HOW TO CHEAT AT POKER DANIEL MADISON,

How to Cheat at Windows System Administration Using Command Line Scripts Pawan K Bhardwaj, 2006-10-09 How to Cheat at Windows Systems Administrators using Command Line Scripts teaches system administrators hundreds of powerful, time-saving tips for automating daily system administration tasks using Windows command line scripts. With every new version of Windows, Microsoft is trying to ease the administration jobs by adding more and more layers of graphical user interface (GUI) or configuration wizards (dialog boxes). While these 'wizards' are interactive and make the administrator's job easier, they are not always the most convenient and efficient way to accomplish the everyday administration tasks. These wizards are time consuming and, at times, may seem a bit confusing. The purpose of the book is to teach administrators how to use command-line scripts to complete everyday administration jobs, solve recurring network problems and at the same time improve their efficiency. Provides system administrators with hundreds of tips, tricks, and scripts to complete administration tasks more quickly and efficiently. No direct competition for a core tool for Windows administrators. Builds on success of other books in the series including *How to Cheat at Managing Windows Small Business Server 2003* and *How to Cheat at Managing Microsoft Operations Manager 2005*.

APOLLO: A Decade of Achievement Paul I. Casey, 2013-10-25 The race for space begins on October 4, 1957 as the Soviet Union stuns the world and launches the first man made satellite - a feat until then only read about in science fiction. America is caught unprepared for 1957 and must answer this embarrassment to the world by proving its superiority; however, each time America tries to launch a satellite - let alone test a new rocket - it fails. • How could America have taken a back seat in the missile race? • How did America take the lead and win the race to the moon in as little as ten years? • How did America gain the necessary technology and ingenuity to not only launch men into outer space, but also land them on the moon and safely return? • Why did man even go to the moon? • How has the space program affected our lives today? Casey spent his life researching the space program and interviewing many people involved in it, from scientists to astronauts, to find answers to these questions. Casey, an accomplished technical writer, astronomy columnist and artist, began to write this book after he was inspired as a young child when he witnessed, along with the rest of the world, Apollo 11 land three men on the moon in 1969. Casey enjoyed educating students about the space program and wrote this book to share an enthusiasm about science, especially for those never thought about looking up at the night sky and wondering about the stars. Casey wanted students to ask questions and to gain a perspective on how incredible science is. But mostly, he wanted to inspire students to pursue a career in science to continue the peaceful exploration of space for generations to come.

Testosterone Transformation Myatt Murphy, Jeff Csatri, 2012-06-05 A groundbreaking workout and diet plan that replenishes a man's testosterone levels, rebuilds his body, and remakes his life Testosterone is the most crucial hormone in the male body--and every man's T levels begin a slow, steady decline as he ages. The result? Loss of strength and muscle mass. Poor sugar metabolism. Increased body fat, especially around the waist. Loss of T also affects red blood cell production, vitality, bone density, mental acuity, and sex drive. In short: It slowly chops a man down. Testosterone Transformation helps a man produce higher levels of T and reverse the downward spiral. By eating the right foods and adopting a new exercise approach, any man at any age can transform his life by starting a positive chain reaction: Raise T levels through the strategies in this book, improve workouts, get stronger, improve workouts even more, get even stronger, and enable the body to use muscle to process sugar--instead of storing it as fat. Testosterone Transformation

is a life-changer: a serious exercise and strategic diet plan that uses the science of a man's own body to help him recharge his sex drive, increase vitality, and reduce health risks across the board.

This book makes it easier for you to find the best in children's nonfiction books, and it offers concrete, classroom-tested ideas for presenting them to students in irresistible ways. Booktalks for more than 350 nonfiction titles (appropriate for elementary and middle school students) are organized according to topics popular with young readers-Great Disasters, Unsolved Mysteries, Fascinating People, Science, and Fun Experiments to Do. Library Media Specialists will find this guide essential. The thematic approach helps teachers search for titles that correlate to curriculum areas or specific units of study. Alpe d'Huez Peter Cossins,2015-05-28 It has been called the Tour de France's 'Hollywood climb', and there is no doubt that Alpe d'Huez has played a starring role in cycling's history since its first encounter with the sport back in 1952 when the legendary Fausto Coppi triumphed on the summit. Re-introduced to the Tour in 1976, Alpe d'Huez has risen to mythical status, thanks initially to a string of victories by riders from Holland, whose exploits attracted tens of thousands of their compatriots to the climb, which has become known as 'Dutch mountain'. A snaking 13.8-kilometre ascent rising up through 21 numbered hairpins at an average gradient of 7.8%, Alpe d'Huez is the climb on which every great rider wants to win. Many of the sport's most famous and now even infamous names have won on the Alpe, including Bernard Hinault, Joop Zoetemelk, Lucho Herrera, Marco Pantani and Lance Armstrong. As well as days of brilliance, there have been controversies such as the high-speed and drug-fuelled duels of the EPO years in the 1990s and into the new millennium. In Alpe d'Huez, veteran cycling journalist Peter Cossins reveals the triumphs, passion and despair behind the great exploits on the Alpe and discloses the untold details that have led to the mountain becoming as important to the Tour as the race is to resort at its summit. It is a tale of man and machine battling against breath-taking terrain for the ultimate prize.
