Observing Gabby: Child Development and Learning, 0-7 Years Cath Arnold, 2021-05-14 This book is about Gabby, an inquisitive girl who leads her own learning very effectively with support from the adults in her life. The author, her grandmother, draws on seven years of data from diaries, photos and Gabby's own writing to consider her development and learning when cared for by both her parents and grandparents. Gabby builds on her experiences with her Latvian mother, English father and her elder sister as she faces and deals with transitions as she grows up. The chapters are presented in a chronological order as a 'running record' going from 0-1 year right through to 6-7 years and can be analysed through a range of theories and frameworks. With chapters considering theory and the data separately the reader can reach their own conclusions on child development before exploring the author's analyses. Each chapter also considers the relevance of Ofsted's Intent, Implementation and Impact framework and other theories and schemas. This book about one child's early development and learning is a fascinating insight into how young children learn for those studying or working in the early

years field. It includes access to an online learning centre of video clips to bring the descriptions to life and provide further insight into Gabby's development. This book is a testament to the power of quiet, attentive observation and its application to a range of disciplines beyond the therapeutic. 'Observing Gabby' will be of interest to Early Years practitioners who are keen to provide a setting conducive to holistic education, and those interested in the links between emotional well-being and learning. Sarah Fielding, Infant Observation This carefully structured text will be helpful for anyone teaching or studying child development particularly with the addition of video materials to view alongside the book. Mary Briggs FRSA, CMathTeach, APECS, SFHEA, FCCT, Principal Lecturer and Programme Lead for Childhood and Education (ECS and Ed Studies), Oxford Brookes University, UK This rich account of Gabby's early childhood development takes the reader on an inspiring journey. Shirley Allen, School of Health and Education, Middlesex University I would heartily recommend this book to any early years practitioner, who wants to better understand child development, improve the quality of their child observations and to develop their skill in linking the two seamlessly. Andrea Layzell, Project Lead and

Tutor, Bradford Birth to 19 Teaching School Alliance Dr Cath Arnold has worked in the field of Early Childhood for over 40 years, as a practitioner/teacher, researcher, lecturer and author. Her particular interests include child study; schemas and parental involvement. This is her fifth book focussing on close observation of the spontaneous actions of young children.

100 Things to Learn Before You're 10 Gail Hugman,2017-03-29 '100 Things to Learn before you're 10' is an educational book to help parents. Drawing on 40 years teaching experience, it explains why every child would benefit from the little extra help it provides during their formation years. This book is packed with examples, activities, insights and stories. It helps show you how to make sure your children learn the skills they need to get the most out of school and life. Give your child what they really need so that they become happier, more confident and self assured as they learn. They will grow to be well rounded adults! It is during the first 12 years after birth that each life develops the framework for its future. Parents who are juggling the demands of modern life and work, while they are

raising their children ask many questions. They may often feel their children ‘could do better’ and become very concerned if a child’s school report highlights this. However, many parents aren’t confident with changing children’s attitudes, what to teach or how to really motivate and encourage them. Especially if the children have ‘switched off’ and no longer respond to what their parents say. This book addresses these issues and questions and looks at the reasons why so many children underperform at school and what can be done about aligning them at core, so that they stay connected to the positive influences that are in them at birth. It puts forward tried and tested lessons, tools and strategies that have been developed during forty years of teaching experience and have been repeatedly proven effective with children.

Child Development Celia Anita Decker, 2019-01-14 Organized to follow the textbook on a chapter-by-chapter basis, the Child Development Workbook provides questions to help the student review the material presented in the chapter. This supplement is a consumable resource, designed with perforated pages so that a given chapter can be removed and turned in for grading or checking.

WEEK BY WEEK, PLANS FOR DOCUMENTING CHILDREN'S DEVELOPMENT WITH PROFESSIONAL

ENHANCEMENT BOOKLET Barbara Ann Nilsen, 2007-07 Week by Week: Plans for Documenting Children's Development, 4e is a reference that not only presents the technical aspects of many various methods of documentation, it also reviews domains of development and the efficiency of each method to capture important information. Early childhood professionals should be keeping written records for every child in their group, documenting events, achievements, and concerns. There are many methods or types of documentation to use. The dilemma of both child development learners and professionals is how to manage detailed, meaningful documentation while attending to all the functions that they need to perform to keep children safe and actively involved in learning. This book is an all-purpose guide for learners and practitioners to gather meaningful developmental information. The new online companion contains forms and additional resources that will assist in using the child assessments to guide curriculum planning. Also added to this new edition are "It Happened To Me" vignettes that illustrate key points and are both entertaining as well as illustrative of the experiences of real professionals. It also includes an expanded discussion of the implications of No Child Left Behind and

authentic assessment by portfolio documentation. The book can be useful for courses in observation methods, child development, curriculum planning and practicum. This reference is a must-have that provides a year's plan for gathering developmental data on every child; something every classroom teacher needs.
