Don't Push the Button! Bill Cotter,2013-11 There's only one rule in Larry's book: don't push the button. (Seriously, don't even think about it!) Even if it does look kind of nice, you must never push the button. Who knows what would happen? Okay, quick. No one is looking... push the button. Uh, oh.

**Ion Channels** T. Narahashi,2013-12-01 'Further establishes the reputation of the series...an invaluable resource.' -Trends in Pharmacological Sciences, from a review of Volume 3 Volume 4 explores such emergent topics as: three-dimensional conceptions of ion channel proteins based on the available structural and functional data; the structure, pharmacology, and regulation of the GABAA receptors; and the Ca<sup>2+</sup>-dependent K<sup>+</sup> channels in adrenal chromatic cell membranes.

*T-type Calcium Channels in Basic and Clinical Science* Stephen W. Schaffer,Ming Li,2014-11-26 T-type calcium channels are prevalent in every organ of the body, and are believed to play a part in a variety of physiological processes, including contraction, shape change, secretion, endo- and exocytosis, cell proliferation and differentiation, modulation of enzyme function, and cell cycle progression. As such, research on the roles of these channels in a wide range of diseases has attracted increasing attention in

recent years. The purpose of this book is to present a series of unique and comprehensive reviews of our current understanding of T-type calcium channels at the level of the basic sciences as well as the clinical sciences. For key organ systems, information is provided on the correlation between the molecular, biophysical and pharmacological properties of the channels, their cellular mechanisms, and their potential roles in the pathogenesis of various diseases. The compilation presents both commonplace and less well-known findings on these channels in a format designed to appeal to both casual readers and specialists in basic and clinical research on these transporters.

**Lifespan** David A. Sinclair, Matthew D. LaPlante, 2019-09-10 A NEW YORK TIMES BESTSELLER "Brilliant and enthralling." —The Wall Street Journal A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time's most influential people. It's a seemingly undeniable truth that aging is inevitable. But what if everything we've been taught to believe about aging is wrong? What if we could choose our

lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: "Aging is a disease, and that disease is treatable." This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair's own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, *Lifespan* will forever change the way we think about why we age and what we can do about it.

**Ion Channels** T. Narahashi, 2012-12-06 A wealth of information has been accumulated about the function of ion channels of excitable cells since the extensive and pioneering voltage clamp studies by Hodgkin, Huxley, and Katz 36 years ago. The study of ion channels has now reached a stage at which a quantum jump in progress is anticipated. There are many good reasons for this. Patch clamp techniques originally developed by Neher and Sakmann 12 years ago have made it possible to study the function of ion channels in a variety of cells. Membrane ionic currents can now be recorded practically from many types of cells using the whole-cell patch clamp technique. The opening and closing of individual ion channels can be analyzed using the single-channel patch clamp method. Techniques have also been developed to incorporate purified ion channels into lipid bilayers to reconstitute an excitable membrane. Advanced techniques developed in molecular biology, genetics, and immunology, such as gene cloning and the use of monoclonal antibodies, are now being applied to the study of ion channels. A variety of drugs have now been found or are suspected to interact with ion channels to exert therapeutic effects. In addition to the classical examples, as represented by local anesthetics, many other drugs, including calcium

antagonists, psychoactive drugs, cardiac drugs, and anticonvulsants, shown to alter ion channel function. For certain pesticides such as have been pyrethroids and DDT, sodium channels are clearly the major target site.

*Ion Channels* T. Narahashi, 2012-12-06 In the past few years, the scientific community has witnessed significant progress in the study of ion channels. Technological advancement in biophysics, molecular biology, and immunology has been greatly accelerated, making it possible to conduct experiments which were deemed very difficult if not impossible in the past. For example, patch-clamp techniques can now be used to measure ionic currents generated by almost every type of cell, thereby allowing us to analyze whole-cell and single channel events. It is now possible to incorporate purified ion channel components into lipid bilayers to reconstitute an excitable membrane. Gene cloning and monoclonal antibody techniques provide us with new approaches to the study of the molecular structure of ion channels. A variety of chemicals have now been found to interact with ion channels. One of the classical examples is represented by tetrodotoxin, a puffer fish poison, which was shown in the early 1960s to block the voltage-activated sodium channel in a highly specific and potent manner.

**Make Your Life Great Again** Michael Alvear, V. E. Strousberg, 2018-11 Two evangelicals who “prefer saviors who weren’t crucified” teach Trump supporters how to channel their inner Orange in this savagely funny satire disguised as a self-help book. First lesson: There’s no gold at the end of the Golden Rule. “A barbed send-up...filled with satirical glee!” —KIRKUS REVIEWS “What Would Donald Do?” A client is about to lose a promotion to an African-American. Another can’t get her daughter to lose weight. “What would Donald do?” ask the evangelical

gurus, as they coach their clients into behaving like America's wealthiest hemorrhoid. "Lies are unborn facts." A nerdy client wants help filling out the profile on his dating app. A boob-honking client competes against a woman for CEO. Our Trump Whisperers show them how to go Tourette's with the truth and ignore their conscience when it clangs like an Amber Alert. "You have a Christian duty to insult everyone." Laugh through the rage. Find out why Trump supporters made this America's #1 Returned Book! \* Afterword by the winner of the 2016 presidential election, Vladimir Putin. RAVE REVIEWS FROM THE WHITE HOUSE! "I prefer books that weren't published." -- Donald Trump "If I had a sense of humor this book would've made me laugh!" -- Sarah Huckabee Sanders "Luckily, I'm a reptile so this book didn't get under my skin." -- Stephen Miller "What's satire?" -- Kanye West

*Affliction* Channel Mendoza, 2020-08-24 *Affliction* was written based on trauma, pain, and heartache in the form of poetry. I took my life's struggles and made poems. I have been doing that my whole life. Whenever I was sad, mad, happy, or even confused, a man who became a father figure to me and a mentor would tell me to put it in a notebook. With his encouragement, that's where it began. For the past thirty years, I battled so many demons. The title *Affliction* is defined as pain and suffering. I want my pages to speak my truth but also connect with my readers. I feel the hurt you're feeling. Mentally and physically, I have been through a lot in this life. You're not alone. I am diabetic, and at times I battle fear and so many emotions while dealing with injections. I have been a type 1 diabetic since the age of six. But through all my afflictions, I am here, I am a survivor. Without those afflictions, I wouldn't be the mother . . . wife . . . sister . . . best friend . . . daughter . . . granddaughter . . . college graduate . . .

career-driven woman that I am today. I can say, “Yes, I made it!” I made it through all that pain, and even despite being sabotaged at times throughout my career. Every day, as the sun sets and I open my eyes, I am working on being a better me. I want my readers to know that no matter the race, ethnicity, or sex, when you’re battling so much and can’t fathom the thought of existing or want to give up, I want you to know that I see you, you will get through this, and I love you.
