33 Men Jonathan Franklin,2011-02-14 Award-winning journalist Jonathan Franklin chronicles the harrowing account of the 33 Chilean miners who were trapped underground for fourteen weeks in the fall of 2010. A resident of Chile since 1994, award-winning investigative reporter Jonathan Franklin gained access to the miners, their families, rescuers, and government officials that other journalists could only dream of. He developed such a bond of trust with the miners that they described in great detail the dramatic first seventeen days of their confinement. Once the miners were rescued, Franklin interviewed virtually all of them—at their homes, at his house, on horseback, and at the beach. The result is *33 Men*, the most authoritative book on the Chilean mine disaster. Written with the author's renowned eye for detail, it captures the remarkable story of the miners who grasped the essence of the human spirit in order to survive their entrapment, and the men and women who literally moved a mountain to set them free.

Miracle in the Mine José Henríquez,2011-10-11 On October 13, 2010, millions of television viewers on five continents literally stopped everything to watch the amazing rescue of 33 men trapped underground in the mine of San José de Copiapó in northern Chile. What had seemed at first a hopeless tragedy later became a triumph of human effort, courage, perseverance, and expertise. For 17 excruciating days no one knew whether any of the miners had survived the collapse of the mine shaft, nor were the surviving miners aware of any rescue attempts. They spent a total of 69 days trapped underground. And it was there, in that frightening cavern, that one man took on the responsibility of encouraging the others and use the tragedy as an opportunity to share his faith. *Miracle in the Mine* is the story of José Henríquez. The testimony of a man who was no stranger to danger even before he found himself trapped 2,300 feet under the earth in the San José mine. A man who has unequivocally demonstrated his integrity, courage, and moral strength both before, during, and after the mining accident, and who is now using this experience to inspire the world.

Hope Underground Carlos Parra Diaz,2011-09-28 Thirty-three miners—trapped beneath the Chilean desert—their situation, at first, seemed hopeless. Yet instead of abandoning hope, the miners, their families, communities of faith, the Chilean government and rescue workers united in an effort to achieve the impossible. What drove these people to defy failure and persevere against all odds? How did a small, white butterfly, a wayward probe, and a '34th miner' all play a significant role in the unfolding of this incredible story? While most reports of this stirring drama focus on what human effort can achieve, *Hope Underground* reveals the spiritual nature of the miners' experience, highlighting amazing details of how God's providence turned a potential tragedy into the most successful mining rescue of all time.

Deep Down Dark Héctor Tobar,2015 August 2010: the San Jose mine in Chile collapses trapping 33 men half a mile underground for 69 days. Faced with the possibility of starvation and even death, the miners make a pact: if they survive, they will only share their story collectively, as 'the 33'. 1 billion people watch the international rescue mission. Somehow, all 33 men make it out alive, in one of the most daring and dramatic rescue efforts even seen.

Buried Alive! Elaine Scott,2012-04-17 In August 2010, thirty-three miners were buried alive, two thousand feet below the surface of the earth. After seventeen tense days, just as hope was nearly gone, rescuers made contact with the men. Joy broke out around the world—all thirty-three men were alive! But it would be long weeks before they emerged from the mine. What did the miners feel, trapped in the steamy darkness so far underground? What did they eat? How did they get along? And most important, how did they survive in those seventeen days when death lingered so near, and after, during the long wait for rescue? This amazing true story about problem-solving, community, and real-life heroes is made kid-friendly by veteran nonfiction writer Elaine Scott. It will inspire for years to come.

Teaming Amy C. Edmondson,2012-03-20 New breakthrough thinking in organizational learning, leadership, and change Continuous improvement, understanding complex systems, and promoting innovation are all part of the landscape of learning challenges today's companies face. Amy Edmondson shows that organizations thrive, or fail to thrive, based on how well the small groups within those organizations work. In most organizations, the work that produces value for customers is carried out by teams, and increasingly, by flexible team-like entities. The pace of change and the fluidity of most work structures means that it's not really about creating effective teams anymore, but instead about leading effective teaming. Teaming shows that organizations learn when the flexible, fluid collaborations they encompass are able to learn. The problem is teams, and other dynamic groups, don't learn naturally. Edmondson outlines the factors that prevent them from doing so, such as interpersonal fear, irrational beliefs about failure, groupthink, problematic power dynamics, and information hoarding. With Teaming, leaders can shape these factors by encouraging reflection, creating psychological safety, and overcoming defensive interpersonal dynamics that inhibit the sharing of ideas. Further, they can use practical management strategies to help organizations realize the benefits inherent in both success and failure. Presents a clear explanation of practical management concepts for increasing learning capability for business results Introduces a framework that clarifies how learning processes must be altered for different kinds of work Explains how Collaborative Learning works, and gives tips for how to do it well Includes case-study research on Intermountain healthcare, Prudential, GM, Toyota, IDEO, the IRS, and both Cincinnati and Minneapolis Children's Hospitals, among others Based on years of research, this book shows how leaders can make organizational learning happen by building teams that learn.

Deep Down Dark by Héctor Tobar - A 15-minute Summary & Analysis Instaread,2015-02-17 PLEASE NOTE: This is an unofficial summary and analysis of the book and NOT the original book. *Deep Down Dark by Héctor Tobar - A 15-minute Summary & Analysis* Inside this Instaread: • Summary of entire book • Introduction to the Important People in the book • Analysis of the Themes and Author's Style Preview of this Instaread: *Deep Down Dark* is a narrative nonfiction book by journalist and novelist Héctor Tobar. The book tells the story of thirty-three miners trapped in a caved-in mine in northern Chile starting on August 5, 2010. They stayed underground for sixty-nine days. The miners' personal stories of their months trapped in the mine are complemented by tales of what the miners' families and the public experienced on the surface during the ordeal, as well as by an in-depth recounting of the successful rescue effort. The San José copper mine in northern Chile was over a hundred years old, and the miners working there were aware that it was not in optimal condition. The men complained about the conditions to their general manager, Carlos Pinilla, but he was not responsive. Still, they needed money, and mining jobs were relatively lucrative. Those working in the mine on August 5, 2010 were all men...

Buried Alive Manuel Pino Toro,2011-03-29 On August 5, 2010, a tunnel in the gold and copper mine in the Atacama Desert in Chile collapsed, with all of its miners trapped underground. For days, the families waited breathlessly as percussion drills searched out signs of life. Finally, a note came back from below--the miners were alive and safe. Now the rescue crew needed to burrow through 2300 feet of solid rock to get them out. For nine weeks, the world watched as Chile threw all of its resources into the effort. Televisions flashed images of worried families holding vigil night and day and of Chile's newly elected President Pinera making their recovery his personal crusade. What the cameras didn't reveal was the behind-the-scenes intrigue: the corruption that led to faulty construction of the tunnel in the first place; how the men lived in a muddy and humid environment where the temperature was unbearably hot; how the rescue effort became a political

campaign to raise the president's sagging numbers; and the abundant hope necessary to sustain the men in their underground captivity. Author Manuel Pino takes us into his native Chile and, drawing on direct access to the miners and their families, weaves a rich narrative of extraordinary survival and triumph.

Chile in Transition Roland Benedikter,Katja Siepmann,2015-07-14 The economic, political and social situation in Chile shows a country in transition. Some observers anticipate a broad “reboot” of the nation. While Chile is still seen by many as an example of progress in South America and of developmental potential in the global South, it faces a complex political constellation, particularly in the aftermath of the re-election of Michelle Bachelet. Many wonder how social and institutional innovations can be incepted without interrupting the country’s remarkable success over the past decades. This book provides an interdisciplinary analysis of Chile’s situation and perspectives. In particular, it addresses the questions: What is Chile’s real socio-political situation behind the curtains, irrespective of simplifications? What are the nation’s main opportunities and problems? What future strategies will be concretely applicable to improve social balance and mitigate ideological divisions? The result is a provocative examination of a nation in search of identity and its role on the global stage. Roland Benedikter, Dr. Dr. Dr., is Research Scholar at the Orfalea Center for Global and International Studies, University of California, Santa Barbara, Senior Research Scholar of the Council on Hemispheric Affairs Washington D.C., Trustee of the Toynbee Prize Foundation Boston and Full Member of the Club of Rome. Katja Siepmann, MA, is Senior Research Fellow of the Council on Hemispheric Affairs Washington D.C., Member of the German Council on Foreign Relations, and Lecturer at the Faculty of Interdisciplinary Cultural Sciences of the European University Frankfurt/Oder. The volume features a Foreword by Ned Strong, Executive Director of the David Rockefeller Center for Latin American Studies, Harvard University, and a Preface by Larry Birns, Director of the Council on Hemispheric Affairs, Washington D.C., and Former Senior Public Affairs Officer of the United Nations’ Economic Commission for Latin America (Santiago, Chile).

Case Studies in Public Health Preparedness and Response to Disasters Linda Y Landesman,Isaac B. Weisfuse,2013-08-02 From extreme weather events such as Superstorm Sandy, man-made tragedies like the Madrid train bombings, the threat of bioterrorism, and emerging infections such as the H1N1 pandemic flu, disasters are creating increasingly profound threats to health of populations around the globe. Through a presentation of 16 case studies of events from natural disasters to pandemic infection, the authors examine the broad range of public health scenarios through the lens of emergency preparedness and planning. This text demonstrates the application of public health preparedness competencies established by the Association of Schools of Public Health (ASPH). It is designed for students across a wide spectrum of health and safety disciplines, and makes an ideal complement to any text on disaster preparedness or public health leadership, or can be used as a standalone text. --
