**Sri Caitanya-charitamṛta, Ādi-līlā** His Divine Grace A. C. Bhaktivedānta Swami Prabhupada, *Sri Chaitanya-charitamṛta* is the main work on the life and teachings of Sri Chaitanya Mahāprabhu, the incarnation of Krishna who appeared in India five hundred years ago. Lord Chaitanya introduced the chanting of the holy names of God as the prescribed method of God-realization for our time. He began what is today called the Hare Krishna movement, since the movement's founder, Srīla Prabhupada, comes in the Chaitanya line of spiritual masters. Lord Chaitanya transformed the face of India in four respects: philosophically, by encountering, defeating and converting the greatest philosophers and thinkers of His day; religiously, by organizing the largest, most widespread theistic movement in India's history; socially, by His strong challenges to the religious inequities of the caste system; politically, by His organization of a massive civil disobedience movement in Bengal, more than four centuries before Gandhi. This English translation with commentary, by His Divine Grace A.C. Bhaktivedānta Swami Prabhupada, reveals his consummate Bengali and Sanskrit scholarship, his intimate familiarity with the precepts of Sri Chaitanya, and his pure devotion to God.

*Language As Symbolic Action* Kenneth Burke,2023-04-28 From the Preface:The title for this collection was the title of a course in literary criticism that I gave for many years at Bennington College. And much of the material presented here was used in that course. The title should serve well to convey the gist of these various pieces. For all of them are explicitly concerned with the attempt to define and track down the implications of the term symbolic action, and to show how the marvels of literature and language look when considered from that point of view.

*Sports Cardiology Casebook* Antonio Pelliccia,2009-07-21 Comparatively little is known about the risk of sudden death associated with exercise in young competitive athletes, and whether the benefits of sports activity outweigh the hazards of exercise-related fatal events is a clinical dilemma. This is only a small part of the story, however, as there are considerable effects of exercise whether it be at a competitive level or on a 'leisure' level on patients of all ages. This in itself is of massive importance to the cardiac patient population as exercise is a key component of effective recovery and recommended as central in the prevention of much cardiac disease.

*Citizen Voices* Louise J. Phillips,Anabela Carvalho,Julie Doyle,2012 A diverse series of studies across Europe and the US are presented, providing readers with empirical insights into the articulation of citizen voices in different national, cultural and institutional contexts.

**A History of Environmental Politics Since 1945** Samuel P. Hays,2000 An overview of contemporary environmental affairs, from 1940s to the present—with an emphasis on nature in an urbanized society, land developments, environmental technology, the structure of environmental politics, environmental opposition, and the results of environmental policy.

**Focus On Wood Joints** ,2004

The Symbolic Earth James G. Cantrill,Christine L. Oravec,2014-07-11 The core dilemma in environmental advocacy may be illustrated by the question, When we communicate about the world, should we stress what we know or what we feel? The contributors to *The Symbolic Earth* argue that it is more important to decide how we should talk about what we know and feel. In their view, the environment is largely a product of how we talk about the world. Because the environment is a social construction, the only hope we have of preserving it is to understand and alter the fundamental ways we discuss it. This collection first examines the ways in which discourse creates environment perceptions. Subjects discussed range from the description of natural scenery to the advocacy of political interest groups, from the everyday interactions of citizens facing environmental crises to the greenwashing of corporate imagemakers, and from the psychology of the mass public to the social constructions of the mass media. The authors include nationally known scholars of environmental history, rhetorical theory, ethnography, communication and journalism studies, public policy, and media criticism.

**Gears of War: Jacinto's Remnant** Karen Traviss,2009 After a brutal fifteen-year war for survival, the Coalition of Ordered Governments is forced to destroy mankind's only remaining city in a final bid to stop the Locust Horde. As the survivors flee Jacinto, they must contend with the last of the Locust, bent on vengeance, as they struggle to stay alive in an icy wilderness. Marcus Fenix, Dom Santiago, and their fellow Gears fight to get Jacinto's refugees to a safe haven but find themselves in a lawless new world where the enemy is human--and as desperate and dangerous as any Locust.-- p.[4] of cover.

**Environmental Justice and Sustainability in the Former Soviet Union** Julian Agyeman,Yelena Ogneva-Himmelberger,2009 An examination of the awareness of environmental and social justice issues in the former Soviet republics--from the Western-style democracies of the Baltic region to the totalitarian regimes of Central Asia--and the resulting activism in those states. The legacy of environmental catastrophe in the states of the former Soviet Union includes desertification, pollution, and the toxic aftermath of industrial accidents, the most notorious of which was the Chernobyl disaster of 1986. This book examines the development of environmental activism in Russia and the former Soviet republics in response to these problems and its effect on policy and planning. It also shows that because of increasing economic, ethnic, and social inequality in the former Soviet states, debates over environmental justice are beginning to come to the fore. The book explores the varying environmental, social, political, and economic circumstances of these countries--which range from the Western-style democracies of the Baltic states to the totalitarian regimes of Central Asia--and how they affect the ecological, environmental, and public health. Among the topics covered are environmentalism in Russia (including the progressive nature of its laws on environmental protection, which are undermined by overburdened and underpaid law enforcement); the effect of oil wealth on Azerbaijan and Kazakhstan; the role of nationalism in Latvian environmentalism; the struggle of Russia's indigenous peoples for environmental justice; public participation in Estonia's environmental movement; and lack of access to natural capital in Tajikistan. *Environmental Justice and Sustainability in the Former Soviet Union* makes clear that although fragile transition economies, varying degrees of democratization, and a focus on national security can stymie progress toward just sustainability, the diverse states of the former Soviet Union are making some progress toward green and environmental justice issues separately.

**Zagat to Go** Zagat Survey,Zagat Survey Staff,2003-11-03 These are the results of the forty restaurant and nightlife guides that Zagat produce yearly, covering cities such as London, Paris, New York, Tokyo and San Francisco to name but a few. To guide the readers to the best watering holes to suit their tastes, moods and budgets, there are a number of category lists, for example, Most Popular, Top Ratings and Best Buys. On the assumption that most people want a quick fix on the places at which they are considering socialising, there are also handy and concise indexes. These guides spotlight both centuries old traditional pubs and trendy, minimalist lounges, sumptuous restaurants and clubs. The diversity of venues means that goths, pre-clubbers, lads, families, hen and stag nights and tourists can all have the best of times.

**Mediating Nature** Taylor & Francis Group,2021-12-13 *Mediating Nature*

considers how technology acts as a mediating device in the construction and circulation of images that inform how we see and know nature. Scholarship in environmental communication has focused almost exclusively on verbal rather than visual rhetoric, and this book engages ecocritical and ecocompositional inquiry to shift focus onto the making of images. Contributors to this dynamic collection focus their efforts on the intersections of digital media and environmental/ecological thinking. Part of the book's larger argument is that analysis of mediations of nature must develop more critical tools of analysis toward the very mediating technologies that produce such media. That is, to truly understand mediations of nature, one needs to understand the creation and production of those mediations, right down to the algorithms, circuit boards, and power sources that drive mediating technologies. Ultimately, *Mediating Nature* contends that ecological literacy and environmental politics are inseparable from digital literacies and visual rhetorics. The book will be of interest to scholars and students working in the fields of Ecocriticism, Ecocomposition, Media Ecology, Visual Rhetoric, and Digital Literacy Studies.

**Hot, Flat, and Crowded 2.0** Thomas L. Friedman, 2009-11-24 A New York Times Book Review Notable Book of the Year A Washington Post Best Book of the Year A Businessweek Best Business Book of the Year A Chicago Tribune Best Book of the Year In this brilliant, essential book, Pulitzer Prize-winning author Thomas L. Friedman speaks to America's urgent need for national renewal and explains how a green revolution can bring about both a sustainable environment and a sustainable America. Friedman explains how global warming, rapidly growing populations, and the expansion of the world's middle class through globalization have produced a dangerously unstable planet--one that is hot, flat, and crowded. In this Release 2.0 edition, he also shows how the very habits that led us to ravage the natural world led to the meltdown of the financial markets and the Great Recession. The challenge of a sustainable way of life presents the United States with an opportunity not only to rebuild its economy, but to lead the world in radically innovating toward cleaner energy. And it could inspire Americans to something we haven't seen in a long time--nation-building in America--by summoning the intelligence, creativity, and concern for the common good that are our greatest national resources. *Hot, Flat, and Crowded 2.0* is classic Thomas L. Friedman: fearless, incisive, forward-looking, and rich in surprising common sense about the challenge--and the promise--of the future.

Extreme Skydiving Rob Waring, 2010 Most people enjoy the sport of sky diving because they get to fall at extremely high speeds, but some people want to go even faster. One man is even experimenting with various methods of increasing his speed. What is he doing to go faster? Is it working?

*The Last Generation* Fred Pearce, 2010-04-13 Climate change is not a matter of gradually increasing temperatures. New scientific findings about how our planet works show that it does not do gradual change. Under pressure, it lurches into another mode of operation. Man-made global warming is on the verge of unleashing unstoppable planetary forces. Biological and geological monsters are being woken, and they will consume us. Virtually overnight Nature's revenge will be sudden and brutal, like a climatic tsunami sweeping across the globe. No question, we are the last generation to live with any kind of climatic stability. In this impassioned report, Fred Pearce travels the world on the story to end them all. Most troubling, while visiting the

places where the action may start: deep in the Amazon, high in the Arctic and among the bogs of Siberia, he uncovers the first signs that nature's revenge is already under way.
