**Doing Your Child Observation Case Study: a Step-By-Step Guide** Cath Arnold,2015-06-16 Many early years students and practitioners can struggle with how to observe children, knowing what makes good observations, as well as how to use them and why they matter so much. This is a very practical 'how to' book on observing young children and preparing a child case study, with helpful guidance on how to go about this, including where and how to begin and proceed; appropriate techniques and related processes as well as possible pitfalls. In addition the book includes examples of good observations which show how your observation can be evaluated, analysed and used. The book covers the whole process of embarking on the study or observation of a child (or children) including sensitive areas or areas to avoid. It begins with choosing a child to study; the ethics of the study; ways of gathering data and tools to use; observations that are useful; examples of short child case studies and longer child case studies; how to select material to include; and, analysing or interpreting the material. One child (Georgia) is used as a focus example throughout the book so that you can really get to grips with how a good child observation study unfolds and develops. Further shorter examples also illuminate the challenges and practicalities of doing your child observation case study.

Pianos, Toys, Music and Noise Andy Hamilton,2021-01-14 Steve Beresford's polymathic activities have formed a prism for the UK improv scene since the 1970s. He is internationally known as a free improviser on piano, toy piano and electronics, composer for film and TV, and raconteur and Dadaist visionary. His résumé is filled with collaborations with hundreds of musicians and other artists, including such leading improvisers as Derek Bailey, Evan Parker and John Zorn, and he has given performances of works by John Cage and Christian Marclay. In this book, Beresford is heard in his own words through first-hand interviews with the author. Beresford provides compelling insight into an extensive range of topics, displaying the broad cultural context in which music is embedded. The volume combines chronological and thematic chapters, with topics covering improvisation and composition in jazz and free music; the connections between art, entertainment and popular culture; the audience for free improvisation; writing music for films; recording improvised music in the studio; and teaching improvisation. It places Beresford in the context of improvised and related musics – jazz, free jazz, free improvisation – in which there is growing interest. The linear narrative is broken up by 'interventions' or short pieces by collaborators and commentators.

She describes in great detail and a flair for the whimsical what her childhood experiences were like growing up in the 1930s and 1940s with her rowdy and adventurous siblings. It's such a unique perspective and one I believe children of most ages can appreciate. The most incredible thing about the book is that all the artwork is done by the authoress herself! It's playful and sweet, and very original. The book is based on her real life experiences and brings us all back to a time when childhood could be truly innocent and carefree.
