*An Unexplained Death* Mikita Brottman,2018-11-06 An Unexplained Death is an obsessive investigation into a mysterious death at the Belvedere—a once-grand hotel—and a poignant, gripping meditation on suicide and voyeurism “The poster is new. I notice it right away, taped to a utility pole. Beneath the word ‘Missing,’ printed in a bold, high-impact font, are two sepia-toned photographs of a man dressed in a bow tie and tux.” Most people would keep walking. Maybe they’d pay a bit closer attention to the local news that evening. Mikita Brottman spent ten years sifting through the details of the missing man’s life and disappearance, and his purported suicide by jumping from the roof of her own apartment building, the Belvedere. As Brottman delves into the murky circumstances surrounding Rey Rivera’s death—which begins to look more and more like a murder—she contemplates the nature of and motives behind suicide, and uncovers a haunting pattern of guests at the Belvedere, when it was still a historic hotel, taking their own lives on the premises. Finally, she fearlessly takes us to the edge of her own morbid curiosity and asks us to consider our own darker impulses and obsessions.

*Sex, Time, and Power* Leonard Shlain, 2004-08-03 As in the bestselling *The Alphabet Versus the Goddess*, Leonard Shlain's provocative new book promises to change the way readers view themselves and where they came from. *Sex, Time, and Power* offers a tantalizing answer to an age-old question: Why did big-brained *Homo sapiens* suddenly emerge some 150,000 years ago? The key, according to Shlain, is female sexuality. Drawing on an awesome breadth of research, he shows how, long ago, the narrowness of the newly bipedal human female's pelvis and the increasing size of infants' heads precipitated a crisis for the species. Natural selection allowed for the adaptation of the human female to this environmental stress by reconfiguring her hormonal cycles, entraining them with the periodicity of the moon. The results, however, did much more than ensure our existence; they imbued women with the concept of time, and gave them control over sex—a power that males sought to reclaim. And the possibility of achieving immortality through heirs drove men to construct patriarchal cultures that went on to dominate so much of human history. From the nature of courtship to the evolution of language, Shlain's brilliant and wide-ranging exploration stimulates new thinking about very old matters.

*Accelerando* Charles Stross, 2005-07-05 *The Singularity*. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...
