*Analog-digital Conversion Equipment for Electrocardiographic Data* United States. National Bureau of Standards,Leonard Taback,1960 A corrected orthogonal 3-lead system has been used to record electrocardiograms directly from patients at veterans hospitals, using three FM channels of magnetic tape. A pilot facility has been designed and assembled by NBS to permit a medical technician to inspect these on an oscilloscope and select a significant cardiac cycle. This is automatically sampled at millisecond intervals and the numerical values are stored in digital form on magnetic tape acceptable to an electronic computer. Upon writing various programs for the digital computer, the cardiac researcher will have a flexible tool for objective analysis of large quantities of biological data by a variety of possible criteria.

*Self-Praise Across Cultures and Contexts* Chaoqun Xie,Ying Tong,2022-10-03 This book explores the extent to which self-praise is acceptable in both offline and online contexts, across different genres, platforms, and cultural backgrounds. The data analyzed encompass both naturally occurring (daily conversation as well as institutional talk) and elicited (experiments and interviews) types, and are explored at both quantitative and qualitative levels to offer a relatively systematic and comprehensive inquiry into self-praise as social (inter)action. Contributors to this book not only draw on traditional politeness theories but are also informed by social psychology, interactional sociolinguistics, CMC, and (multimodal) discourse analysis. They are inspired by pragmatics but also go beyond to ground their studies within locally situated cultural contexts, most of which are under-presented in the current academic world. Their efforts substantiate the fact that self-praise is most worthy of intensive analytic attention. This book appeals to students and researchers in the field and

contributes to the way communication is facilitated through different ways of deploying linguistic and interactional resources.
