Megalopolis Cléa Dieudonné,2016-05-10 Unlike any picture book you've read before—the adventures of a stranger in the town of Megalopolis, told in a distinctive, beautifully illustrated foldout design For centuries, the wondrous imaginary city of Megalopolis has attracted visitors from all over the world. Then one day, a strange visitor arrives from another galaxy, and everything changes. He tours the zoo, meets the mayor at City Hall, enjoys a parade, and eventually meets a mermaid and falls in love. Readers will delight in a book which unfolds from thirty-eight pages into one giant page that is over ten feet long. Filled with scenes from the bustling town, featuring the many characters and animals that live there, the intricately detailed illustrations tempt young readers to invent their own stories, even as they follow the adventures of the friendly extraterrestrial. With its engaging story and distinctive foldout design, Megalopolis is a book that kids will want to read again and again.

**Nature's Metropolis: Chicago and the Great West** William Cronon,2009-11-02 A Finalist for the Pulitzer Prize and Winner of the Bancroft Prize. No one has written a better book about a city...Nature's Metropolis is elegant testimony to the proposition that economic, urban, environmental, and business history can be as graceful, powerful, and fascinating as a novel. —Kenneth T. Jackson, Boston Globe

*Crossover* Joel Shepherd,2010-10-28 Crossover is the first novel in a series which follows the adventures of Cassandra Kresnov, an artificial person, or android, created by the League, one side of an interstellar war against the more powerful, conservative Federation. Cassandra is an experimental design — more intelligent, more creative, and far more dangerous than any that have preceded her. But with her intellect come questions, and a moral awakening. She deserts the League and heads incognito into the space of her former enemy, the Federation, in search of a new life. Her chosen world is Callay, and its enormous, decadent capital metropolis of Tanusha, where the concerns of the war are literally and figuratively so many light years away. But the war between the League and the Federation was ideological as much as political, with much of that ideological dispute regarding the very existence of artificial sentience and the rules that govern its creation. Cassandra discovers that even in Tanusha, the powerful entities of this bloody conflict have wound their tentacles. Many in the League and the Federation have cause to want her dead, and Cassandra's history, inevitably, catches up with her. Cassandra finds herself at the mercy of a society whose values preclude her own right even to exist. But her presence in Tanusha reveals other fault lines, and when Federal agents attempt to assassinate the Callayan president, she finds herself thrust into the service of her former enemies, using her lethal skills to attempt to protect her former enemies from forces beyond their ability to control. As she struggles for her place and survival in a new world, Cassandra must forge new friendships with old enemies, while attempting to confront the most disturbing and deadly realities of her own existence.

*NEWDAWN REBOOT* Dominique Luchart,2021-11-21 A Signal Across The Universe An Anomaly Deep In Space A Countdown Way Too Short... The safe world of Ang City, under the DAINN planetary network, is no longer predictable for the more robust human species that now roam the planet. The technologically advanced society of genetically enhanced humans organized in Conclaves and living in 2098 is now run by the younger generation when it suddenly falls prey to an unknown bio dust cloud. As people collapse dead or disappear, a way of life becomes extinct, and the few survivors scramble to reverse the effects on their fragile world. Among the five Conclaves, the Elite led the charge and fought to survive, finding allies in factions that would have customarily opposed them in the conflict. This battle transcends time and space over many lifetimes and is a beginning with no end in sight.

*Urban Oman* Sonja Nebel,Aurel von Richthofen,2016 The book traces urbanisation patterns in Oman looking at the coastal strip of Muscat Capital Area. This metropolitan region emerged within the last 50 years almost out of nowhere and is now home of the majority of the national and expatriate population of Oman. Urbanisation, and the socio-political, economic and environmental aspects attached to it, become an index of the radical spatial transformation of the Sultanate. This process, if managed well, also holds the key to sustainable urban development. Urban Oman invites geographers, planners, urban designers, architects, decision-makers and scholars of Gulf Studies to rethink the emergence of Muscat Capital Area and to embrace the urban Oman. Sonja Nebel, architect and urban planner, is researcher and consultant with focus on international urban development, rehabilitation and urban management, affiliated to TU Berlin and GUTech, Oman. Aurel von Richthofen, architect and urbanist, is working on urban renewal and spatial planning strategies, and is currently researcher at the Future Cities Laboratory in Singapore affiliated to the ETH Zurich, Switzerland.

*Bioclimatic Double-Skin Façades* Mary Ben Bonham,2019-11-20 Visually enriched with over 250 photographs and drawings, Bioclimatic Double-Skin Façades is an essential reference guide for understanding the types and functions of double-skin façades. Author Mary Ben Bonham examines the history and continuing potential of double-skin architecture, informing on the variety of approaches possible and advising a rigorous integrated design process leading to application. Featuring a wide selection of architectural examples, the book will be of interest to professionals and students within the fields of architecture, engineering, and construction. Characterized by a buffer-like air space between two glazed building skins, double-skin windows and façades aim to improve building comfort and energy performance. Double skins introduce complexity and initial costs, yet significant buildings in locations around the globe continue to select this approach. In addition to exploring motivations, benefits, and cautions for designing with double skins, the book provides a primer on fundamental façade design concepts and strategies for control of thermal, luminous, and acoustic environments. Chapters also address alternative types of high-performance façades and implications for each phase of façade design and construction. Bioclimatic Double-Skin Façades promotes bioclimatic design that is inspired by nature, measured in performance, and uniquely adapted to climate and place. In-depth case studies illustrate how double-skin façades have been adapted to a range of climates and cultural settings: Marseille Library and Grenoble Courthouse in France, Cambridge Public Library in Massachusetts, Manitoba Hydro Place in Canada, and the Pearl River Tower in China.

Consuming Cities Nicholas Low,2000 This book is about cities as engines of consumption of the world's environment. It examines these issues through the impact of the Rio Declaration and assesses the extent to which it has made a difference.

**New Directions in Linguistic Geography** Greg Niedt,2022-10-12 This collection brings together contributions from a new wave of research into language, space, and place, at the intersection of various disciplines, from geography to sociolinguistics and linguistic anthropology. The authors investigate the myriad ways that people conceive of—and thereby describe—the world around them, studying the impact these ideas have on their identities, and highlighting the tension between conflicting ontologies of space. It is a timely and invaluable new resource for researchers and students in linguistics, geography, anthropology and communication.

**Russia's Changing Economic and Political Regimes** Andrey Makarychev,Andre Mommen,2013-07-18 The book reveals the interconnection between social, cultural and political protest movements and social and economic changes in a post-communist country like Russia still dominated by bureaucratic rulers and oligarchs controlling all basic industries and mining activities. Those interests are also dominating Russia's foreign policy and explain why Russia did not succeed in becoming an integral part of Europe. The latter is, at least, wished by many Russian citizens.

**Dubai** Pranay Gupte, 2011

In just two decades, Dubai has reinvented itself from a small, poor and quiet fishing village to a dazzling city with a vibrant urban life. How did this happen? Home to more than 200 nationalities particularly those from the Indian subcontinent, the emirate's choice to welcome expatriates has paid off. Cultivating an open and welcoming culture, Dubai manages to attract people from all over the world, heartily embracing any entrepreneurial contribution they wish to make. The emirate is now also known for its cosmopolitan melting-pot culture, and its enabling environment to conduct business, and this, along with the tax-free system and hassle-free infrastructure, makes it a much sought-after site for multinational enterprises who want a base in Asia. Unlike the Gulf emirates that can count on petroleum wealth, Dubai has found its way to prosperity by planning carefully and executing those plans methodically. Its airline and luxury construction have made it a popular destination for luxury tourism. Projects like the Burj al-Arab, the Palm Jumeirah and the Burj Khalifa, along with events like the world's richest horserace the Dubai World Cup and the Dubai Shopping Festival, have sustained tourist interest and focused the world's attention on the emirate.

**Constantinople** Ken Dark, Feridun Özgümü?, 2013-11-29

Istanbul, Europe's largest city, became an urban centre of exceptional size when it was chosen by Constantine the Great as a new Roman capital city. Named 'Constantinople' after him, the city has been studied through its rich textual sources and surviving buildings, but its archaeology remains relatively little known compared to other great urban centres of the ancient and medieval worlds. *Constantinople: Archaeology of a Byzantine Megapolis* is a major archaeological assessment of a key period in the development of this historic city. It uses material evidence, contemporary developments in urban archaeology and archaeological theory to explore over a thousand years of the city's development. Moving away from the scholarly emphasis on the monumental core or city defences, the volume investigates the inter-mural area between the fifth-century land walls and the Constantinian city wall - a zone which encompasses half of the walled area but which has received little archaeological attention. Utilizing data from a variety of sources, including the 'Istanbul Rescue Archaeology Project' created to record material threatened with destruction, the analysis proposes a new model of Byzantine Constantinople. A range of themes are explored including the social, economic and cognitive development, Byzantine perceptions of the city, the consequences of imperial ideology and the impact of 'self-organization' brought about by many minor decisions. Constantinople casts new light on the transformation of an ancient Roman capital to an Orthodox Christian holy city and will be of great importance to archaeologists and historians.

*The Hidden Wealth of Cities* Jon Kher Kaw, Hyunji Lee, Sameh Wahba, 2020-02-13

In every city, the urban spaces that form the public realm—ranging from city streets, neighborhood squares, and parks to public facilities such as libraries and markets—account for about one-third of the city's total land area, on average. Despite this significance, the potential for these public-space assets—typically owned and managed by local governments—to transform urban life and city functioning is often overlooked for many reasons: other pressing city priorities arising from rapid urbanization, poor urban planning, and financial constraints. The resulting degradation of public spaces into congested, vehicle-centric, and polluted places often becomes a liability, creating a downward spiral that leads to a continuous drain on public resources and exacerbating various city problems. In contrast, the cities that invest in the creation of human-centered, environmentally sustainable, economically vibrant, and socially inclusive places—in partnership with government entities, communities, and other private stakeholders—perform better. They implement smart and sustainable strategies across their public space asset life cycles to yield returns on investment far exceeding monetary costs, ultimately enhancing city livability, resilience, and competitiveness. *The Hidden Wealth of Cities: Creating, Financing, and Managing Public Spaces* discusses the complexities that surround the creation and management of successful public spaces and draws on the analyses and experiences from city case studies from around the globe. This book identifies—through the lens of asset management—a rich palette of creative and innovative strategies that every city can undertake to plan, finance, and manage both government-owned and privately owned public spaces.
