Mindviscosity Matt Furie,2020-09-01 This is a collection of paintings, a one-man bestiary of monsters, weirdos, beasties, and anthropomorphs, all painted in Furie's meticulous brand of representational surrealism. Furie's cheerful, anthropomorphic comics character, Pepe the Frog, became a meme that was appropriated by hate groups (as seen in the documentary Feels Good Man, which premiered at the Sundance Film Festival.) Furie's recent paintings reflect this experience. This is a showcase for an unsettling menagerie; creatures seem to be hiding their true intentions. Furie is plumbing darker depths in these works, despite the paintings' inviting colors and friendly cartoon iconography.

Emotional Design Don Norman,2007-03-20 Why attractive things work better and other crucial insights into human-centered design Emotions are inseparable from how we humans think, choose, and act. In Emotional Design, cognitive scientist Don Norman shows how the principles of human psychology apply to the invention and design of new technologies and products. In The Design of Everyday Things, Norman made the definitive case for human-centered design, showing that good design demanded that the user's must take precedence over a designer's aesthetic if anything, from light switches to airplanes, was going to work as the user needed. In this book, he takes his thinking several steps farther, showing that successful design must incorporate not just what users need, but must address our minds by attending to our visceral reactions, to our behavioral choices, and to the stories we want the things in our lives to tell others about ourselves. Good human-centered design isn't just about making effective tools that are straightforward to use; it's about making affective tools that mesh well with our emotions and help us express our identities and support our social lives. From roller coasters to robots, sports cars to smart phones, attractive things work better. Whether designer or consumer, user or inventor, this book is the definitive guide to making Norman's insights work for you.

Magic Street Orson Scott Card,2006-06-27 "A modern suburban fantasy . . . There are quests and complications, conflicts and charms. . . . Card's back in top form, doing as well as or better than any of his fantasy work so far."—The San Diego Union-Tribune In a prosperous African American neighborhood in Los Angeles, infant Mack Street is found abandoned in an overgrown park and taken in by a blunt-speaking single woman. Growing up, Mack senses that he is different from most, and knows that he has strange powers. Yet he cannot possibly understand how unusual he is until the day he discovers, beyond a mysterious narrow house no one else can see, an entryway into a magical world. Passing through, Mack is plunged into a realm where time and reality are skewed, a place where his actions seem to have disturbing effects in the "real world." Whether he likes it or not, Mack has become a player in an epic drama. His reward, if he can survive the trip, is discovering not only who he really is . . . but why he exists. Praise for Magic Street "A great read . . . Card's take on his characters [is] as sure as ever, his narrative rock solid, his dialogue crackling and authentic."—Los Angeles Times Book Review "[Card] is a master at creating a sense of urgency that keeps you turning pages."—The Charlotte Observer "Mind-bending . . . Card's clever tale comes with sharp writing and crisp dialogue."—The Tampa Tribune "Compelling . . . By the time the

ultimate conflict comes into focus, the novel is propelling the reader forward like a bullet."—Deseret Morning News "A suspenseful fantasy thriller that, during the race to the last page, has one mulling over myth, morals, salvation, and will."—Booklist

Pug Davis Rebecca Sugar,2023-01-31 In this early comic work of Rebecca Sugar, creator of the Emmy nominated Steven Universe, she shows the development of a budding young artist in an entertaining, thoughtful read with a lot of heart. All of the elements that Rebecca has come to be known for. Pug Davis is a curmudgeonly astronaut in the vein of Buck Rodgers via John Wayne. He also happens to have the head of a Pug. Reluctantly teamed with his sensitive partner, Blouse, he fights aliens in space so we don't have to fight them here. Presented for the first time in full color.

Logo Design Love David Airey,2009-12-20 There are a lot of books out there that show collections of logos. But David Airey's "Logo Design Love" is something different: it's a guide for designers (and clients) who want to understand what this mysterious business is all about. Written in reader-friendly, concise language, with a minimum of designer jargon, Airey gives a surprisingly clear explanation of the process, using a wide assortment of real-life examples to support his points. Anyone involved in creating visual identities, or wanting to learn how to go about it, will find this book invaluable. - Tom Geismar, Chermayeff & Geismar In Logo Design Love, Irish graphic designer David Airey brings the best parts of his wildly popular blog of the same name to the printed page. Just as in the blog, David fills each page of this simple, modern-looking book with gorgeous logos and real world anecdotes that illustrate best practices for designing brand identity systems that last. David not only shares his experiences working with clients, including sketches and final results of his successful designs, but uses the work of many well-known designers to explain why well-crafted brand identity systems are important, how to create iconic logos, and how to best work with clients to achieve success as a designer. Contributors include Gerard Huerta, who designed the logos for Time magazine and Waldenbooks; Lindon Leader, who created the current FedEx brand identity system as well as the CIGNA logo; and many more. Readers will learn: Why one logo is more effective than another How to create their own iconic designs What sets some designers above the rest Best practices for working with clients 25 practical design tips for creating logos that last

Furry Nation Joe Strike,2017-10-03 Winner of the 2017 Ursa Major Award for Best Non-Fiction Work! Furry fandom is a recent phenomenon, but anthropomorphism is an instinct hard-wired into the human mind: the desire to see animals on a more equal footing with people. It's existed since the beginning of time in prehistoric cave paintings, ancient gods and tribal rituals. It lives on today—not just in the sports mascots and cartoon characters we see everywhere, but in stage plays, art galleries, serious literature, performance art—and among furry fans who bring their make-believe characters to life digitally, on paper, or in the carefully crafted fursuits they wear to become the animals of their imagination. In Furry Nation, author Joe Strike shares the very human story of the people who created furry fandom, the many forms it takes—from the joyfully public to the deeply personal— and how Furry transformed his own life.

Power of Faerun Ed Greenwood,Eric L. Boyd,2006 A new comprehensive guidebook to playing high-level heroes and running high-level campaigns in the Forgotten Realms, this supplement introduces new options to players and Dungeon Masters as well as guidelines to starting a temple, running a guild, and more.

Boy's Club Matt Furie,2016 The perpetually insouciant glaze of his characters belies the sharp verbal and visual wit of Furie, who delivers a stoner classic for the Tumblr generation. In fact, Furie's wildly popular teenage weirdos became an overnight internet sensation when Pepe the Frog was widely adopted by users of 4chan and remixed ad infinitum from there (including uses by pop stars like Nicki Minaj and Katy Perry), giving Boy's Club built-in recognition with many.

The Lifecycle of Software Objects Ted Chiang,2010 What's the best way to create artificial intelligence? In 1950, Alan Turing wrote, Many people think that a very abstract activity, like the playing of chess, would be best. It can also be maintained that it is best to provide the machine with the best sense organs that money can buy, and then teach it to understand and speak English. This process could follow the normal teaching of a child. Things would be pointed out and named, etc. Again I do not know what the right answer is, but I think both approaches should be tried. The first approach has been tried many times in both science fiction and reality. In this new novella, at over 30,000 words, his longest work to date, Ted Chiang offers a detailed imagining of how the second approach might work within the contemporary landscape of startup companies, massively-multiplayer online gaming, and open-source software. It's a story of two people and the artificial intelligences they helped create, following them for more than a decade as they deal with the upgrades and obsolescence that are inevitable in the world of software. At the same time, it's an examination of the difference between processing power and intelligence, and of what it means to have a real relationship with an artificial entity.
