The Hooktionary Brenda K.B. Anderson,2023-06-13 Create bold, modern and fun tapestry crochet designs with this unique crochet stitch dictionary! One of the most important tools in any crocheter's toolbox is a stitch dictionary - an essential reference packed with possibilities. The Hooktionary is the first and only crochet stitch dictionary to feature tapestry crochet motifs. And it has personality to boot! From unicorns and bumblebees to bold, graphic designs, the 150 motifs this book includes are perfect for the modern maker. Plus, five 'choose your own adventure' projects allow you to mix and match motifs into one-of-a-kind designs that reflect your own tastes. Inspired by Andrea Rangel's Alterknit Stitch Dictionary, Brenda K.B. Anderson has created a crochet counterpart so that crocheters can join in the fun too. Unlike other tapestry crochet pattern collections, which focus on single crochet stitches - creating slanted color patterns which do not create clean lines - Anderson has used her experience of which kinds of crochet stitches pair well with tapestry crochet to create beautiful, clear patterns, and wearable fabrics. Swatches are made in one of five different crochet stitch patterns: single crochet through the back loop, center (or split) single crochet, extended single crochet, center (or split) extended single crochet, and front post double crochet, with information about how the crochet stitch anatomy affects both the drape and feel of the fabric and also the look of the charted image, so that you can imagine how a chart would look in another stitch pattern. All the designs are crocheted in the round, so that you can keep the front of the work facing you, and for those projects that need an opening, a steek is made - a technique that has not been covered in any other crochet book! There is also comprehensive advice on choosing stitches and fixing mistakes.

Epidemiology in Country Practice William Norman Pickles,2013-10-22 Epidemiology in Country Practice presents the development of the catarrhal jaundice and myalgia. It discusses the epidemiological and clinical observations of country doctors. It addresses the conditions of life of a country doctor. Some of the topics covered in the book are the appeal to improved medical research; methods of communicating medical research; techniques in acquisition of clinical data; types of diseases of the people living in the country; description of influenza, measles, scarlet fever, whooping-cough, and mumps; and diagnosis and behavior of chicken-pox and shingles. The description of sonne dysentery is fully covered. An in-depth account of the diagnosis, symptoms, and treatment of undulant fever are provided. The characteristic mononucleosis of glandular fever is completely presented. A chapter is devoted to the classification and description of different skin conditions. Another section is focus on the diagnosis of malignant disease. The book can provide useful information to doctors, students, and researchers.

Sports Car and Competition Driving Paul Frère, I do not believe that any book, or any amount of training of the kind given in competition driving courses, will make a good driver of anyone who does not possess a fundamental, inborn aptitude. Above a certain level, driving becomes a sport, demanding of its adepts instant and accurate reflexes combined with perfect judgement. In this sphere, only those who enjoy an outstanding natural gift, and who take a profound interest in the subject, will ever reach the top. For this reason, I had some hesitation before writing this book— I thought, for instance, of Stirling Moss, Mike Hawthorn, Tony Brooks or Jim Clark, who all started winning races in their very first season of serious racing, at an age when they could have had comparatively little driving experience at all. But surely, they are exceptions, and between the two extremes of the born champion and the hopeless incompetent, there must be hundreds of good drivers who, even if they cannot hope to emulate potential world champions, might gain immense satisfaction from taking part in all sorts of motoring events. These are the non-professionals who, as a rule, cannot devote much time to their motoring activities and who will surely greatly benefit from all the experience that can be passed on to them, thereby reducing the time necessary for satisfying results to be achieved, in whatever sort of competition they intend to enter. If they have analytical minds, they will probably also like to have a better knowledge of the basic physics governing the behaviour and the attitude of their car on the road, which, in turn, will help them drive it to better purpose. The greater part of this book deals with racing, rather than rallying or any other sort of competition in which a time element is involved. This is not only because I consider circuit racing to be motor sport in its purest form (where few factors other than achieving the highest possible speed over a given distance are involved) but also because all the general rules of racing apply, basically, to any other sort of driving—after incidentals such as lack of previous knowledge of the road and the presence on it of other traffic and so on, have been taken into account. I therefore think that a better knowledge and understanding of the factors involved in competition driving should be of benefit to any driver, even if he does not take part in any sort of competition, and thereby contributes to greater safety on the road.
