## **How Cycling Can Save the World** Peter Walker, 2017-04-04 Peter

Walker—reporter at the Guardian and curator of its popular bike blog—shows how the future of humanity depends on the bicycle. Car culture has ensnared much of the world—and it's no wonder. Convenience and comfort (as well as some clever lobbying) have made the car the transportation method of choice for generations. But as the world evolves, the high cost of the automobile is made clearer—with its dramatic effects on pollution, the way it cuts people off from their communities, and the alarming rate at which people are injured and killed in crashes. Walker argues that the simplest way to tackle many of these problems at once is with one of humankind's most perfect inventions—the bicycle. In *How Cycling Can Save the World*, Walker takes readers on a tour of cities like Copenhagen and Utrecht, where everyday cycling has taken root, demonstrating cycling's proven effect on reducing smog and obesity, and improving quality of life and mental health. Interviews with public figures—such as Janette Sadik-Khan, who led the charge to create more pedestrian- and cyclist- friendly infrastructure in New York City—provide case studies on how it can be done, and prove that you can make a big change with just a few cycling lanes and a paradigm shift. Meticulously researched and incredibly inspiring, *How Cycling Can Save the World* delivers on its lofty promise and leads readers to the realization that cycling could not only save the world, but have a lasting and positive impact on their own

lives.

**The Third Coast** Thomas L. Dyja, 2014-03-25 Winner of the Chicago Tribune's 2013 Heartland Prize A critically acclaimed history of Chicago at mid-century, featuring many of the incredible personalities that shaped American culture Before air travel overtook trains, nearly every coast-to-coast journey included a stop in Chicago, and this flow of people and commodities made it the crucible for American culture and innovation. In luminous prose, Chicago native Thomas Dyja re-creates the story of the city in its postwar prime and explains its profound impact on modern America—from Chess Records to Playboy, McDonald's to the University of Chicago. Populated with an incredible cast of characters, including Mahalia Jackson, Muddy Waters, Howlin' Wolf, Chuck Berry, Sun Ra, Simone de Beauvoir, Nelson Algren, Gwendolyn Brooks, Studs Turkel, and Mayor Richard J. Daley, *The Third Coast* recalls the prominence of the Windy City in all its grandeur.

Bicycling and Walking in the United States Alliance for Biking & Walking, Andrea Milne, Maggie Melin, 2014 This is the fourth biennial Benchmarking Project which began in 2003. Researchers analyzed data from the 50 States and from 50 large and 17 small and mid-sized U.S. cities to document trends in bicycling and walking. This report uses case studies from around the world to illustrate efforts taken to support bicycling and walking. Chapter topics include: mode share, public health, safety, policies and funding, infrastructure, multimodal, programs, and personnel.

**Wheels of Change** Sue Macy, 2017-02-07 Explore the role the bicycle played in the women's liberation movement.

**The Uncertainty Mindset** Vaughn Tan, 2020-07-28 Innovation is how businesses stay ahead of the competition and adapt to market conditions that change in unpredictable and uncertain ways. In the first decade of the twenty-first century, high-end cuisine underwent a profound transformation. Once an industry that prioritized consistency and reliability, it turned into one where constant change was a competitive necessity. A top restaurant's reputation and success have become so closely bound up with its ability to innovate that a new organizational form, the culinary research and development team, has emerged. The best of these R&D teams continually expand the frontiers of food—they invent a constant stream of new dishes, new cooking processes and methods, and even new ways of experiencing food. How do they achieve this nonstop novelty? And what can culinary research and development teach us about how organizations innovate? Vaughn Tan opens up the black box of elite culinary R&D to provide essential insights. Drawing on years of unprecedented access to the best and most influential culinary R&D teams in the world, he reveals how they exemplify what he calls the uncertainty mindset. Such a mindset intentionally incorporates uncertainty into organization design rather than simply trying to reduce risk. It changes how organizations hire, set goals, and motivate team members and leads organizations to work in highly unconventional ways. A revelatory look at the

R&D kitchen, *The Uncertainty Mindset* upends conventional wisdom about how to organize for innovation and offers practical insights for businesses trying to become innovative and adaptable.

*The Willpower Instinct* Kelly McGonigal, 2013-12-31 Based on Stanford University psychologist Kelly McGonigal's wildly popular course *The Science of Willpower*, *The Willpower Instinct* is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, *The Willpower Instinct* explains exactly what willpower is, how it works, and why it matters. For example, readers will learn:

- Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep.
- Willpower is not an unlimited resource. Too much self-control can actually be bad for your health.
- Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower
- Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control.
- Giving up control is sometimes the only way to gain self-control.
- Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models.

In the groundbreaking tradition of *Getting Things Done*, *The Willpower Instinct* combines life-changing

prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

**Move: How to Rebuild and Reinvent America's Infrastructure** Rosabeth Moss Kanter, 2015-05-11 Americans are stuck. Americans are stuck. We live with travel delays on congested roads, shipping delays on clogged railways, and delays on repairs and project approvals due to gridlocked leadership. And when we can't move, when goods are delayed, and when information networks can't connect, then economic opportunity deteriorates and social inequity grows. We don't have to take it anymore! In *Move*, Harvard Business School professor and bestselling author Rosabeth Moss Kanter visits the business leaders, mayors, transportation advocates, and entrepreneurs across the country tackling these challenges through underwater tunnels, instant bridges, road sensors, parking apps, bike-sharing programs, seamless wifi, and much more. It all adds up to a new vision for American mobility, where local leaders and public-private partnerships lead the way. With unique insight and unrivaled expertise, Kanter gives us a sweeping look at the innovative projects, vital leaders, and bold solutions that are moving our transportation infrastructure toward a cleaner, faster, and more prosperous future.

*Transport and Climate Change* Tim Ryley, Lee Chapman, 2012-07-17 This topical volume covers the intersection between transport and climate change, with

papers from the 'Transport & Climate Change' session of the RGS-IBG conference in London, September 2010. It considers the role of transport modes at varying spatial dimensions and a range of perspectives on the relationship between transport and climate change.

**Using Social Theory** Michael Pryke, Gillian Rose, Sarah Whatmore, 2003-09-03  
The chapters in this innovative guide share a common belief that thinking alongside ideas is an integral part of the research process. This book encourages the researcher to think through three key moments of the research process: the production of a research question; fieldwork; and analysis and writing.

Bicycling the Pacific Coast Tom Kirkendall, Vicky Spring, 1990

**Intelligent and Efficient Transport Systems** Truong Quang Dinh, 2020-04-01  
The aim of this book is to present a number of digital and technology solutions to real-world problems across transportation sectors and infrastructures. Nine chapters have been well prepared and organized with the core topics as follows: -A guideline to evaluate the energy efficiency of a vehicle -A guideline to design and evaluate an electric propulsion system - Potential opportunities for intelligent transportation systems and smart cities -The importance of system control and energy-power management in transportation systems and infrastructures -Bespoke modeling tools and real-time simulation platforms for transportation system development This book will be useful to a wide range of audiences: university staff and students,

engineers, and business people working in relevant fields.

*Defaming the Dead* Don Herzog, 2017-03-28 Do the dead have rights? In a persuasive argument, Don Herzog makes the case that the deceased's interests should be protected. This is a delightfully deceptive work that starts out with a simple, seemingly arcane question—can you libel or slander the dead?—and develops it outward, tackling larger and larger implications, until it ends up straddling the borders between law, culture, philosophy, and the meaning of life. A full answer to this question requires legal scholar Don Herzog to consider what tort law is actually designed to protect, what differences death makes—and what differences it doesn't—and why we value what we value. Herzog is one of those rare scholarly writers who can make the most abstract argument compelling and entertaining.

*Essential Methods for Planning Practitioners* Laxmi Ramasubramanian, Jochen Albrecht, 2017-11-17 This book assembles and organizes a selected range of methods and techniques that every planning practitioner should know to be successful in the contemporary global urban landscape. The book is unique because it links different aspects of the planning/policy-making enterprise with the appropriate methods and approaches, thus contextualizing the use of specific methods and techniques within a sociopolitical and ethical framework. This volume familiarizes readers with the diverse range of methods, techniques, and skills that must be applied at different scales in dynamic workplace environments where planning policies and programs are

developed and implemented. This book is an invaluable resource in helping new entrants to the planning discourse and profession set aside their own disciplinary biases and empowering them to use their expert knowledge to address societal concerns.

Zero to Five Tracy Cutchlow, 2015-04-21 When you're a new parent, the miracle of life might not always feel so miraculous. Maybe your latest 2:00 a.m., 2:45 a.m., and 3:30 a.m. wake-up calls have left you wondering how "sleep like a baby" ever became a figure of speech—and what the options are for restoring your sanity. Or your child just left bite marks on someone, and you're wondering how to handle it. First-time mom Tracy Cutchlow knows what you're going through. In *Zero to Five: 70 Essential Parenting Tips Based on Science (and What I've Learned So Far)*, she takes dozens of parenting tips based on scientific research and distills them into something you can easily digest during one of your two-minute-long breaks in the day. The pages are beautifully illustrated by award-winning photojournalist Betty Udesen. Combining the warmth of a best friend with a straightforward style, Tracy addresses questions such as: Should I talk to my pregnant belly / newborn? Is that going to feel weird? (Yes, and absolutely.) How do I help baby sleep well? (Start with the 45-minute rule.) How can I instill a love of learning in my child? (By using specific types of praise and criticism.) What will boost my child's success in school? (Play that requires self-control, like make-believe.) My baby loves videos and cell-phone games. That's cool, right?

(If you play, too.) What tamps down temper tantrums? (Naming emotions out loud.) My sweet baby just hit a playmate / lied to me about un-potting the plant / talked back. Now what? (Choose one of three logical consequences.) How do I get through an entire day of this? (With help. Lots of help.) Who knew babies were so funny? (They are!) Whether you read the book front to back or skip around, Zero to Five will help you make the best of the tantrums (yours and baby's), moments of pure joy, and other surprises along the totally-worth-it journey of parenting.

Creating a Brand Identity: A Guide for Designers Catharine Slade-Brooking, 2016-01-18 Creating a brand identity is a fascinating and complex challenge for the graphic designer. It requires practical design skills and creative drive as well as an understanding of marketing and consumer behaviour. This practical handbook is a comprehensive introduction to this multifaceted process. Exercises and examples highlight the key activities undertaken by designers to create a successful brand identity, including defining the audience, analyzing competitors, creating mood boards, naming brands, designing logos, presenting to clients, rebranding and launching the new identity. Case studies throughout the book are illustrated with brand identities from around the world, including a diverse range of industries – digital media, fashion, advertising, product design, packaging, retail and more.

*Urban Bikeway Design Guide, Second Edition* National Association of City

Transportation Officials,2014-03-24 NACTO's Urban Bikeway Design Guide quickly emerged as the preeminent resource for designing safe, protected bikeways in cities across the United States. It has been completely re-designed with an even more accessible layout. The Guide offers updated graphic profiles for all of its bicycle facilities, a subsection on bicycle boulevard planning and design, and a survey of materials used for green color in bikeways. The Guide continues to build upon the fast-changing state of the practice at the local level. It responds to and accelerates innovative street design and practice around the nation.
