Resources, Co-Evolution and Artifacts Mark S. Ackerman,Christine A. Halverson,Thomas Erickson,Wendy A. Kellogg,2007-10-24 This new book looks at how resources get created, adopted, modified, and die, by using a number of theoretical and empirical studies to carefully examine and chart resources over time. It examines, among many others, issues such as how resources are tailored or otherwise changed as the situations and purposes for which they are used change, and how a resource is maintained and reused within an organization.

Go Go Gato Max Everhart,2018-07-16 When Almario “Go Go” Gato, a handsome young Cuban baseball player, goes missing mid-season, his agent Veronica Craven hires a private investigator to track down her best client. No police. No press. Enter Eli Sharpe, an Asheville, North Carolina-based ex-ballplayer turned private detective who specializes in investigating professional athletes. Eli begins by questioning Maria Gato, Almario’s roommate and fraternal twin. Maria watched while both her parents drowned on the boat ride from Cuba to America, so she is naturally desperate to get her only brother back. She tells Eli a secret: Almario may have a problem with drugs and alcohol. Eli tracks down Almario’s supposed girlfriend, a rich sorority girl, but is soon led to another woman in his life, Sheri Stuckey, his cocaine supplier and fiancée who works in tandem with a gay bartender named Dantonio Rushing. Stuckey, a drug abuser and single mother, claims Almario split because she wanted the two of them to check into rehab. But Rushing, dazzled by Almario’s boyish good looks, tells a different tale: Almario has taken out a \$500,000 life insurance policy on himself and named Stuckey as the primary beneficiary. With the help of his mentor—a former homicide detective—and five ex fiancées who still care about him, Eli follows Go Go’s trail, determined to locate the elusive ballplayer before one of the nasty people in his life—or his own bad habits—do him in. Praise for GO GO GATO: “From its hero to its milieu to its eccentric, three-dimensional characters, Max Everhart’s Go Go Gato is a terrific read. The North Carolina minor-league baseball scene feels authentic and beloved, and I was always rooting for protagonist Eli Sharpe. The best news is that this excellent mystery is first in a series. Fans of Harlan Coben will want to check out Max Everhart, a major

new talent!” —Steve Ulfelder, Edgar Award-finalist author of *Wolverine Bros. Freight & Storage* “Go Go Gato is the debut entry in a promising new series by Max Everhart, and it’s a fast-paced, entertaining tale. Eli Sharpe is a very appealing character who combines just the right amounts of wit, humor, intelligence and courage, and it will be fun to watch him in action as the series continues to grow and develop.” —James L. Thane, author of *Until Death and No Place To Die* “Max Everhart scores a homerun with this first novel in his new Eli Sharpe mystery series. Eli finds much more than he bargained for in his search for a missing baseball player in this fast read, best enjoyed with a glass of George Dickel in hand since that’s Eli’s favorite “poison”. Like a good curveball you won’t see the twist ending coming at you.” —Paul D. Marks, author of the Shamus Award-winning novel *White Heat* “This is an excellent read and the author’s characters are very real; in particular, Eli Sharpe and his friend Ernest Carpenter. Readers will enjoy the plot, and root for Eli to discover the criminal before a more serious crime occurs.” —Suspense Magazine

A Quantum City Ludger Hovestadt, Vera Bühlmann, 2015-06-16 We know the specific strengths of various cities, are aware of their ranking, are able to discuss their density and growth. But what do all cities have in common, what do we know about the “lowest common denominator”? The “city as a species”, the “primal genetic material of the city”: this is the subject of *A Quantum City*. This colossal work is a love letter to the city and intellectual culture. We follow the fictional narrative figure, Orlando, beginning in 320 BC, on his odyssey through the Western world up to the present time. The book is divided into four interrelated chapters and can be read page by page in a discursive manner, however randomly browsing through the book also offers new and multi-faceted interpretations. Great intellectual achievements are compared with obscure and mundane events. *A Quantum City* offers an inspiring view of the city that is in us and around us.

The Randstad: A Research and Policy Laboratory F.M. Dieleman, S. Musterd, 2013-06-29 Randstad Holland is the urbanized western part of the Netherlands. It contains the four largest cities of the country: Amsterdam, Rotterdam, The Hague and Utrecht. The name Randstad (rim city) refers to the distinctive shape of the conurbation, a horseshoe of cities around an open agricultural and recreational area, known as the Green Heart. This book analyzes the restructuring of the region. The volume summarizes the research of the Urban Networks research program. The discussion is focused on four themes: housing, labor market and employment, infrastructure and transportation, and the provision of public services. The Randstad is internationally known as the playground of urban and regional planners. Their debates on present policy issues are extensively reviewed in the book. Teachers and students of urban change and planning, and policy makers and planners in The Netherlands and abroad will find much valuable information in this book.

Beating Traffic Michael L. Sena,2007-02-13 *Beating Traffic: Time to Get Unstuck* explores why, when and how congestion occurs, the part that you play in it, and what you and your family can do to reduce the negative effects of traffic congestion on your lives. Traffic congestion is not a pre-ordained state of affairs, and it is not you and I and the other car drivers who should have to live with it or bear the sole responsibility for fixing it. Decades of often well-meaning but horribly bad planning, and the conscious exploitation of real estate, have lead to most things being in the wrong place, too far from where everybody is and where everybody wants to go, so that the only way to get anywhere is to climb in the car and join the endless queues along the highways and local streets. There are no quick fixes to the problem. Congestion charging is being promoted in many of the world's major cities as the ultimate solution. But turning the right of driving a car enjoyed by anyone into a privilege enjoyed only by those who can afford to pay the tolls charged by governments will only serve to increase the already wide chasm between the haves and the have-nots in the world. There are fairer and more equitable means to ration road space, and these are explored in this book. While we are actively promoting real, long-term solutions to traffic congestion by supporting politicians who are serious about reconciling mobility and environmental sustainability, we can work on removing the inconvenience and irritation that it causes us on a daily basis. We can start by getting ourselves and our children out of our cars more often and onto the sidewalks, the bicycle paths and public transportation. We need to do our part to reduce harmful emissions by buying and driving responsibly, and we need to help stop the thousands of deaths and millions of injuries caused each year on our streets and highways by respecting the rules of the road and never driving under the influence of drugs or alcohol. There are positive and concrete actions we can take to beat traffic, and you will read about them in *Beating Traffic*.

Maturity of Feudal Society in the Ming and Qing Dynasties Da Xue, The book is the volume of “Maturity of Feudal Society in the Ming and Qing Dynasties” among a series of books of “Chinese Dynastic History”. The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600–1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070–1600 BC) before the Shang, but no writing is

known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC – 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood – the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.
