Bit Of A Blur Alex James,2010-09-02 I was the Fool-king of Soho and the number-one slag in the Groucho Club, the second drunkest member of the world's drunkest band. This was no disaster, though. It was a dream coming true.' For Alex James, music had always been a door to a more eventful life. But as bass player of Blur - one of the most successful British bands of all time - his journey was more exciting and extreme than he could ever have predicted. In Bit of a Blur he chronicles his journey from a slug-infested flat in Camberwell to a world of screaming fans and private jets - and his eventual search to find meaning and happiness (and, perhaps most importantly, the perfect cheese), in an increasingly surreal world.

Technocreep Thomas P. Keenan,2014-09-13 "Technology is rapidly moving into our bodies," writes cyber expert Keenan, "and this book gives a chilling look ahead into where that road may lead us - on a one way trip to the total surrender of privacy and the

commoditization of intimacy.” Here is the definitive dissection of privacy-eroding and life-invading technologies, coming at you from governments, corporations, and the person next door. Take, for example, “Girls Around Me”: a Russian-made iPhone App that allowed anyone to scan the immediate vicinity for girls and women who checked in on Foursquare and had poorly secured Facebook profiles. It combined this information in a way never intended by the original poster. Going to a Disney theme park? Your creepy new “MagicBand” will alert Minnie Mouse that you’re on the way and she’ll know your kid’s name when you approach her. Thinking about sending your DNA off to Ancestry.com for some “genetic genealogy”? Perhaps you should think again: your genetic information could be used against you. With security scares like the Heartbleed bug (which compromised even supposedly safe internet behemoths like Google and Yahoo!) becoming more commonplace, this book is a must-read for anybody who values their privacy in a wired world.

Transnational Family Communication Sondra

Cuban,2017-09-06 This book explores the struggles that immigrant women experience when communicating with their transnational families through information and communication technologies (ICTs). Sondra Cuban recounts the fascinating stories of sixty female immigrants living in Washington state, and explores how gender, social class, nationality, and language influence their ICT usage. She addresses the emotional labor involved in interacting with the families they left behind as well as their ingenious communication systems which challenge the existing research surrounding this unique phenomenon. Early chapters of this book detail the current arguments and theories of transnational family communication in order to propose a new model thereof. Throughout, larger questions of global equality are addressed.

The Future of Text Frode Hegland, 2020-11-09 This book is the first anthology of perspectives on the future of text, one of our most important mediums for thinking and communicating, with a Foreword by the co-inventor of the Internet, Vint. Cerf and a Postscript by the founder of the modern Library of Alexandria, Ismail Serageldin. In a time with astounding developments in computer special effects in movies and the emergence of powerful AI, text has developed little beyond spellcheck and blue links. In this work we look at myriads of perspectives to inspire a rich future of text through contributions from academia, the arts, business and technology. We hope you will be as inspired as we are as to the potential power of text truly unleashed. The New World of Transitioned Media Gali Einav,2014-10-01
The media industry is undergoing an accelerated pace of change, driven in large part by the proliferation of digital platforms. In many cases, the speed of adoption has exceeded our ability to process the impact of these changes on individuals and society at large. This book provides a “behind-the-scenes” look at the media industry’s transition into the digital era and examines its impact on marketing, advertising, innovation and other economic and social activities. The impact of digital technologies on traditional media sectors, such as advertising, video games, film and television is well-documented. Less understood is its effect on our perceptions, thought processes and inter-personal relationships. Social media, for example, represents a fundamental change in the ways we interact with media, communicate with each other and even present ourselves to the world. This has shaped the way we communicate with institutions and brands. Similar to the first “Transitioned Media” book, *Transitioned Media: A Turning Point into the Digital Realm*, this book combines media industry leaders and academics to explore various transformative trends and issues. Themes include measuring cross-platform behaviour, artificial intelligence in journalism, the evolution of video games, digital media and physical space, the mobile use trends, social media and the corporate world, the changes in the television and newspaper business and the evolving relationship between advertisers and target audiences. The varied backgrounds of contributors and array of topics make for a unique and insightful point of view.

How to Fight Inequality Ben Phillips, 2020-09-29 Inequality is the crisis of our time. The growing gap between a few at the top and the rest of society damages us all. No longer able to deny the crisis, every government in the world is now pledged to fix it – and yet it keeps on getting worse. In this book, international anti-inequality campaigner Ben Phillips shows why winning the debate is not enough: we have to win the fight. Drawing on his insider experience, and his personal exchanges with the real-life heroes of successful movements, he shows how the battle against inequality has been won before, and he shares a practical plan for defeating inequality again. He sets a route map for us to overcome deference, build our collective power, and create a new story. Most books on inequality are about what other people ought to do about it – this book is about why winning the fight needs you. Tired of feeling helpless in the face of spiralling inequality? Want to know what you can do about it? This is the book for you.
