Who's Really Running Your Life? Fourth Edition Peter K. Gerlach MSW,2011-02-28 Links below will take you to the non-profit Break the Cycle! Web site. Use your browsers back button to return. Premise - psychological wounding is epidemic in America because of an unseen inherited cycle of ineffective parenting and ignorance. This book describes the wounds, what they mean, and what to do about them. This fourth edition (Feb. 2011) will introduce you to your inner family, and who leads it in calm and crisis times. If you dont know who comprises your inner crew or whos in charge of them, you may be living life as a hostage to a false self and not know it. If so, youre probably living well below your potential, and may also be wounding kids in your life without meaning to. The rest of the book outlines an effective way to reduce any significant wounds, and live a calmer, more authentic, productive, satisfying life. Notice your reaction to these proposals and to the books title. I suspect you think Well I am running my life! Sure - but have you ever thought about who I is? Reality check: Have you ever had experiences like these? Blowing hot and cold about someone or something? Saying On one hand, and on the other? Obsessively second-guessing (doubting) an important decision youve made? Having discussions or arguments with yourself inside your head? An inner voice ceaselessly berating you for being stupid, dumb, weird, or unlovable? Loved and hated someone at the same time? Wanted to do something and simultaneously not wanted to do it? Done something impulsive and later thought What got into me? Known people who seemed two-faced, talked out of both sides of their mouth, and like two different people? Felt young when around an authority figure or perhaps a critical parent? yellow or mean streak, a blue mood a musical side, a silver tongue, or a way with kids? These are everyday signs of an invisible condition that shapes the lives of you and everyone you know. Its based on a marvelous survival feature of our human neural system recently called multiplicity: our brains wired-in ability to respond to childhood environmental threat by fragmenting into regions with special abilities. Using radiographic PET scans, were the first generation in history to be able to see these regions operating concurrently. The unitary experience of I see my child laugh involves many regions of your brain at once without your knowing it. So does everything you do! Main Ideas This book results from my professionally studying and practicing inner family therapy (parts work) since 1992. It describes what Ive come to believe without question about average women and men like you: Normal people have personalities that are composed of a group of subselves or parts, like members of an orchestra or athletic team. Each subself has its own talent or gift, its own values, goals, and limitations. Our inner families of subselves can range from harmonious to chaotic in calm and crisis times. The nature of our subselves and the relationships among them are determined in the first several years of life of average kids. If kids are

Community in the Digital Age Andrew Feenberg,Darin Barney,2004-07-26 Is the Internet the key to a reinvigorated public life? Or will it fragment society by enabling citizens to associate only with like-minded others? Online community has provided social researchers with insights into our evolving social life. As suburbanization and the breakdown of the extended family and neighborhood isolate individuals more and more, the Internet appears as a possible source for reconnection. Are virtual communities 'real' enough to support the kind of personal commitment and growth we associate with community life, or are they fragile and ultimately unsatisfying substitutes for human interaction? Community in the Digital Age features the latest, most challenging work in an important and fast-changing field, providing a forum for some of the leading North American social scientists and philosophers concerned with the social and political implications of this new technology. Their provocative arguments touch on all sides of the debate surrounding the Internet, community, and democracy.

The First Year: Hepatitis C Cara Bruce,Lisa Montanarelli,2009-04-29 The fifth-year anniversary of the book ushers in a new phase of treatment and information, including protease inhibitors (which have been so successful in treating HIV), split-liver transplants, and prophylactic and therapeutic vaccines for HCV. Bruce and Montanarelli also offer updated information on medications that are toxic to the liver; Eastern and Western approaches to healing; nutrition guides; the types of hepatitis that have been identified and what is known; and living with coinfection (HCV and HIV, HBV, and HAV). Alarming statistics: Hepatitis C is the most common bloodborne virus: It has infected 300 million people worldwide (4.1 million in the U.S.) and kills 8,000 to 10,000 Americans each year. About 26,000 people in the U.S. are infected yearly. Chronic hepatitis C is the number one cause of liver transplants. Key lifestyle issues: The book offers emotional support for newly diagnosed patients, helps them navigate and overcome insurance obstacles, as well as providing suggestions for making necessary changes in diet, exercise, drinking habits, drug use, dating, and sex life. Bruce and Montanarelli also debunk common myths and offer ideas for coping with depression, fatigue, and the side effects of medications.

Learning from Cyber-Savvy Students Anne Hird,2023-07-21 As the Internet has become a common household utility, more and more students are coming to school with Internet experience.How do students' and teachers' roles, and schools as institutions, change when these Internet-Age kids enter classrooms that are fully equipped with networked computers?This book offers a unique analysis of the issues and challenges teachers face as their classrooms become fully connected to the Internet.Anne Hird spent six months observing a class in a school with fully connected classrooms. She presents a vivid and insightful account–often reported through the students' own words--of how young teens use computers in and out of school; how they perceive the world shaped by the Internet; and how these factors shape their expectations for classroom learning.She observes and reflects on the paradox which confronts teachers in this environment. They are expected to guide students in learning with a cognitive tool that was not part of the teachers' experience as students, while students' familiarity with the Internet calls into question the authority of the teacher on which the traditional teacher-student relationship is based. She offers a strategy for professional development which recognizes and builds on this inevitable shift in the teacher-student relationship. This is an absorbing, thought-provoking and practical book for all educators--individual teachers and administrators alike–concerned about the integration of computer technology into elementary and secondary school classrooms.
