Dear Data Giorgia Lupi, Stefanie Posavec, 2016-09-13 Equal parts mail art, data visualization, and affectionate correspondence, Dear Data celebrates the infinitesimal, incomplete, imperfect, yet exquisitely human details of life, in the words of Maria Popova (Brain Pickings), who introduces this charming and graphically powerful book. For one year, Giorgia Lupi, an Italian living in New York, and Stefanie Posavec, an American in London, mapped the

particulars of their daily lives as a series of hand-drawn postcards they exchanged via mail weekly—small portraits as full of emotion as they are data, both mundane and magical. Dear Data reproduces in pinpoint detail the full year's set of cards, front and back, providing a remarkable portrait of two artists connected by their attention to the details of their lives—including complaints, distractions, phone addictions, physical contact, and desires. These details illuminate the lives of two remarkable young women and also inspire us to map our own lives, including specific suggestions on what data to draw and how. A captivating and unique book for designers, artists, correspondents, friends, and lovers everywhere.

A Christmas Carol Charles Dickens, 2015-09-15 From the bustling, snowy streets of 19th-century London to the ghostly apparitions of Christmases past and future, award-winning artist Roberto Innocenti vividly renders not only the authentic detail but also the emotional impact of Charles Dickens's beloved Christmas tale. In both crowded urban scenes and intimate portraits of familiar characters, we gain a sense of the timeless humanity of the tale and perhaps catch a glimpse of ourselves.

Let's Pretend This Never Happened Jenny Lawson, 2013-03-05 The #1 New York Times bestselling (mostly true) memoir from the hilarious author of *Furiously Happy*. "Gaspingly funny and wonderfully inappropriate."—O, The Oprah Magazine When Jenny Lawson was little, all she ever wanted was to fit in. That dream was cut short by her fantastically unbalanced father and a morbidly eccentric childhood. It did, however, open up an opportunity for Lawson to find the humor in the strange shame-spiral that is her life, and we are all the better for it. In the irreverent *Let's Pretend This Never Happened*, Lawson's long-suffering husband and sweet daughter help her uncover the surprising discovery that the most terribly human moments—the ones we want to pretend never happened—are the very same moments that make us the people we are today. For every intellectual misfit who thought they were the only ones to think the things that Lawson dares to say out loud, this is a poignant and hysterical look at the dark, disturbing, yet wonderful moments of our lives. The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice, 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of

criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Mr. Miracle Debbie Macomber, 2014-10-07 NEW YORK TIMES BESTSELLER • Includes a new story by Christina Skye Beloved author Debbie Macomber celebrates the most wonderful time of the year in this heartwarming Christmas novel of romance, hope, and the comforts of home—now a Hallmark Channel original movie! Harry Mills is a guardian angel on a mission: help twenty-four-year-old Addie Folsom get her life back on track—and, if the right moment strikes, help her find love. Posing as a teacher at a local college in Tacoma, Washington, Harry is up to the task, but not even he can predict the surprises that lay in store. After trying to make it on her own, Addie has returned home to Tacoma for the holidays, but this time she plans to stay for good, enrolling in the local community college to earn her degree. What she doesn't plan to do is run into Erich Simmons. Addie and her next-door neighbor, Erich, are like night and day. Growing up, he was popular and outgoing while she was rebellious and headstrong, and he never missed an

opportunity to tease her. Now she intends to avoid him entirely, yet when they're suddenly forced to spend Christmas together, Addie braces for trouble. Perhaps it's the spirit of the season or the magic of mistletoe, but Addie and Erich soon find they have more in common than they thought—and that two people who seem so wrong for each other may actually be just right. With a little prompting from a certain angelic teacher, the two are in for a holiday miracle they'll never forget. Praise for Mr. Miracle “Macomber’s Christmas novels are always something to cherish. Mr. Miracle is a sweet and innocent story that will lift your spirits during the holidays and throughout the year. Celebrating the comforts of home, family traditions, forgiveness and love, this is the perfect, quick Christmas read.”—RT Book Reviews “[Macomber] writes about romance, family and friendship with a gentle, humorous touch.”—Tampa Bay Times “Macomber spins another sweet, warmhearted holiday tale that will be as comforting to her fans as hot chocolate on Christmas morning.”—Kirkus Reviews “This gentle, inspiring romance will be a sought-after read.”—Library Journal “Macomber cheerfully presents a holiday story that combines the winsomeness of a visiting angel (similar to Clarence from *It’s a Wonderful Life*) with the more poignant soulfulness of *A Christmas Carol* to bring to life a memorable reading experience.”—Bookreporter “Macomber’s name is almost as closely linked to Christmas reading as that of Charles Dickens. . . . [Mr. Miracle] has enough sweetness, charm, and seasonal sentiment to make Macomber fans happy.”—The Romance Dish

Colliding Worlds Simone Marchi, 2021-06-24 Simone Marchi presents the emerging story of how cosmic collisions shaped both the solar system and our own planet, from the creation of the Moon to influencing the evolution of life on Earth. The Earth emerged out of the upheaval and chaos of massive collisions in the infancy of the Solar System, more than four billion years ago. The largest of these events sent into orbit a spray of molten rocks out of which the Moon coalesced. As in ancient mythological tales, this giant catastrophe marks the birth of our planet as we know it. Space exploration has shown that signs of ancient collisions are widespread in the Solar System, from the barren and once-habitable Mars to the rugged asteroids. On Earth these signs are more subtle, but still cataclysmic, such as the massive asteroid strike which likely sparked the demise of the dinosaurs and many other forms of life some 66 million years ago. Signatures of even more dramatic catastrophes are concealed in ancient rocks. These events wreaked havoc on our planet's surface, influencing global climate and topography, while also enriching the Earth with gold and other rare elements. And

recently, modern science is finding that they could even have contributed to developing the conditions conducive to life. In *Colliding Worlds*, Simone Marchi explores the key role that collisions in space have played in the formation and evolution of our solar system, the development of planets, and possibly even the origin of life on Earth. Analysing our latest understanding of the surfaces of Mars and Venus, gleaned from recent space missions, Marchi presents the dramatic story of cosmic collisions and their legacies.
