged by conflicting messages about food, the environment, and health and nutrition. Are foods with genetically modified ingredients safe? Should we choose locally grown food? Is organic food better than conventional food? Are concentrated animal feed operations destroying the environment? Should food corporations target young children with their advertising and promotional campaigns? This comprehensive three-volume set addresses all of these questions and many more, probing the problems created by the industrial food system, examining conflicting opinions on these complex food controversies, and highlighting the importance of food in our lives and the decisions we make each time we eat. The coverage of each of the many controversial food issues in the set offers perspectives from different sides to encourage readers to examine various viewpoints and make up their own minds. The first volume, *Food and the Environment*, addresses timely issues such as climate change, food waste, pesticides, and sustainable foods. Volume two, entitled *Food and Health and Nutrition*, addresses subjects like antibiotics, food labeling, and the effects of salt and sugar on our health. The third volume, *Food and the Economy*, tackles topics such as food advertising and marketing, food corporations, genetically modified foods, globalization, and megagrocery chains. Each volume contains several dozen primary documents that include firsthand accounts written by promoters and advertisers, journalists, politicians and government officials, and supporters and critics of various views related to food and beverages, representing speeches, advertisements, articles, books, portions of major laws, and government documents, to name a few. These documents provide readers additional resources from which to form informed opinions on food issues.

Disturbing Pleasures Henry A. Giroux, 2012-11-12 In *Disturbing Pleasures* Henry Giroux demonstrates how his well-known theories of education, critical pedagogy and popular culture can be put to use in the classroom and in other cultural settings. Adding an entirely new dimension to his thinking about the cultural sites at which pedagogical practice takes place, Giroux illustrates how professors, school teachers and other cultural workers can appropriate what he refers to as a pedagogy of cultural studies.
