Ghost Work Mary L. Gray, Siddharth Suri, 2019 A startling exposé of the invisible human workforce that powers the web--and how to bring it out of the shadows. Hidden beneath the surface of the internet, a new, stark reality is looming--one that cuts to the very heart of our endless debates about the impact of AI. Anthropologist Mary L. Gray and computer scientist Siddharth Suri unveil how the services we use from companies like Amazon, Google, Microsoft, and Uber can only function smoothly thanks to the judgment and experience of a vast human labor force that is kept deliberately concealed. The people who do 'ghost work' make the internet seem smart. They perform high-tech, on-demand piecework: flagging X-rated content, proofreading, transcribing audio, confirming identities, captioning video, and much more. The shameful truth is that no labor laws protect them or even acknowledge their existence. They often earn less than legal minimums for traditional work, they have no health benefits, and they can be fired at any time for any reason, or for no reason at all. An estimated 8 percent of Americans have worked in this 'ghost economy,' and that number is growing every day. In this unprecedented investigation, Gray and Suri make the case that robots will

never completely eliminate 'ghost work' and the unchecked quest for artificial intelligence could spark catastrophic work conditions if not stopped in its tracks. Ultimately, they show how this essential type of work can create opportunity--rather than misery--for those who do it.--Dust jacket.

Gamification in Education and Business Torsten Reiners, Lincoln C. Wood, 2014-11-22 This book is dedicated to applied gamification in the areas of education and business, while also covering pitfalls to avoid and guidelines needed to successfully implement for a project. Using different

theoretical backgrounds from various areas including behavioral economics, game theory, and complex adaptive systems, the contributors aim to help readers avoid common problems and difficulties that they could face with poor implementation. The book's contributors are scholars and academics from the many areas where the key theory of gamification typically comes from. Ultimately, the book's goal is to help bring together the theories from these different disciplines to the field of practice in education and business. The book is divided into four parts: Theory, Education, Business, and Use Cases. Part I provides a foundation on the theory of gamification and offers insight into some of the outstanding questions that have yet to be addressed. In Part II, the application and value that gamification can bring within the education sector is examined. The book then changes focus in Part III to spotlight the use of gamification within business environments. The topics also cover educational aspects like improved learning outcomes, motivation, and learning retention at the workplace. Finally Part IV concentrates on the applications and use of gamification through a series of case studies and key elements that are used in real situations to drive real results.

Nearly Diamond J J Garrett, 2007-10-24 Hanford Stone carries with him a past as heavy as his name implies when he arrives in Beaux Bridge, Ohio, he a modern day flimflam man for Nearly Diamond Corporation, an energy company hoping to sell its high-sulfur coal. No one senses his burden, given his bright faade and dynamic demeanor. Surely not Hasten Edmond whose beauty, unequalled in the town, is emphasized by ebony-marbled eyes and shaft-dark mane which hints of how her persona plays the light of reflection at once with the clarity of diamond and with the carbon black of coal. She contrives to possess Hanford as she has every man of her desire, and is stunned when she finds her only competition ever in the personas of Allison, Grace, and Maryeach woman with varying allures, all unachievable by Hastenand all sought by a man whose search for love demands more than beauty and wit. She sees Hanford as a contemporary in every way, but cannot fathom that part of him from a different timescape, tradition, sense of self. Nor can Hanford, a man in flight and in denialeven as he succumbs to the abundance of love he helps Hasten find within herself.

Video Games and the Mind Bernard Perron, Felix Schröter, 2016-06-30 Can a video game make you cry? Why do you relate to the characters and how do you engage with the storyworlds they inhabit? How is your body engaged in play? How are your actions guided by sociocultural norms and experiences? Questions like these address a core aspect of digital gaming--the video game experience itself--and are of interest to many game scholars and designers. The Magiculum Todd Landman, 2014-04 This collection of essays has been written by magicians who really care about magic. Having discovered magic at a young age, they have allowed it to mature alongside their intellectual and practical formation. They contemplate different dimensions of magic and how they relate to it. Their stories and reflections reveal remarkable similarities in the themes that they address: Magic as power. Magic as escape. Magic as protection. Magic as play. Magic as medium. Magic as unknowable. Magic as symbol. Magic as language. Magic as incomplete. The book will touch anyone who has imagined a magical world and who has a sense of wonder, either as a child or as an adult. Broad in its approach, specific in its intent, 'The Magiculum' offers much to contemplate.
