Postiglione,Chih-yu Shih,Nicholas Tapp,Luc Changlei Guo,2014-07-29 With its easy-to-use format, this book provides a collection of annual data on China's 56 ethnic groups. It is a resource book that profiles the demography, employment and wages, livelihood, agriculture, industry, education, science and technology, culture, sports, and public health for each of these ethnic groups. This material, which is compiled from a variety of sources, will be of great value to researchers, businesses, government agencies, and news media. In this book, data are presented on an ethnic group-by-ethnic group basis, and the ethnic groups are ordered alphabetically, from the Achang to the Zhuang. Though most of the data are as of 2011 – the latest year when our research was conducted, we also provide some historical data for a few of indicators. This is intended to help readers to conduct time-series comparisons and analyses.

China Ethnic Statistical Yearbook 2020 Rongxing Guo,2020-09-10 This fully updated edition of the China Ethnic Statistic Yearbook, comprised of entirely original research, presents data on the socioeconomic situation of China's 56 ethnic groups. Although the majority of China's population is of the Han nationality (which accounts for more than 90% of China's population), the non-Han ethnic groups have a population of more than 100 million. China has officially identified, except for other unknown ethnic groups and foreigners with Chinese citizenship, 55 ethnic minorities. In addition, ethnic minorities vary greatly in size. With a population of more than 15 million, the Zhuang are the largest ethnic minority, and the Lhoba, with a population of only about three thousand, the smallest. China's ethnic diversity has resulted in a special socioeconomic landscape for China itself. How different have China's ethnic groups been in every sphere of daily life and economic development during China's fast transition period? In order to answer these questions, we have created a detailed and comparable set of data for each of China's ethnic groups. This book presents, in an easy-to-use format, a broad collection of social and economic indicators on China's 56 ethnic groups. This useful resource profiles the general social and economic situations for each of these ethnic groups. These indicators are compiled and estimated based on the regional and local data gathered from a variety of sources up to 2016 with up to date analysis. This Yearbook also includes a new chapter on China's spatial (dis)integration as a multiethnic paradox.

China's New Sources of Economic Growth: Vol. 1 Ligang Song,Ross Garnaut,Cai Fang,Lauren Johnston,2016-07-21 China's change to a new model of growth, now called the 'new normal', was always going to be hard. Events over the past year show how hard it is. The attempts to moderate the extremes of high investment and low consumption, the correction of overcapacity in the heavy industries that were the mainstays of the old model of growth, the hauling in of the immense debt hangover from the fiscal and monetary expansion that pulled China out of the Great Crash of 2008 would all have been hard at any time. They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries, extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model. China's economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits. This year's Update explores the challenge of the slowdown in growth and the change in economic structure. Leading experts on China's economy and environment review change within China's new model of growth, and its interaction with ageing, environmental pressure, new patterns of urbanisation, and debt problems at different levels of government. It illuminates some new developments in China's economy, including the transformational potential of internet banking, and the dynamics of financial market instability. China's economic development since 1978 is full of exciting change, and this year's China Update is again the way to know it as it is happening.

Unsustainable Transport and Transition in China Becky PY Loo,2018-01-02 This book discusses various transport sustainability issues from the perspective of developing countries, exploring key issues, problems and potential solutions for improving transport sustainability in China. It first reviews the current transport sustainability baselines in the three key dimensions of environmental, economic and social sustainability, via an international comparison encompassing both developed and developing countries in different world regions. Then, with a time frame up to 2030, the study groups 100 major Chinese cities according to their baseline conditions, projected population and economic growth, and common sustainability challenges in passenger transport. A systematic attempt is made to discuss the characteristics, strengths and weaknesses of various emerging sustainable transport strategies, including the metro systems, bus rapid transit, light rail, bicycles (and e-bicycles), electric vehicles and walking. Based on the different city clusters identified, the study then explores the opportunities and constraints of introducing a range of emerging sustainable transport strategies through both statistical analysis and detailed fieldwork. Future directions and challenges are identified based on official documents, onsite observations and interviews with local people. The study concludes with thoughts on sustainable transport in smart cities, the importance of governance, local participation, internal and external city movements, and towards a holistic sustainable transport plan. Unsustainable Transport and Transition in China will be of great interest to scholars interested in carbon emissions, climate change, environmental policy, planning, road safety, sustainability, transportation and urban studies, and is relevant to China and other developing countries.

China's ethnic diversity has resulted in a special socioeconomic landscape for China itself. However, till presently, a complete socioeconomic picture of China's ethnic groups – especially of its smallest ethnic minorities – still remained unclear. Markets Over Mao Nicholas R Lardy,2014-09-10 China's transition to a market economy has propelled its remarkable economic growth since the late 1970s. In this book, Nicholas R. Lardy, one of the world's foremost experts on the Chinese economy, traces the increasing role of market forces and refutes the widely advanced argument that Chinese economic progress rests on the government's control of the economy's commanding heights. In another challenge to conventional wisdom, Lardy finds little evidence that the decade of the leadership of former President Hu Jintao and Premier Wen Jiabao (2003–13) dramatically increased the role and importance of state-owned firms, as many people argue. This book offers powerfully persuasive evidence that the major sources of China's growth in the future will be similarly market rather than state-driven, with private firms providing the major source of economic growth, the sole source of job creation, and the major contributor to China's still growing role as a global trader. Lardy does, however, call on China to deregulate and increase competition in those portions of the economy where state firms remain protected, especially in energy and finance.

Hydroclimatic Extremes: Human-Natural System Adaptation and Impacts Chuanfu Zang,Zhenzhong Zeng,Fei Tian,Patrick Laux,Ganquan Mao,2023-03-29

China Gungwu Wang,Yongnian Zheng,2013 China has achieved significant socio-economic progress and has become a key player on the international stage after several decades of open-door and reform policy. Looking beyond China's transformation, this book focusses on the theme of governance which is widely regarded as the next most critical element to ensure that China's growth remains sustainable.Today, China is confronted with a host of pressing challenges that call for urgent attention. These include the need to rebalance and restructure the economy, the widening income gaps, the poor integration of migrant populations in the urban areas, insufficient public housing and healthcare coverage, the seeming lack of political reforms and the degree of environmental degradation. In the foreign policy arena, China is likewise under pressure to do more to address global concerns while not appearing to be overly aggressive. The next steps that China takes would have a great deal to do with governance, in terms of how it tackles or fails to address the myriad of challenges, both domestic and foreign.China: Development and Governance, with 57 short chapters in total, is based on up-to-date scholarly research written in a readable and concise style. Besides China's domestic developments, it also covers China's external relations with the United States, Japan, Korea and Taiwan. Non-specialists, in particular, should find this volume accessible and useful in keeping up with fast-changing developments in East Asia.

Globalization and Public Sector Reform in China Kjeld Erik Brødsgaard,2014-04-24 This book analyses public sector reform comprehensively in all parts of China's public sector – government bureaucracy, public service units and state-owned enterprises. It argues that reform of the public sector has become an issue of great concern to the Chinese leaders, who realize that efficient public administration is key to securing the regime's governing capacity and its future survival. The book shows how thinking about public sector reform has shifted in recent decades from a quantitative emphasis on 'small government', which involved the reduction in size of what was perceived as a bloated bureaucracy, to an emphasis on the quality of governance, which may result in an increase in public sector personnel. The book shows how, although Western ideas about public sector reform have had an impact, Chinese government continues to be best characterized as 'state capitalism', with the large state-owned enterprises continuing to play an important – and increasing – role in the economy and in business. However, state-owned enterprises no longer provide care for large numbers of people from the cradle to the grave – finding an alternative, efficient way of delivering basic welfare and health care is the big challenge facing China's public sector.

Manipulating Globalization Ling Chen,2018-06-12 The era of globalization saw China emerge as the world's manufacturing titan. However, the made in China model—with its reliance on cheap labor and thin profits—has begun to wane. Beginning in the 2000s, the Chinese state shifted from attracting foreign investment to promoting the

technological competitiveness of domestic firms. This shift caused tensions between winners and losers, leading local bureaucrats to compete for resources in government budget, funding, and tax breaks. While bureaucrats successfully built coalitions to motivate businesses to upgrade in some cities, in others, vested interests within the government deprived businesses of developmental resources and left them in a desperate race to the bottom. In *Manipulating Globalization*, Ling Chen argues that the roots of coalitional variation lie in the type of foreign firms with which local governments forged alliances. Cities that initially attracted large global firms with a significant share of exports were more likely to experience manipulation from vested interests down the road compared to those that attracted smaller foreign firms. The book develops the argument with in-depth interviews and tests it with quantitative data across hundreds of Chinese cities and thousands of firms. Chen advances a new theory of economic policies in authoritarian regimes and informs debates about the nature of Chinese capitalism. Her findings shed light on state-led development and coalition formation in other emerging economies that comprise the new globalized generation.
