Radio in the Digital Age Andrew Dubber, 2014-01-21 Radio's influence can be found in almost every corner of new media. *Radio in the Digital Age* assesses a medium that has not only survived the challenges of a new technological age but indeed has extended its reach. This is not a book about digital radio, but rather about the medium of radio in its many analogue and digital forms in an age characterised by digital technologies. The context of the digital age reveals new insights about the nature of radio. In this important addition to the world of radio scholarship, Dubber provides a theoretical framework for understanding the medium - allowing for complexity and contradiction, while avoiding essentialism and technological determinism. Introducing radio as a series of practices and phenomena that can be understood through a range of discursive categories, this book explores the relationships between radio, music, politics, storytelling and society in a new and thoughtful way. This book will make essential reading for students of media, communication, broadcasting and the digital industries. It offers a timely and comprehensive introduction for anyone who wishes to understand the

role of radio in today's media landscape.

**Popular Music in France from Chanson to Techno** Hugh Dauncey,2017-07-05 In France during the 1960s and 1970s, popular music became a key component of socio-cultural modernisation as the music/record industry became increasingly important in both economic and cultural terms in response to demographic changes and the rise of the modern media. As France began questioning traditional ways of understanding politics and culture before and after May 1968, music as popular culture became an integral part of burgeoning media activity. Press, radio and television developed free from de Gaulle's state domination of information, and political activism shifted its concerns to the use of regional languages and regional cultures, including the safeguard of traditional popular music against the centralising tendencies of the Republican state. The cultural and political significance of French music was again revealed in the 1990s, as French-language music became a highly visible example of

France's quest to maintain her cultural 'exceptionalism' in the face of the perceived globalising hegemony of English and US business and cultural imperialism. Laws were passed instituting minimum quotas of French-language music. The 1980s and 1990s witnessed developing issues raised by new technologies, as compact discs, the minitel telematics system, the internet and other innovations in radio and television broadcasting posed new challenges to musicians and the music industry. These trends and developments are the subject of this volume of essays by leading scholars across a range of disciplines including French studies, musicology, cultural and media studies and film studies. It constitutes the first attempt to provide a complete and up-to-date overview of the place of popular music in modern France and the reception of French popular music abroad.

**Stereo: Comparative Perspectives on the Sociological Study of Popular Music in France and Britain** Philippe Le Guern, 2016-04-01 The term 'Popular Music' has traditionally denoted different things in France and Britain. In France, the very concept of 'popular' music has been fiercely debated and contested, whereas in Britain and more largely throughout what the French describe as the 'Anglo-

saxon' world 'popular music' has been more readily accepted as a description of what people do as leisure or consume as part of the music industry, and as something that academics are legitimately entitled to study. French researchers have for some decades been keenly interested in reading British and American studies of popular culture and popular music and have often imported key concepts and methodologies into their own work on French music, but apart from the widespread use of elements of 'French theory' in British and American research, the 'Anglo-saxon' world has remained largely ignorant of particular traditions of the study of popular music in France and specific theoretical debates or organizational principles of the making and consuming of French musics. French, British and American research into popular music has thus coexisted - with considerable cross-fertilization - for many years, but the barriers of language and different academic traditions have made it hard for French and anglophone researchers to fully appreciate the ways in which popular music has developed in their respective countries and the perspectives on its study adopted by their colleagues. This volume provides a comparative and contrastive perspective on popular music and its study in France and the

UK.

*The Cambridge Companion to Modern French Culture* Nicholas Hewitt,2003-09-11 France entered the twentieth century as a powerful European and colonial nation. In the course of the century, her role changed dramatically: in the first fifty years two World Wars and economic decline removed its status as a world power, whilst the immediate post-war era was marked by wars of independence in its colonies. Yet at the same time, in the second half of the century, France entered a period of unprecedented growth and social transformation. Throughout the century and into the new millennium France retained its former international reputation as a centre for cultural excellence and innovation and its culture, together with that of the Francophone world, reflected the increased richness and

diversity of the period. This 2003 Companion explores this vibrant culture, and includes chapters on history, language, literature, thought, theatre, architecture, visual culture, film and music, and discuss the contributions of popular culture, Francophone culture, minorities and women.

Subcommittee on Information Policy, Census, and National Archives, 2010 Today's hearing, as the title indicates, will examine the 2010 Census Integrated Communications Campaign in hard-to-count areas. The hearing will assess and examine ethnic print and broadcast media's role in preventing an undercount. We will further examine avenues to aid the Census Bureau in its efforts to reach those who are more likely to be undercounted--children, minorities, and renters.--P. 1.

Modern France Michael F. Leruth, 2022-10-18 This volume offers perspective on modern French society and culture through thematic chapters on topics ranging from geography to popular culture. Ideal for students and general readers, this book includes insightful, current information about France's past, present, and future. France is the country most visited by international tourists. Aside from clichéd images of baguettes and the Eiffel Tower, however, what is French society and culture really

like? Modern France is organized into thematic chapters covering the full range of French history and contemporary daily life. Chapter topics include: geography; history; government and politics; economy; religion and thought; social classes and ethnicity; gender, marriage, and sexuality; education; language; etiquette; literature and drama; art and architecture; music and dance; food; leisure and sports; and media and popular culture. Each chapter contains an overview of the topic and alphabetized entries on examples of each theme. A detailed historical timeline covers prehistoric times to the presidency of Emmanuel Macron. Special appendices offer profiles of a typical day in the life of representative members of French society, a glossary, key facts and figures about France, and a holiday chart. The volume will be useful for readers looking for specific topical information and for those who want to develop an informed perspective on aspects of modern France.

Concentration, Diversity of Voices and Competition in the Media Market Paulo

Faustino, 2022-03-03 «The book Concentration, Diversity of Voices and Competition in the Media Market addresses one of the most important issues in democratic societies: knowledgeable citizens with access to diverse opinions and perspectives are less manipulable and can become also actors of a clear and rigorous way the concentration of media: scans correctly the legal framework and strategies of the leading business groups; and provides relevant indicators to detect and read the abuses of dominant positions in the European communications market». — Alfonso Sánchez-Tabernero. Rector de la Universidad de Navarra. «Concentration, Diversity of Voices and Competition in Media Market provides the latest Faustino and colleagues' study combines case studies and other methods to produce a volume that is a welcome addition to the literature in media management and economics.» — Dr. Alan B. Albarran. University of North Texas. «In the midst of global media

disruption, the steady pace of ownership concentration is that and a fascinating portrait of who owns what not as a static portrait, but as a dynamic guide for understanding.» – Everette E. Dennis. Northwestern University in Qatar.

**Music and Media in the Arab World** Michael Aaron Frishkopf,2010 Since the turn of the twentieth century the dramatic rise of mass media has profoundly transformed music practices in the Arab world. Music has adapted to successive forms of media disseminationDLfrom phonograph cylinders to MP3sDLeach subjected to the political and economic forces of its particular era and region. Carried by mass media, the broader culture of Arab music has been thoroughly transformed as well. Simultaneously, mass mediated music has become a powerful social force. While parallel processes

have unfolded worldwide, their implications in the Arabic-speaking world have thus far received little scholarly attention. This provocative volume features sixteen new essays examining these issues, especially televised music and the controversial new genre of the music video. Perceptive voicesDLboth emerging and establishedDLrepresent a wide variety of academic disciplines. Incisive essays by Egyptian critics display the textures of public Arabic discourse to an English readership. Authors address the key issues of contemporary Arab societyDLgender and sexuality, Islam, class, economy, power, and nationDLas refracted through the culture of mediated music. Interconnected by a web of recurrent concepts, this collection transcends music to become an important resource for the study of contemporary Arab society and culture. Contributors: Wael Abdel Fattah, Yasser Abdel-Latif, Moataz Abdel Aziz, Tamim Al-Barghouti, Mounir Al Wassimi, Walter Armbrust, Elisabeth Cestor, Hani Darwish, Walid El Khachab, Abdel-Wahab Elmessiri, James Grippo, Patricia Kubala, Katherine Meizel, Zein Nassar, Ibrahim Saleh, Laith Ulaby.

**Speaking Memory** Sherry Simon,2016-12-01 Speaking Memory evokes the complex language-

scapes that form at the crossroads of culture and history in cities. While engaging with current debates on the nature and role of translation in globalized urban landscapes, the contributors offer a series of detailed and nuanced readings of “translational” cities – their histories, their construction and transformation in memory, and the artistic projects that tell their stories. The three sections of the book highlight historical case studies, conceptual issues, and text-based analyses of city scripts, in particular as they relate to creative literary practices and language interventions on the surface of the city itself. In this volume, translation points to the dissonance of city life, but also to the possibility of a generalized, public discourse – a space vital to urban citizenship, where the convergence of languages can be the source of new conversations. Essays cover a variety of topics and approaches, bringing new voices and insights to discussions on multilingualism and translation in the urban contexts of cities including Dublin, Montevideo, Montreal, Prague, and Vilnius. Defining cities as fields of translational forces where languages are both in conversation and in tension, translation in *Speaking Memory* is stretched beyond its usual confines, encompassing literary, artistic, and cultural practices that

permeate everyday contemporary life. Contributors include Liamis Briedis (Vilnius University), Matteo Colombi (University of Leipzig), Michael Cronin (Dublin City University), Michael Darroch (Windsor University), Roch Duval (Université de Montréal), Andre Furlani (Concordia University), Simon Harel (Université de Montréal), William Marshall (Stirling University), Sarah Mekdjian (Université Paris III), Alexis Nouss (Université d'Aix en Provence), Katia Pizzi (University of London), Sherry Simon (Concordia University), Will Straw (McGill University), and Miriam Suchet (Université Paris III).
