HowExpert Guide to Recycling HowExpert, Jen Thilman, 2023-01-03 If you want to learn how to recycle, eliminate disposables, reduce waste & pollution, conserve resources, save energy, and protect the environment, then check out *HowExpert Guide to Recycling*. Have you ever been gaslighted? You know, grossly misled to believe something for the benefit of someone else? Unfortunately, we've all been victims of this for decades by big

corporations, especially the oil industry. They have spent billions to convince us that climate change is our fault. That if we dispose of our trash the right way and lower our carbon footprint, we wouldn't have the environmental problems we are now facing. Nothing could be further from the truth. This guide will show how we've been misled to believe this narrative in order to protect corporate profits and how changing our disposable habits, and fighting misinformation is the best thing we can do to beat climate change. Corporations have lied to keep us buying their products and distracted from the fact that waste and emissions are caused by how they do business. - Single-use plastics are a big money-maker for the fossil fuel industry. - They created the triangle symbol to make us think plastics will recycle, even though that can't easily be done. - Manufacturers choose not to invest in recycled packaging and materials. - Virgin materials mined from Earth are cheaper and often subsidized. - Technology exists to eliminate most of the greenhouse gas emissions they cause. - It's time to fight for the truth and take matters into our own hands. What we buy and how it's made affects how well reduce, reuse, and recycle works. Using the power of our voices and wallets, we can make corporations change how they do business. - They answer to us, the people who buy their products and invest in their stock. - We can insist they take responsibility for the damage they cause. - We have the power to fight climate change at home and in our cities. - I don't know about you, but I'm not ready to leave the health and well-being of my family in the hands of people who I hope will figure this mess out. - We all need to change for the better of our planet and our lives. - There are alternatives to buying disposable goods and packaging. - Buy durable goods and reusable packaging to save money and the planet. - Reduce and reuse packaging. First, eliminate plastic shopping bags. - We can do things differently to change our eating and buying habits. - A lot of trash comes with convenience dining, like packaged and fast foods. - Buying used products reduces wasted energy, materials, and water. - It's time we use our buying power and our votes to change for the better. - Waste of anything - food, energy, goods - needs to be eliminated. - Elect representatives who put people before corporations. - Your voice can create change. Check out HowExpert Guide to Recycling to learn how to recycle, eliminate disposables, reduce waste & pollution, conserve resources, save energy, and protect the environment. About the Author Jen Thilman has been a recycling and zero-waste volunteer for decades, which is how she learned that recycling doesn't always work. She has spent years working in green energy technology and studies sustainable living while she strives for it in her own life. Jen completed training from the Climate Reality Project in June of 2022. Marrying her love for writing and the environment, Jen writes blogs about how to buy sustainable products, recycle everyday items, and save the planet. Jen lives with her wirehaired terrier, Teddy Bear, in the San Francisco Bay Area. She writes non-fiction and fiction in many genres and formats. HowExpert publishes how to guides on all topics from A to Z by everyday experts.

How to Avoid a Climate Disaster Bill Gates, 2021-02-16 #1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.
