<u>In the Bubble</u> John Thackara,2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, In the Bubble: Designing for a Complex World. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this stuff will have on our daily lives. Who will look after it, and how? In the Bubble is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. In the Bubble describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of In the Bubble is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

Ethical Musicality Gro Trondalen,2023-02-16 Ethical Musicality addresses the crossroads between music and ethics, combining philosophical knowledge, theoretical reflection, and practical understanding. When tied together, music and ethics link profoundly, offering real-life perspectives that would otherwise be inaccessible to us. The first part elucidates music and ethics through some influential and selected scholars ranging from Antiquity via modern philosophy to contemporary voices. In the second part, different roles and arenas are illustrated and explored through various music practices in real-life encounters for the musician, the music educator, the music therapist, the musicologist, the 'lay' musician, and the music researcher. The third part unfolds an ethical musicality focusing on the body, relationship, time, and space. Following these fundamental existentials, ethical musicality expands our lifeworld, including context, involvement, power, responsibility, sustainability, and hope. Such an ethical musicality meets us with a calling to humanity - offering hope of a 'good life'.
