Chimpanzees of the Lakeshore Toshisada Nishida, 2011-12-01 Chimpanzees are humanity's closest living relations and are of enduring interest to a range of sciences, from anthropology to zoology. In the West, many know of the pioneering work of Jane Goodall, whose studies of these apes at Gombe in Tanzania are justly famous. Less well-known, but equally important, are the studies carried out by Toshisada Nishida on the eastern shore of Lake Tanganyika. Comparison between the two sites yields both notable similarities and startling contrasts. Nishida has written a comprehensive synthesis of his work on the behaviour and ecology of the chimpanzees of the Mahale Mountains. With topics ranging from individual development to population-specific behavioural patterns, it reveals the complexity of social life, from male struggles for dominant status to female travails in raising offspring. Richly illustrated, the author blends anecdotes with powerful data to explore the fascinating world of the chimpanzees of the lakeshore.

Chimpanzees Daniel A. Greenberg, 2001 Describes the life of chimpanzees, including social structure, reproduction and child rearing, use of tools and ability to solve problems, and loss of habitat.

A Troop of Chimpanzees Richard Spilsbury, 2012-07 Explores the behaviors and daily life of a chimpanzee troop, as well as their habitat, environmental threats, and the advantages of group living.

Chimpanzee Behavior in the Wild Toshisada Nishida, Koichiro Zamma, Takahisa Matsusaka, Agumi Inaba, William C. McGrew, 2010-09-15 Where We Stand Field workers—scientists of animal (including human!) behavior in nature—have long been fascinated by wild chimpanzees. A person who once has studied wild chimpanzees will be eager to observe them again. A person who

has studied them twice will make every effort to continue the study, unless prevented from doing so. In short, behavioral primatology is addictive! Many people, among them Jane Goodall, Richard Wrangham, and I, do not regret that they have dedicated their whole lives to the study of wild chimpanzees. This is because the apes' behavior is always challenging: chimpanzees are cheerful, charming, playful, curious, beautiful, easygoing, generous, tolerant, and trustworthy most of the time, but also are cautious, cunning, ugly, violent, ferocious, blo- thirsty, greedy, and disloyal at other times. We human beings share both the light and dark sides with our closest living relatives. For decades, we have documented huge across-population variation in behavior, as well as within-population variation. Cultural biology (now called cultural pri- tology), as proposed 60 years ago by Kinji Imanishi, recently has flourished.

My Chimp Friday Hester Mundis, 2011-10-04 Rachel can't imagine why Bucky Greene, a scientist friend of her father's who's developing genetically engineered bananas, would show up at their New York City apartment in the middle of the night to leave a baby chimpanzee with them for a week -- or why they absolutely, positively can't tell anyone about it. What could possibly be top secret about an adorable chimp like Friday? Rachel hasn't a clue, but when Friday turns out to be really, inexplicably intelligent (Rubik's Cube's a snap) -- and Bucky Greene turns up really, inexplicably dead (he slipped on his own banana peel) -- she suspects serious monkey business afoot. And when chimp-nappers step into the picture, getting to the bottom of Friday's top secret before it's too late becomes a delightfully madcap mystery -- with Rachel in a riotous, nonstop race for survival of the fittest. Written by four-time Emmy-nominated writer and acclaimed humorist Hester Mundis, who raised a chimp of her own in her Manhattan apartment, this is a wonderfully funny -- and heartfelt -- novel about endangered species, corporate espionage, and going bananas in more

ways than one.

Chimpanzee Jinny Johnson,2007 Introduces the social behavior, feeding and reproductive habits, and family life of chimpanzees, both in their native habitats in the wild and in the zoo.

Nim Chimpsky Elizabeth Hess,2008 Chronicles an experiment with a young chimpanzee who was brought up with a human family and taught to use sign language proficiently, until the funding for the study ended and he spent two decades shuttled in and out of various facilities.

Chimpanzees Rebecca Steffoff,2004 Discusses the evolution, biology, life cycle, and social and mating and behavior of chimpanzees.

Chimpanzee: Brainy Beast Paige V. Polinsky,2016-08-15 Being a brainy beast is just one of the things that make chimpanzees superstars! Did you know chimps make their own tool kits or that a chimp is as tall as an average woman? This fun and fact-packed title with high-impact visuals, including maps and infographics, will keep kids engaged as they learn all about chimpanzees. Aligned to Common Core Standards and correlated to state standards. Super Sandcastle is an imprint of Abdo Publishing, a division of ABDO.

Chimpanzees Ruth Owen,2011-07-01 Presents information about chimpanzees and how they demonstrate intelligence by making tools, participating in organized hunting, and communicating.

Chimpanzee Roams the Forest Gladys Conklin,1970 Describes briefly a young chimp's growth to adulthood, his leaving the mother-group, choosing a mate, and becoming leader of his own group.

Reuben - The Savage Prisoner Sandra Lynch-Bakken,2015-11-23 For 18 years... a lone chimpanzee lives an isolated life, bringing on fits of insanity, neurosis and self-mutilation. Then one day the cage door opens and in runs another chimpanzee. It's the first ape Reuben has ever seen. Intelligent, strong, gentle and caring - Reuben and Jimmy Joe are soon joined by two other chimps

Tyler and Ripley. Before long the foursome form a remarkable friendship. But their joyful bond is short-lived when the townspeople of Savage, Nebraska, mount a brutal tragedy. Based on the author's professional experiences, Sandra Lynch-Bakken chronicles the events leading up to the sad day in September 2005 that forever changed her life and the lives of a captive chimpanzee bachelor group. Plying truth with treachery, joy with sadness, and triumph with defeat Lynch-Bakken weaves an emotional non-fiction tale that advocates for all animals. A story that will touch the hearts of all ages, *Reuben: The Savage Prisoner*, is sure to have animal lovers and proponents cheering for the good guys, the wrongly accused, and this amazing species that share over 98 per cent of our genetic makeup.

The Chimps of Fauna Sanctuary Andrew Westoll, 2011-05-10 The "moving" true story of a woman fighting to give a group of chimpanzees a second chance at life (People). In 1997, Gloria Grow started a sanctuary for chimps retired from biomedical research on her farm outside Montreal. For the indomitable Gloria, caring for thirteen great apes is like presiding over a maximum-security prison, a Zen sanctuary, an old folks' home, and a New York deli during the lunchtime rush all rolled into one. But she is first and foremost creating a refuge for her troubled charges, a place where they can recover and begin to trust humans again. Hoping to win some of this trust, journalist Andrew Westoll spent months at Fauna Farm as a volunteer, and in this "incisive [and] affecting" book, he vividly recounts his time in the chimp house and the histories of its residents (Kirkus Reviews). He arrives with dreams of striking up an immediate friendship with the legendary Tom, the wise face of the Great Ape Protection Act, but Tom seems all too content to ignore him. Gradually, though, old man Tommie and the rest of the "troop" begin to warm toward Westoll as he learns the routines of life at the farm and realizes just how far the chimps have come. Seemingly simple things like

grooming, establishing friendships and alliances, and playing games with the garden hose are all poignant testament to the capacity of these animals to heal. Brimming with empathy and entertaining stories of Gloria and her charges, *The Chimps of Fauna Sanctuary* is an absorbing, bighearted book that grapples with questions of just what we owe to the animals who are our nearest genetic relations. “A powerful look at how we treat our closest relatives.” —The Plain Dealer “I knew the prison-like conditions of the medical research facility from which Gloria rescued these chimpanzees; when I visited them at their new sanctuary I was moved to tears. . . . Andrew Westoll is a born storyteller: *The Chimps of Fauna Sanctuary*, written with empathy and skill, tenderness and humour, involves us in a world few understand. And leaves us marveling at the ways in which chimpanzees are so like us, and why they deserve our help and are entitled to our respect.” —Dr. Jane Goodall “This book will make you think deeply about our relationship with great apes. It amazed me to discover the behaviors and feelings of the chimpanzees.” —Temple Grandin, author of *Animals in Translation*

Chimpanzees Gareth Editorial Staff, 2004-01-04 Discusses the physical characteristics, social behavior, eating habits, and life cycle of chimpanzees.

Save the Chimpanzee Louise Spilsbury, 1900-01-01 Arguably the most intelligent of nonhuman animals, chimpanzees are endlessly fascinating. Sadly, their population has been drastically reduced over the past 50 years. This book explains what makes these animals so interesting, the dangers they grapple with, and a number of conservationist efforts.

Saving Manno Spencer Sekyer, 2019-04-02 An inspiring and uplifting memoir about one small-town teacher’s eye-opening travels around the world and his relentless efforts to rescue a chimp in danger. As a child, Spencer Sekyer’s world was a simple one. He grew up in a small town, where

many of his days were spent hunting in the woods and pursuing his dream of becoming a professional athlete. But when his athletic career ended, he found himself seeking new goals. Spencer returned to school and became a teacher. Realizing he still had much to learn about the world, Spencer set out to explore its most dangerous areas. He traveled to Sierra Leone to volunteer in a local school, followed by trips to the West Bank, Afghanistan, and Haiti. Each time, Spencer returned home a little wiser, a little more emotionally mature, and a little more ready to give back to a world that had given him so much. In Duhok, Kurdistan, Spencer's journey took a new turn. After stumbling into a local zoo, Spencer formed an unlikely bond with Manno, a young chimpanzee who had been kidnapped from his family in central Africa and sold into captivity. Determined to get Manno back to his home, Spencer began to investigate the shadowy, dangerous world of global animal trafficking. Facing resistance at every turn, and with ISIS closing in on Duhok, Spencer finally set in motion an international effort to get his friend to safety, before it was too late. Bursting with compassion, inspiration, and courage, *Saving Manno* is a testament to the fact that every one of us has the power to change lives and make the world a better place.

Chongo the Chimp Accord Publishing, Andrews McMeel Publishing, 1999-08 Chimpanzee has Eyeball Animation reg; for hours of fun and giggles. Favorite Group: The Monkees Favorite Food: Fruits, leaves & occasionally meats. Also fond of ants and termites. Adult Size: 100 to 175 pounds (45 to 79 kg.) and 3-3/4 to 5-1/2 feet (1.1 to 1.7 m) tall standing erect. Weird Fact: Chimpanzees are among the noisiest of jungle dwellers. They shriek and scream, drum on trees, slap the ground and keep up an almost constant hooting and muttering.

The Boy who Spoke Chimp Jane Yolen, 1981 Stranded in the coastal mountains following a devastating California earthquake, a 12-year-old boy and the chimpanzee he rescues from a wrecked van communicate through sign language as they struggle to survive.

Starting from Scratch John Matthews, 2010-10-28 This book compares the beginning of symbolic thought in human infancy with that of our close primate relatives, the chimpanzees. The author investigates the precursors of symbolism by studying the actions and interactions of a small group of these intelligent, non-human primates who live in Singapore Zoo. Drawing upon his years of detailed observations, Matthews offers an in-depth analysis and interpretation of chimp behaviour to present an unprecedented account of the beginnings of symbolic thought. The book shows that the actions the chimpanzees perform have structural and semantic similarities with the actions of emergent expression and representation we find in human infancy. Of great importance is the finding that chimpanzee mark-making activity is not an artefact of human interference, but part of chimpanzee culture. Young chimpanzees seem to be introduced to acts of pretence and imagination by older and more experienced ones and taught the rudiments of expression, representation and symbolism. The implications for our understanding of symbolism, language, art and education are enormous, as are those about our origins and our place within nature. The book is written in an accessible style for both specialist and non-specialist readers, and illustrated with the author's drawings and photographs.
