*The Logic of Care* Annemarie Mol, 2008-05-24 \*\*Shortlisted for the BSA Sociology of Health and Illness Book Prize 2010\*\* What is good care? In this innovative and compelling book, Annemarie Mol argues that good care has little to do with 'patient choice' and, therefore, creating more opportunities for patient choice will not improve health care. Although it is possible to treat people who seek professional help as customers or citizens, Mol argues that this undermines ways of thinking and acting crucial to health care. Illustrating the discussion with examples from diabetes clinics and diabetes self care, the book presents the 'logic of care' in a step by step contrast with the 'logic of choice'. She concludes that good care is not a matter of making well argued individual choices but is something that grows out of collaborative and continuing attempts to attune knowledge and technologies to diseased bodies and complex lives. Mol does not criticise the practices she encountered in her field work as messy or ad hoc, but makes explicit what it is that motivates them: an intriguing combination of adaptability and perseverance. *The Logic of Care: Health and the problem of patient choice* is crucial reading for all those interested in the theory and practice of care, including sociologists, anthropologists and health care professionals. It will also speak to policymakers and become a valuable source of inspiration for patient activists.

Consumer Voice and Choice in Long-Term Care Suzanne R. Kunkel, PhD, 2006-06-14 IMPROVE LONG-TERM CARE WITH NEW CUSTOMER PARTICIPATION METHODS Providing clear guidance on how to apply new customer satisfaction models to the quality of long-term care, this collection reviews how consumers contribute to, and assist in, the management of their own long-term care. The latest issues

and ideas are provided for the following aspects of research and management: Development and Planning Strategies Consumer Satisfaction Measurement Models Consumer Satisfaction and Quality Improvement Models Development of Case Management Guidelines From reviewing the important factors and challenges that influence consumer choice to exploring the approaches required to evaluate needs, preferences, and perspectives, this new and valuable resource is a must-have reference for the improvement of long-term care in both the institutional and community settings.

**Risk and Choice in Maternity Care** Andrew Symon, 2006-11-16 This title is directed primarily towards health care professionals outside of the United States. This book explores the complex interrelationship between risk and choice in maternity care, taking a close look at how high and low risk are defined and what impact this has on a woman's ability to exercise informed choices throughout pregnancy. It offers an international collaboration that highlights different perspectives on debated issues, with chapters on maternity care in the UK, United States, Australia, and Ireland contributed by midwives, obstetricians, risk management experts, and sociologists. The aim of this book is to illustrate the changing reality of risk management as it relates to maternity care, and to highlight risk management concerns that may limit the choices available to pregnant women. Clarifies how applications of risk affect the choices pregnant women are able to exercise. Locates pregnancy risk considerations within the overall scheme of risk management. Analyzes practitioners' responses to the requirements of risk management. Presents risk management and choice from the risk manager's perspective, providing an understanding of risk as a macro concept in health care. Highlights medico-legal opinions on exercising choice, underscoring the need for accurate information

and the ability to make informed decisions. Two chapters examine women's perspectives on risk labeling and the impact this has on choice - one in which the concept of safety within maternity care is discussed, and one in which the views of women with defined risk factors are explored and their ability to make choices is evaluated. Two chapters written by health service risk managers discuss the differences between an inner-city approach and a rural approach to the debate surrounding risk and choice. Discusses midwifery's focus on normality in childbirth and considers how this viewpoint affects the risk dialogue, including a chapter on clinical trends in maternity care. An obstetric perspective on risk refutes criticisms of obstetricians as being more likely to impose risk labels and limit choices by discussing how risks and choices are presented and considered within obstetric care. Explores the debate surrounding a woman's right to have a home birth in Ireland, in light of its risk management climate. Two chapters discuss the collaboration between service users, midwives, and obstetricians in Australia regarding the organization and delivery of maternity care, as well as the views concerning risk among indigenous Australians. Perspectives from nurse-midwives in the U.S. discuss the complex relationships among nurse-midwives, obstetricians, and pregnant women with regard to choice, including views on risk within immigrant communities.

The Corporate Directory of US Public Companies 1995 Elizabeth Walsh, 2016-06-11 This valuable and accessible work provides comprehensive information on America's top public companies, listing over 10,000 publicly traded companies from the New York, NASDAQ and OTC exchanges. All companies have assets of more than \$5 million and are filed with the SEC. Each entry describes business activity, 5 year sales,

income, earnings per share, assets and liabilities. Senior employees, major shareholders and directors are also named. The seven indices give an unrivalled access to the information.

**Intercultural Music Therapy Consultation Research** Lisa Margetts, 2022-10-28 Drawing on primary research undertaken in a special school in Belarus, this book provides fresh perspectives on supporting the optimisation of relationships between teaching staff and hard-to-reach children with complex needs through learning and experience based in musical interaction, creativity and play. The book explores sustainable approaches to intercultural music therapy consultation research and sets out a practice-based framework to which relationships between researcher and participants, based on mutual respect and trust are central. Findings and implications are discussed from within wider debates regarding cultural diversity in negotiating collaborative partnerships in music therapy research. Featuring case studies and practical examples, the book offers an insightful and informative resource for academics, scholars, and post-graduate students in music therapy and music education. Those working in the arts, psychological therapies, and undertaking teacher training will also benefit from this volume.

**Choice, Preference, and Disability** Roger J. Stancliffe, Michael L. Wehmeyer, Karrie A. Shogren, Brian H. Abery, 2021-04-18 This book examines choice and preference in the lives of people with disability, focusing on people with intellectual and developmental disabilities. It provides an overview of choice and examines foundational concepts related to choice and preference, including self-determination and supported decision making. Chapters examine a range of critical service and policy issues, such as guardianship, individualized funding, the health care system, and the situation regarding choices for people

with disability in international contexts. In addition, chapters explore issues ranging from the development of preference and choice in childhood to choices in older age and end of life matters. It provides in-depth analysis of particular choices faced at different points across the lifespan. The book concludes with implications for policy and practice. Topics featured in this book include: Supported decision making for adults with intellectual disabilities or acquired brain injury. The role of parents and families in the development of choice-making skills. Preference assessments for individuals who cannot tell us what they prefer. Employment opportunities for people with intellectual disabilities. Sexual and reproductive rights for people with intellectual disabilities. Disability and the choice to become a parent. Choice, Preference, and Disability is an essential resource for researchers, professors, clinicians, therapists, and other professionals as well as graduate students in the fields of developmental and positive psychology, rehabilitation, social work, special education, occupational, speech and language therapy, public health, and healthcare policy.

*Choices in Financing Health Care and Old Age Security* Nicholas Prescott, 1998 In November 1997 the World Bank and Singapore's Institute of Policy Studies sponsored a conference, Financing Health Care and Old Age Security, to assess and identify potential solutions to these concerns. It addressed a topic of concern to nearly every country, developing and industrial, that is, how to deal with the implications of financing medical care and income security for rapidly aging populations. The issues identified and the solutions proposed can provide insight and guidance for policymakers, researchers, and others interested in addressing these challenges now. Of special interest are the contributors' analyses of Singapore's unique, integrated approach to managing social risk, which is based on mandatory individual savings accounts.

**Incentives and Choice in Health Care** Frank A. Sloan, Hirschel Kasper, 2008-05-16 Leading scholars in the field of health economics evaluate the role of incentives in health and health-care decision making from the perspectives of both supply and demand. A vast body of empirical evidence has accumulated demonstrating that incentives affect health care choices made by both consumers and suppliers of health care services. Decisions in health care are affected by many types of incentives, such as the rate of return pharmaceutical manufacturers expect on their investments in research and development, or disincentives, such as increases in copayments patients must make when they visit physicians or are admitted to hospitals. In this volume, leading scholars in health economics review these new and important results and describe their own recent research assessing the role of incentives in health care markets and decisions people make that affect their personal health. The contexts include demand decisions—choices made by individuals about health care services they consume and the health insurance policies they purchase—and supply decisions made by medical students, practicing physicians, hospitals, and pharmaceutical manufacturers. Researchers and students of health economics and policy makers will find this book a valuable resource, both for learning economic concepts, particularly as they apply to health care, and for reading up-to-date summaries of the empirical evidence. General readers will find the book's chapters accessible, interesting, and useful for gaining an understanding of the likely effects of alternative health care policies. Contributors Henry J. Aaron, Ernst R. Berndt, John Cawley, Julie M. Donohue, Donna Gilleskie, Brian R. Golden, Gautam Gowrisankaran, Chee-Ruey Hsieh, Hirschel Kasper, Thomas G. McGuire, Joseph P. **Option B** Sheryl Sandberg,Adam Grant,2017-04-24 #1 New York Times Best Seller Named a Best Book of 2017 by Barnes & Noble and Amazon From Facebook's COO and Wharton's top-rated professor, the #1 New York Times best-selling authors of *Lean In* and *Originals*: a powerful, inspiring, and practical book about building resilience and moving forward after life's inevitable setbacks. After the sudden death of her husband, Sheryl Sandberg felt certain that she and her children would never feel pure joy again. "I was in 'the void,'" she writes, "a vast emptiness that fills your heart and lungs and restricts your ability to think or even breathe." Her friend Adam Grant, a psychologist at Wharton, told her there are concrete steps people can take to recover and rebound from life-shattering experiences. We are not born with a fixed amount of resilience. It is a muscle that everyone can build. Option B combines Sheryl's personal insights with Adam's eye-opening research on finding strength in the face of adversity. Beginning with the gut-wrenching moment when she finds her husband, Dave Goldberg, collapsed on a gym floor, Sheryl opens up her heart—and her journal—to describe the acute grief and isolation she felt in the wake of his death. But Option B goes beyond Sheryl's loss to explore how a broad range of people have overcome hardships

including illness, job loss, sexual assault, natural disasters, and the violence of war. Their stories reveal the capacity of the human spirit to persevere . . . and to rediscover joy. Resilience comes from deep within us and from support outside us. Even after the most devastating events, it is possible to grow by finding deeper meaning and gaining greater appreciation in our lives. Option B illuminates how to help others in crisis, develop compassion for ourselves, raise strong children, and create resilient families, communities, and workplaces. Many of these lessons can be applied to everyday struggles, allowing us to brave whatever lies ahead. Two weeks after losing her husband, Sheryl was preparing for a father-child activity. “I want Dave,” she cried. Her friend replied, “Option A is not available,” and then promised to help her make the most of Option B. We all live some form of Option B. This book will help us all make the most of it.

**Patient Safety and Quality** Ronda Hughes, 2008 Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- *Patient Safety and Quality: An Evidence-Based Handbook for Nurses*. (AHRQ Publication No. 08-0043). - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk/>

**A Better Choice** John C. Goodman, 2015-04-01 Despite having surmounted numerous obstacles, the Affordable Care Act—also commonly known as Obamacare—remains highly controversial and faces ongoing legal and political challenges. The law's staunchest critics want to repeal and replace the entire law, while even its supporters acknowledge that serious changes are needed. The question is: replace it with what? In *A Better Choice: Healthcare Solutions for America*, economist and John C. Goodman answers the question clearly and concisely. For anyone who wants to better understand Obamacare's most serious problems and learn about some of the boldest prescriptions designed to remedy them, Goodman's book is a must-read.

*Birth Settings in America* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Assessing Health Outcomes by Birth Settings, 2020-05-01 The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women.

There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.
